Chinese Student Migration and Selective Citizenship Lisong Liu, 2015-08-20 Since China began its open door and reform policies in 1978 more than three million Chinese students have migrated to study abroad and the United States has been their top destination The recent surge of students following this pattern along with the rising tide of Chinese middle and upper classes emigration out of China have aroused wide public and scholarly attention in both China and the US This book examines the four waves of Chinese student migration to the US since the late 1970s showing how they were shaped by the profound changes in both nations and by US China relations It discusses how student migrants with high socioeconomic status transformed Chinese American communities and challenged American immigration laws and race relations The book suggests that the rise of China has not negated the deeply rooted American dream that has been constantly reinvented in contemporary China It also addresses the theme of selective citizenship a way in which migrants seek to claim their autonomy proposing that this notion captures the selective nature on

both ends of the negotiations between nation states and migrants It cautions against a universal or idealized dual citizenship model which has often been celebrated as a reflection of eroding national boundaries under globalization This book draws on a wide variety of sources in Chinese and English as well as extensive fieldwork in both China and the US and its historical perspective sheds new light on contemporary Chinese student migration and post 1965 Chinese American community Bridging the gap between Asian and Asian American studies the book also integrates the studies of migration education and international relations Therefore it will be of interest to students of these fields as well as Chinese history and Asian American history more generally

American Study Programs in China Peggy Blumenthal,1981 **China Exchange News** ,1983 A Relationship Restored The Committee on Scholarly Communication with the People's Republic of China,1986-02-01 In what The Wall Street Journal calls the first comprehensive analysis of Sino American educational exchanges this volume provides information on the numbers and attributes of American and Chinese students and scholars who have moved between China and the United States since 1978 This book not only supplies quantitative data on their fields of study length of stay and financial resources but also discusses such qualitative issues as the problems students and scholars have encountered in carrying out their work the adequacy of their preparation the reabsorption process that students and scholars from China face upon their return home and the impact of the exchange process on fields of study in both countries

Chinese Education Irving Epstein,2017-12-12 This book first published in 1991 is concerned with educational change It seeks to place Chinese educational policies within the broader social context of Chinese development and modernisation imperatives by analysing issues germane to specific educational structures and sectors At the same time it attempts to inform the reader of larger policy issues which affect the educational system as a whole and speak to more global concerns the nature of Chinese student activism gender inequality rural urban disparities educational inequality the influences of market forces and the growth of professionalism

China's Mongols at University Zhenzhou Zhao,Wing On Lee,2010-04-09 Minority students in China often receive preferential treatment for access to universities However very little is known about minority student experiences and perceptions on campus after they are accorded what s called meaningful access to university The Mongols emerged as a distinct ethnic group in China starting in the 11th century and in the centuries that followed conquered a large part of the world However in modern times this nomadic people s influence has declined and even their survival in China has been threatened This decline is evidenced by the fact that increasing numbers of Mongols have abandoned their native language and traditional customs especially those who live in cities How do Mongol university students who form the backbone of the Mongol intellectual community identify themselves in a modern Chinese context How do they react as university students to the way in which their culture is recognized and represented Do Mongol students suffer from injustice in the cultural dimension of campus life China s Mongols at University Contesting Cultural Recognition seeks to answer these questions Zhenzhou Zhao addresses these issues by comparing the university discourse on

minority culture policy institutional structure and daily life and the Mongol student discourse concerning their experiences perceptions of recognition and dedication to self representation on campus Additionally Gao compares three universities in China Located in Inner Mongolia Autonomous Region Beijing and Hubei Province respectively each of these universities represents one of three types of higher education accessible to minority students in China universities located in ethnic areas standard universities and universities for nationalities China s Mongols at University explores and discusses an intrinsic connection between marketization and globalization and the disadvantages faced by minority groups This book argues that China must move from a policy of preferential tre

Finding Firmer Ground: The Role of Higher Education in U.S.-China Relations Yawei Liu/Michael Cerny,2022-04-27 The U S China educational exchange began auspiciously after a 30 year hiatus in 1978 when Chinese leader Deng Xiaoping announced his strategic decision to send 5 000 students and scholars from China each year to further their education 1 Then U S President Jimmy Carter famously responded Tell him to send 100 000

This was the launch of educational exchange as a core pillar of the U S China relationship. Until the 40th anniversary of the normalization of U S China relations and U S China educational exchange in 2019, there was general agreement that the exchange of students and scholars benefited both countries. There was recognition that the enormous increase in personal interaction and friendships and knowledge about each other's society, culture, economy, and government strengthened understanding, trust, and cooperation. At a time when U S China relations are at its lowest point since the normalization of relations, the benefits of educational exchange are being questioned, if not under assault. Few could have predicted that Chinese students would be weaponized by both sides caught up in the political and security disputes between the two governments. A trade war, political tensions, concerns about academic espionage and influence operations, rising incidents of anti-Asian hate, and a global pandemic have created a perfect storm to stir up distrust as well as retaliatory measures that restrict student mobility on both sides of the Pacific. After years of fast growth, the number of Chinese students and researchers coming to the U S has slowed. China is still the largest source of international students in the U S, accounting for about one third of the total, but America's appeal is weakening. Is this shift toward declining numbers an overdue correction to better protect America against academic espionage and influence operations and prevent China from capitalizing on American know-how to accelerate its own progress? Or is this decline in numbers an unnecessary and damaging hit on American universities' preeminent position in global higher education and its open science model, leading to loss of U S competitiveness and international prestige? This report more broadly is an attempt to discern the benefits, risks, and challenges of U S China educational exchange and determine how educational exchange can advance the interests of both the U S and China going forward.

China's Higher Education Reform and Internationalisation Janette

Ryan, 2011-03-07. Despite radical and fundamental reform of the Chinese higher education system, very little is known about this outside China. The past decade has seen radical reform of all levels of China's education system as it attempts to meet changing economic and social needs and aspirations; this has included transformation of university curricula, pedagogy, and evaluation measures; rapidly increasing joint research and degree programmes between Chinese universities and universities abroad; and very large numbers of Chinese students studying at universities outside China. This book describes the historical, cultural, intellectual, and contemporary background and contexts of the reform and internationalisation of higher education in China. It discusses these changes, outlines the challenges posed by the changes for university administrators, faculty, researchers, students, and those working with Chinese academics and students in China and abroad, and assesses the impact and evaluates the success of the changes. Most importantly, it considers how this mobility of people and ideas across educational systems and cultures can contribute to new ways of working and understanding between Western and Chinese academic cultures. The book is a companion to *Education Reform in China*, which focuses on reform at the early childhood, primary, and secondary levels.

China's Education and the Industrialised World Ruth Hayhoe, Marianne Bastid, 2017-12-12

This book first published in 1987 studies the practical and intellectual import of China's educational relations with the industrialised West the Soviet Union and Japan On the practical level it provides a broad historical and philosophical context within which the possibilities and dangers inherent in China's educational involvement with developed countries may be considered The book tests the theory that education transfers from the developed to the developing world have been used to consolidate political domination and economic exploitation by providing a detailed and provocative historical analysis of China's relations with the major developed nations

Pursuing High-Quality Internationalization of Higher Education in China Jian Li, Eryong Xue, 2024-07-04 This book comprehensively explores the internationalization of higher education in China from the aspects of both challenges and strategies It analyzes the current educational policies of internationalization in China's higher education such as the educational policies in running international schools the educational policies of intercollegiate international exchange the educational policies of Chinese Foreign cooperatively run schools and the educational policies of foreign teachers professional development Additionally this book proposes specific suggestions to address the various problems of internationalization in China's higher education
