**The Philosophy of Indoctrination** Chris Ranalli, 2024-12-16 This book develops and defends a novel social epistemological account of indoctrination It answers important epistemological ethical and political questions about what indoctrination is why it is epistemically harmful how it can be practiced and how we should talk about indoctrination The author presents three views related to the epistemology of indoctrination First he argues that indoctrination is most fundamentally a structural epistemic phenomenon which results in closed minded beliefs The sources of indoctrination are diverse institutional structures technological systems ideological frames and individual actions What unites them is that they lead to the systematic failure to consider seriously the relevant alternatives to what we are taught whether by accident or by design Second he makes the case that indoctrination is always wrong because it disrespects agents in their capacity as epistemic agents even when it results in true belief Third and finally he contends that public indoctrination ascriptions are political propaganda they function to promote political agendas which can ironically breed the conditions for indoctrination rather than forestall it The Philosophy of Indoctrination is an essential resource for researchers and advanced students working in social and political epistemology ethics political philosophy philosophy of education and terrorism and radicalization studies *The RoutledgeFalmer Reader in Multicultural Education* David Gillborn, Gloria Ladson-Billings, 2004

**Learning and Teaching in the Chinese Classroom** Shane N. Phillipson, Bick-har Lam, 2011-10-01 A major concern of all education authorities around the world is the challenge that schools face in catering for learner diversity That this concern is shared by authorities in East Asia including the Education Bureau EDB of Hong Kong is surprising given the high academic achievement of students from this part of the world This book helps to meet this challenge for teachers in East Asia by focusing on specific research that helps explain the basis for diversity in the Chinese learner Although there are many textbooks that cover the basic principles of educational psychology few do not focus on the Chinese learner This book makes the link between the broad field of educational psychology and how these theories contribute to our understanding of the Chinese learner This book is unique in that it draws on recent research to illustrate the application of these theories thereby helping teachers and students in teacher education programmes understand the variability in student achievement Our book is based on the idea that the Chinese context is in many ways different to other cultural contexts and that teachers can make a difference to the outcomes of student learning We also draw on our many years of experience in educating future teachers where our students want us to focus on the Chinese classroom Our student teachers also want to be educated by professors who are themselves researchers In drawing on research about the Chinese learner we also bring to our student teachers the richness and value of educational research We also encourage our student teachers to think of themselves as professional researchers in terms of developing an understanding of the research literature and in finding solutions to their classroom problems
