Educational Innovation In Economics And Business Learning In A Changing Environment:

Educational Innovation in Economics and Business IV Jeanette Hommes, Piet K. Keizer, Malcolm Pettigrew, John Troy, 2013-03-14 The theme of Learning in a Changing Environment reflects the way in which educational thinking in Higher Education has undergone a rapid change throughout the world The EDINEB network consists of people who see the role of educationalists as providing a framework for learning rather than taking a traditional approach of chalk and talk The key to the success of this fourth conference and these articles selected from it lies in the supportive role delegates give to each other in sharing experiences and problems in a changing environment The network has grown because of the commitment of members to form what is in effect a multinational self help group which is dedicated to continual improvement in the educational environment This fourth EDINEB conference brought together 95 registrations from over 21 countries The 16 papers selected represent a cross section of the articles submitted to the authors and the book is divided into four sections 1 LEARNING OBJECTIVES AND PROGRAMME STRUCTURES The first section examines how different programmes in different of countries and cultures have been structured to meet the particular needs both the participants students and the economic environment within which they operate **Educational Innovation in Economics and Business** Roger Ottewill, Liz Borredon, Laurent Falque, Bruce Macfarlane, Ann Wall, 2013-03-09 Like previous volumes in the Educational Innovation in Economics and Business series this one is genuinely international in terms of its coverage With contributions from ten different countries and four continents it reflects the worldwide interest in and commitment to innovation in business education with a view to enhancing the learning experience of both undergraduates and postgraduates It should prove of value to anyone engaged directly in business education defined broadly to embrace management finance economics informational studies and ethics or who has responsibility for fostering the professional development of business educators The contributions have been selected with the objective of encouraging and inspiring others as well as illustrating developments in the sphere of business education **The Challenges of Educating People to Lead in a Challenging World** Michael K. McCuddy, Herman van den Bosch, Wm. Benjamin Jr. Martz, Alexei V. Matveev, Kenneth O. Morse, 2007-06-10 This volume explores the challenges of educating professionals to succeed in a complex uncertain and global business world The book contains intellectual concepts and practical advice from leaders in innovative education around the globe It will help educators and the educational enterprise become more innovative efficient and effective in addressing the teaching learning challenges associated with helping students prepare to face their own challenges Educational Innovation in Economics and Business V L. Borghans, 2000 The Information and Communication Technology revolution results in profound changes to the heart of business and economics Changes in the workplace new communication technology new organizational structures and new production technologies force business educators to renew their focus on the curricula of business schools There is no doubt these changes influence business education and instructional technology But change will

go far beyond the mere introduction of technology in the classroom Alliances between the corporate world and business education are no longer fictitious but are necessary to establish stronger bonds between educational systems and the workplace The fifth volume in the series Educational Innovation in Economics and Business contains a unique selection of articles addressing various issues on how business education should adapt to changing needs of the corporate world It is meant for educators in corporate training centers and for teachers in further and higher education

Educational Innovation in Economics and Business V Lex Borghans,Wim H. Gijselaers,Richard G. Milter,John E. Stinson,2005-12-17

The workplace is changing drastically these days As a consequence of the Information and Communication Technology ICT revolution new economic activities emerge the production process changes people use different communication tools and organizational structures are adjusted All these changes relate to the heart of business and economics and there is no doubt that they will also influence education in these areas Of course ICT provides new technologies to facilitate learning but a changing workplace also requires a renewed focus within the curriculum of economics and business education If ICT is leading to profound change in the workplace is innovation then only a matter of introducing more technology in education Unfortunately this is not necessarily true The translation of changes in the workplace into an improved curriculum requires serious analysis of the essence of the changes at the work place and the way technology may enable student learning For example relevant knowledge is changing faster and faster Does this mean that we have to adopt the curriculum faster and faster Perhaps not as students will have a labor market career of 30 or 40 years Focusing on today s knowledge even if it is very up to date loses more and more value if the life cycle of knowledge becomes shorter Increased speed of change also implies a decrease in the value of knowing all these things

Educational Innovation in Economics and Business III Richard G. Milter, John E. Stinson, Wim H. Gijssels, 2013-03-09 Almost thirty years ago a friend involved in the education profession told me that in his estimation much more was caught by students outside of classrooms than was taught within those hallowed walls This statement has stuck with me through years of personal schooling working as a high school teacher working in management serving as a management consultant and trainer and facilitating learning on university campuses across the US eastern Europe and Asia Learning by doing is certainly something most people have experienced But the fact that there is more opportunity to learn more things today as never before with knowledge doubling every 20 months makes learning by doing more complicated As organizations move to respond to the rapid changes in their environments people within those organizations must face the uncertainty and ambiguity that comes with such conditions The one thing most futurists agree on is that the future will be very different than the present Exponential change has become commonplace Companies used to worry about redefining their goals and specific describing their place in an industry Today in order to survive they must be constantly addressing the issues inherent in redefining their industries
