Charles J. Russo, 2011-06-16 Since 1948 when the United Nations adopted the Universal Declaration of Human Rights all students have been declared the right to education. The rights of disabled students have not been explicitly addressed, however, and each country has developed their own rules and regulations. Although similarities exist among the different countries, differences are evident, especially in both the extent and acknowledgment of these rights. **The Legal Rights of Students with Disabilities: International Perspectives** examines the rights of disabled students in ten diverse countries on six continents. Written by leading experts in education law, this volume provides comparative insights to help meet the educational needs of disabled students. The book also offers strategies to manage the legal and educational complexities associated with special education.      **Children's Rights from International Educational Perspectives** Jenna Gillett-Swan, Nina

Thelander, 2021-12-01 This book critically examines contemporary educational practices with a children's rights lens. Through investigating the factors that contribute to or hinder the realisation of children's rights in and through education in different contexts, it discusses how using a rights framework for education furthers the agenda for achieving international educational aims and goals. Using diverse international examples, the book provides a snapshot of the complexity of children's rights and education. It draws on the expertise of international research teams from Australia, England, Finland, Italy, Mexico, Poland, Portugal, Scotland, Spain, Sweden, Switzerland, and the United States and highlights wide-ranging interpretations of the same mandate across different national contexts. Beginning with a critical overview of the broader context of children's rights in education, the book explores obligations for States and their representatives, tensions and convergences in implementation, and implications for teaching and learning. Using underutilised educational and theoretical concepts, it contributes to broadening understandings of children's rights education and associated theoretical frameworks. Despite a human rights framework emphasising the indivisibility, interrelatedness, and interconnectedness of all rights, the right to education (Article 28) dominates discussions about children's rights and education. As such, equally important rights including the aims of education (Article 29) are often less considered or absent from the conversation. Recognising that children's education rights involve more than just access and provision, this book advocates for a much broader understanding of the nuances underpinning children's education-related rights. Individuals with Disabilities Education Act Ted Gordon,2013-08-19 Special education teachers and parents of children with special education needs are often unaware of the statutory rights under the Individual with Disabilities Education Act IDEA and how to enforce them On the flip side they sometimes do not realize how broad the law is or how and what they must do to meet the laws requirements The author starts with the premise that one of the hardest aspects of studying this law is find a friendly easy way into the statutes Further heavily digested court cases offer examples of what can go wrong if the proper procedures are not followed For example the first case present in the book is one where the parents forced the school district to pay for their child to attend a fancy private school as well as pay for meals and transportation to that school Another case in this book discusses what happens when a parent refuses to agree to the recommended IEP placement Then the next book chapter discusses when there is a change in circumstances that requires an IEP The final court case reviews a situation when the child sought to qualify under IDEA even though the school did not diagnose a disability It also briefly covers section 504 situations and how they tie into IDEA Special education teachers need to know the law to protect themselves as well as meet their legal requirements conversely parents need to understand the law to know how broad and all encompassing the rights are for children meeting the requirements but not getting all the attention they need
