Religion in Multicultural Education Farideh Salili, Rumjahn Hoosain, 2006-05-01 The National Association for Multicultural Education in Washington D C listed a number of issues that the school curriculum should address with reference to multicultural education including racism sexism classism linguisticism ableism ageism heterosexism and religious intolerance It is noteworthy that of all these issues religion is about the only one that throughout history people are willing to die for although whether what is at issue is really religion or other things such as territory is another matter It is also interesting that all the others have isms in their names

but religious issues are characterized by intolerance Perhaps we should try to understand this intolerance and look at what steps might help to alleviate it However while intolerance might seem a simple thing understanding what is behind it and how it plays such a crucial role in religion requires what we refer to in the Introduction chapter as a multifaceted approach at multiple levels It is not enough just to try to dispel stereotypes of followers of other religions or to point out commonalities in world religions We should for example try to understand and appreciate how adherents of other religions try to answer questions regarding their adaptation to the contemporary environment It is through understanding how different religions coexist side by side at various levels that we truly come to learn about religion in multicultural education

debates on education and policy reforms Using diverse comparative education paradigms from critical theory to historical comparative research they address globalisation ideology and democracy and examine both the reasons for and outcomes of education reforms and policy change As such they provide an informed critique of models of quality and standards driven education reforms that are informed by Western dominant ideologies and social values Private Education Geoffrey Walford,2005-11-24 Private schools are central to the reproduction of social inequality For example whilst in the UK providing only about seven per cent of the school population about half of the undergraduates at Oxford and Cambridge still come from the private sector Private schools have long been associated with privilege and elitism While this traditional elitist aspect to the private sector is still central the private school sector is actually far more diverse that is usually acknowledged It now includes many small schools and faith based schools that may not offer the traditional advantages of the private sector but which provide a particular environment deemed desirable by parents In spite of their educational and social importance there has been very little academic research and writing on private schools The proposed book will be the culmination of Professor Walford s research into private schools over the past twenty years *Islamic Radicalism and Multicultural Politics* Tahir Abbas,2011-03-01 The expression of an Islamic political radicalism in Britain has been one of the most dramatic developments in recent decades *Islamic Radicalism and Multicultural Politics* explores the nature of this phenomenon by analysing the origins of Islam and its historical contact with Western Europe and Britain and the emergence of Islamic political radicalism in the Muslim world and in the West Tahir Abbas draws on historical analysis and contemporary case studies to explore the post war immigration and integration of Muslim groups the complex relations that exist between a secular liberal Britain and a diverse but multifaceted Islam and the extent of social and economic inequalities that affect Muslims as individual citizens and in local area communities He shows how violent extremism among British Muslims is in reality influenced by a range of issues including the factors of globalisation and contemporary politics media and culture Analysing and dissecting public policy Abbas offers suggestions for tackling the major social political and economic questions facing British Muslims in the post 7 7 era An important contribution to the study of religion race and ethnicity in modern Britain this accessible work will be of interest to anyone working in the field of Islamic studies sociology and political radicalism Cover design by Mahtab Hussain www.mahtabhussain.com **Old and New Islam in Greece** Konstantinos Tsitselikis,2012-05-25 Providing an interdisciplinary look at Greece s Muslim minority and migrant communities this book provides an exhaustive legal analysis of regulations and broadens our understanding of the political management of ethnic and religious otherness while placing these phenomena in historical context *World Yearbook of Education 2010* AndreElias Mazawi,2017-07-05 The World Yearbook of Education 2010 volume Education and the Arab World Political Projects Struggles and Geometries of Power strives to do justice to the complex processes and dynamics behind the world of Arab education Western interest in all things Arab has greatly increased over the course of the decade but this interest runs

the risk of forgetting that the Arab world is positioned within wider contexts of regional geopolitical and global processes This volume examines Arab education in a range of contexts regional diasporic and trans national to better understand how the field of Arab education is formed through local regional geopolitical and global engagements and resonances In doing so contributors from a range of disciplines open critical conversations about the intersections of history culture geopolitics policy and education The World Yearbook of Education 2010 offers new conceptual and empirical approaches that deal with some of the often neglected aspects of the study of Arab education contested political projects struggles towards emancipation recognition and liberation and a larger concern for social justice equity and political inclusion Andriias Mazawi is associate professor in the Department of Educational Studies at the University of British Columbia Vancouver BC Canada He is also an associate fellow at the Euro Mediterranean Centre for Educational Research at the University of Malta Ronald G Sultana is professor in the Department of Education Studies at the University of Malta where he also leads the Euro Mediterranean Centre for Educational Research He is the founding editor of the Mediterranean Journal of Educational Studies

Method and Theory in the Study of Religion: Working Papers from Hannover Steffen Führding,2017-07-03 Since the downfall of the phenomenology of religion as the leading paradigm in the study of religion in the 1960s theoretical and methodological discussions surrounding the nature and identity of the study of religion as an academic discipline have proliferated The essays included in this volume approach these debates from a variety of angles Based on a series of talks held at the University of Hannover over the last few years the essays are intended to be understood as diagnostic works in progress and thus as working papers all of which strive to point out important problems and perspectives in the field of theories and methodology and to draw attention to the future of the discipline Using developments in Hanover as a launch pad the volume forms the basis for further insights into the direction of the study of religion as a discipline at large
