Key constructs like motivation, development, beliefs, literacy, and emotions are given substantive updates while entire new chapters touch on trends that have materialized since the publication of the third edition, such as inquiry, world views, Critical Race Theory, cognitive neuroscience, and emerging technologies in education. Throughout this new edition, chapter authors coalesce on issues of social justice, situated approaches to inquiry, and progressive inquiry methods. Firmly rooted in research, up-to-date theory, and classroom-tested applications, Educational Psychology prepares teachers as no other text does. It teaches them to think about how students develop and learn to make decisions before and during instruction and to consider what constitutes evidence that their students are learning and succeeding. This edition includes a new focus on reflection, new cases, sections on brain research, programs for language minority students, technology, No Child Left Behind, and after-school and summer school programs.
