Royce,Wendy Bowcher,2013-01-11 New Directions in

the Analysis of Multimodal Discourse offers a comprehensive international view of multimodal discourse and presents new directions for research and application in this growing field. With contributions from top scholars around the world, this work opens up the field of multimodal discourse analysis as it covers a wide range of interests such as computational linguistics, education, ideology, and media discourse. The range and scope of the chapters in this book provide groundbreaking insights into exploring and accounting for the various facets of multimodality in a range of texts and contexts. Initial chapters specifically aim to tackle theoretical issues, while subsequent chapters focus on important research areas such as writing and graphology, genre ideology, computational concordancing, literacy, and cross-cultural and cross-linguistic issues. In the final chapters, an emphasis is placed on the educational implications of multimodality in first and second language contexts, a particularly new and interesting contribution.

Dimensions of Goodness Vittorio Hösle, 2014-10-02

Dimensions of Goodness is based on the second conference of the Notre Dame Institute for Advanced Study, whose aim is to bridge the normative and descriptive dimensions of knowledge by bringing in as many disciplines as possible to address fundamental philosophical issues. While the first conference dealt with the elusive topic of beauty, the second addressed crucial issues of ethics. In the first section of this volume, the German philosophers Franz von Kutschera and Markus Gabriel discuss the nature of values and the reasons why we believe that normativity has a place in the world. In the second section, the British historian Jonathan Israel, the American theologian Jennifer Herdt, and the editor of the volume analyse epochal changes in our moral beliefs due to Enlightenment, Christianity, and the general evolution of moral ideas, which is presented in a way that markedly differs from Alasdair MacIntyre's famous account. The third section explores both the light that the exact sciences shed on the process of decision making in the contributions by the Italian neuroscientist Camillo Padoa-Schioppa and the Canadian psychologist Clive Seligman, as well as the ethical challenges that modern science has brought forward in areas such as the responsibility of scientists, bioethics, and medical ethics in chapters by the Swiss chemist and Nobel laureate Richard Ernst, the American bioethicist and historian of biology Jane Maienschein, and the American philosopher and legal scholar Anita Allen. The fourth section focuses on specific challenges of our time: the British philosopher Robin Attfield explores the principles of environmental ethics; the Swiss business ethicist Georges Enderle investigates goodness in economy; the Mexican elder statesman, former Secretary of Economy and of Foreign Affairs, Luiz Ernesto Derbez Bautista looks at the challenges of development; and the American legal scholars Steven D. Smith and Mary Ellen O'Connell examine the place of religion in the American constitution and the power of international law in limiting violence, respectively. Finally, the last section consists of a chapter by the well-known Chinese intellectual Wang Hui on Lu Xun's struggle to find a middle way between respect of one's own tradition and the demands of globalization. There is probably no other volume in which so many different disciplines come together to try to find a convergence of perspectives on basic moral issues. The book will be invaluable to those who believe that goodness is the focal point of most academic disciplines and that academia can find a

stronger point of unity in a common reflection on what goodness in various areas means *Hero or Villain?* Abigail G. Scheg, Tamara Girardi, 2017-11-21 One dimensional television characters are a thing of the past today's popular shows feature intricate storylines and well developed characters From the brooding Damon Salvatore in The Vampire Diaries to the tough minded Rick Grimes in The Walking Dead protagonists are not categorically good antagonists often have relatable good sides and heroes may act as antiheroes from one episode to the next This collection of new essays examines the complex characters in Orange Is the New Black Homeland Key Peele Oz Empire Breaking Bad House and Buffy the Vampire Slayer *Mech*, 1974 Good Guys with Guns Angela Stroud, 2016-06-01 Although the rate of gun ownership in U S households has declined from an estimated 50 percent in 1970 to approximately 32 percent today Americans propensity for carrying concealed firearms has risen sharply in recent years Today more than 11 million Americans hold concealed handgun licenses an increase from 4.5 million in 2007 Yet despite increasing numbers of firearms and expanding opportunities for gun owners to carry concealed firearms in public places we know little about the reasons for obtaining a concealed carry permit or what a publicly armed citizenry means for society Angela Stroud draws on in depth interviews with permit holders and on field observations at licensing courses to understand how social and cultural factors shape the practice of obtaining a permit to carry a concealed firearm Stroud's subjects usually first insist that a gun is simply a tool for protection but she shows how much more the license represents possessing a concealed firearm is a practice shaped by race class gender and cultural definitions that separate good guys from those who represent threats Stroud's work goes beyond the existing literature on guns in American culture most of which concentrates on the effects of the gun lobby on public policy and perception Focusing on how respondents view the world around them this book demonstrates that the value gun owners place on their firearms is an expression of their sense of self and how they see their social environment *The Entrepreneurial Engineer* Michael B. Timmons, Rhett L. Weiss, John R. Callister, Daniel P. Loucks, James E. Timmons, 2014 Written by teachers and successful entrepreneurs this textbook includes guidance instruction and practical lessons for the prospective entrepreneur *OBJECTIONS* Bob Oros, 2012-08-01 Remove every roadblock to the sale You will learn how to carefully remove every objection that a customer presents to you as a reason why they are not interested in buying This book will show you how to overcome all the objections that have ever been presented from a variety of customers and under numerous conditions Benjamin Franklin's 13 week self improvement program will guarantee your success **Mollie Is Three** Vivian Gussin Paley, 1988-12-15 Traces the development of a three year old nursery school student looks at how young children use fantasy play to help make sense of the world and describes interactions between three and four year olds
