Flores,2020-05-26 *Speaking Private Authority* The Construction of Sustainability in Forests and Fisheries expands upon current understandings of the emergent global phenomenon that is private authority As private authority is becoming increasingly important in the conduct of global governance broadening our collective understanding of it will prove beneficial Roberto J Flores argues that private actors are not simply outgrowths of existent social structures or material conditions rather they are purposive agents strategically pursuing an agenda Therefore explaining private authority requires an examination of the constitutive elements that underlie this social phenomenon to which the author applies an analytical framework that combines social network theory with discourse analysis The author applies these tools to two cases taken from the environmental sector forests and fisheries and finds that as environmental politics takes on an increasingly networked character the actors that are best able to generate and wield private authority are those that strategically place themselves in between networks through the construction of discursive nodal points around which competing actors are forced to converge at the level of identity The case studies specifically look at how particular actors leveraged construction of the sustainable development concept in order to strategically place themselves in advantageous positions for exercising private authority *The New Guide to North Carolina Beaches* Glenn Morris,2019-03-05 *The New Guide to North Carolina Beaches* is an invaluable resource for every coastal traveler in the Tar Heel State This descriptive guide to North Carolina s coastal counties goes far beyond the basics to showcase all that the seaside has to offer from beach access points and camping options to aquariums museums and other attractions Glenn Morris also shares informative and entertaining histories of each county insights into the maritime environment and its wildlife and useful tips on subjects like the dos and don ts of beach driving A beach by beach tour of more than 300 miles of coastline Highlights public access points for beachgoers Offers practical guidance for trip planning whether day trips or weeklong vacations Includes detailed maps contact information hours of operation and much more **Consumerism in Twentieth-Century Britain** Matthew Hilton,2003-11-13 This book is the first comprehensive history of consumerism as an organised social and political movement Matthew Hilton offers a groundbreaking account of consumer movements ideologies and organisations in twentieth century Britain He argues that in organisations such as the Co operative movement and the Consumers Association individual concern with what and how we spend our wages led to forms of political engagement too often overlooked in existing

accounts of twentieth century history He explores how the consumer and consumerism came to be regarded by many as a third force in society with the potential to free politics from the perceived stranglehold of the self interested actions of employers and trade unions Finally he recovers the visions of countless consumer activists who saw in consumption a genuine force for liberation for women the working class and new social movements as well as a set of ideas often deliberately excluded from more established political organisations

The Myth of Green Marketing Toby Maureen Smith, 1998-01-01 In this groundbreaking study Toby Smith analyses the role that social myths such as green marketing play in public understanding of the environmental crisis This book introduces the concept of hegemony into environmental politics using the concept to elucidate the political economic and social alliance that sustains our belief in industrial expansionism The ecological crisis of the late twentieth century presents a challenge to the very foundations of this alliance The hegemonic system reacts to a threat to its structure by producing social myths that provide a common sense understanding of the threat Smith examines one such social myth the contemporary phenomenon known as green marketing and how it came to reinforce rather than challenge the ethics of productivism By analysing green marketing as it relates primarily to the early 1990s corporate campaigns of companies such as McDonald s Shell Chemicals and Mobil Chemical Co Smith demonstrates how these voices weave together an understanding of green consumerism using familiar language from economic and liberal democratic discourses The Myth of Green Marketing is an original and important contribution to the field of environmental studies As the first book on green marketing it is sure to raise controversy with its unique discussion of the cultural and social aspects of environmental issues
