York as both a place and an idea **The World & I**, 1987 **Divided Planet** Tom Athanasiou, 1998 Global warming Soil loss Freshwater scarcity Extinction Overconsumption Toxic waste production Habitat and biodiversity erosion These are only a few of our most urgent ecological crises There are others as well and despite the popularity of good news environmentalism few of them are going away In this wide ranging grimly entertaining commentary on the environmental debate Tom Athanasiou finds that these problems are exacerbated if not caused by the planet's division into warring camps of rich and poor Writing with passionate intelligence Athanasiou proposes a simple yet radical solution stop indulging easy calming fantasies in which everything seems to change but nothing important changes at all Instead do what needs to be done now while there is still time and goodwill The bottom line he concludes is that there will be no sustainability without a large measure of justice Without profound political and economic change he argues there can be no effective global environmental action no real effort to save the planet
