[The Collapse of the Soviet Union, 1985-1991](#) David R. Marples, 2016-09-17 Why did the Soviet Union collapse in 1991? The collapse of the Soviet Union has widely been seen as the result of the arms race and Cold War and the failure of the Soviet side to keep pace with new technology. This book argues that the disintegration was mainly a result of two interrelated factors: the rise of the Soviet national republics and the manipulation of the new Russian presidency by Boris Yeltsin in what became a direct power struggle between Yeltsin and the Soviet leader Gorbachev. Written in a clear and accessible manner, the book provides an explanation of how the national question came to dominate Soviet politics by 1990: 1. analysis of the economic crisis that occurred in the late 1980s; a chapter devoted to the year 1991 from the referendum to reform the Soviet Union to the unforeseen dissolution of the country by December; a discussion of the personalities of and political confrontation between the two key statesmen Gorbachev and Yeltsin. Also containing a Chronology, Glossary, and Who's Who of key figures. Nearly every American's environment now consists of cable television, video cassette players, answering machines, fax machines, and personal computers. Schement and Curtis argue that the information age has evolved gradually throughout the twentieth century. National focus on the production and distribution of information stems directly from the organizing principles and realities of the market system, not from a revolution sparked by the invention of the computer. Now available in paperback.
