Global Security Watch—Egypt Denis J. Sullivan, Kimberly Jones, 2008-06-30 Despite the appearance of political and

military stability Egypt may be standing at the edge of a precipice as the state remains grounded in rigid authoritarianism while the population including a struggling civil society readies itself to make the leap to democratization This characterization has far reaching implications for relations between citizens and the government as well as Egypt s foreign affairs posture particularly in the Middle East State repression of civil political and religious actors the ineffectual provision of social services and two religious divides between Coptic Christianity and Islam on the one hand and secular and conservative Islamic traditions on the other make for an incendiary domestic environment The resulting over reliance on security services to quash dissent could result in a population more amenable to less democratic methods of regime change and or the development of stronger linkages between regional Islamist groups whether they be political militant or some combination thereof Global Security Watch Egypt explores the historical background that created the current realities in Egypt and examines the players and events influencing the nation today It concludes with a series of recommendations for the Egyptian political establishment and for the American government in the belief that meaningful political and policy changes in Egypt can lead to an improvement in human rights democracy justice stability and security for Egypt and an improved partnership between Egypt and the United States
