Eight Approaches To Teaching Composition:

Eight Approaches to Teaching Composition Timothy R. Donovan, Ben W. McClelland, 1980 *Teaching Composition* Gary Tate, 1987

Theorizing Composition Mary Kennedy, 1998-06-25 The last 25 years have witnessed extraordinary growth in the academic specialization variously described as composition studies or rhetoric and composition What was noticeable about the field in its infancy was a preoccupation with practice a lack of emphasis on theory and an exclusive reliance on the writing process As its disciplinary status has grown the field has become far more theoretical Composition studies has expanded its focus reconceptualized the writing process and embraced a wide range of critical perspectives The result of this change is that terms such as poststructuralism social construction gender and genre which were largely unknown in 1965 now dominate discussion This reference book is a guide to the multiplicity of theories that have emerged to form the disciplinary foundation of composition studies The volume consists of 66 entries each of which is written by an expert contributor and focuses on a particular theory or group of theories While the entries show how various individuals have contributed to theoretical movements very few concentrate on the work of a single theorist Each entry first provides a critical summary of a particular theory or group of theories including key elements basic concepts and claims and information about seminal or particularly influential works It then reviews the theory's critical reception in composition studies and discusses its significance in the field The bibliography at the end of each entry lists primary texts and major scholarship related to the theory and provides additional suggestions for further reading The volume closes with a selected bibliography of important works

Beyond the Corporate University Henry A.

Giroux, Kostas Myrsiades, 2001 Prominent scholars in this book move boldly beyond critique to show how and why the critical functions of a democratically informed civic education not merely professional training must become the core of the university's mission. They show why higher education must address what it means to relate knowledge to public life and social responsibility to the demands of critical citizenship. Moreover, they show why democratic forms of education and various elements of a critical pedagogy are vital not only to individual students but also to our economy and our democratic institutions and future leadership. Lunsford, 2014-05-01 First Year Composition: From Theory to Practice's combination of theory and practice provides readers an opportunity to hear twelve of the leading theorists in composition studies answer in their own voices the key question of what it is they hope to accomplish in a first year composition course. In addition, these chapters and the accompanying syllabi provide rich insights into the classroom practices of these theorists. *Forum*, 1993 **Growing a Soul for Social Change** Tonya Huber-Warring, 2008-04-01 For readers new to the field of multicultural education and human relations education, the recency of these publications heralded as seminal may be confusing for certainly the concepts building the field of multicultural education and human relations education have been around much longer. True. But for the first time we found the conceptual framework guiding principles and critical works across disciplines and fields in Smith's encyclopedic organization. Because of the comprehensive nature of Pritchard Smith's knowledge bases, they have been employed as the organizing themes for this volume. I would clarify that I have not burdened authors to study Smith's analysis and then apply it to their works; the categorization is my own. And as is true of any topic, the interpretation and application may be broadly applicable. One of my major goals in founding this series has been to further develop the knowledge bases with voices from those in the trenches, literally and figuratively, and at the chalkface, while proverbial for some parts of the world, chalk remains a teaching staple in many regions of the world. Throughout this volume, authors will explore and research their own discoveries on this journey: narratives of crossing cultures and developing communities, reconceptualizing democracy and reinterpreting traditions, seeking solidarity and sowing the seeds of social justice. Through critical reflection in the shade of these giants, the reader may discover Ming Fang's bamboo tree. *The SAGE Handbook of Rhetorical Studies* Andrea A. Lunsford, Kirt H. Wilson, Rosa A. Eberly, 2008-10-29 The SAGE Handbook of Rhetorical Studies surveys the latest advances in rhetorical scholarship, synthesizing theories and practices across major areas of study in the field and pointing the way for future studies. Edited by Andrea A. Lunsford and Associate Editors Kirt H. Wilson and Rosa A. Eberly, the Handbook aims to introduce a new generation of students to rhetorical study and provide a deeply informed and ready resource for scholars currently working in the field. Key Features: Brings together scholars from across the disciplines of Speech Communication, English, and Writing Studies. While rhetoric is by definition interdisciplinary, self-identified scholars in the field are most often institutionally separated from one another. This Handbook bridges this divide by providing a refreshing

range of transdisciplinary views on the nature status definition and scope of rhetoric today Offers a thorough going overview of rhetorical studies today Organized in four sections Historical Studies in Rhetoric Rhetoric Across the Disciplines Rhetoric and Pedagogy and Rhetoric and Public Discourse the volume provides a single resource for engaging rhetorical studies Underscores the importance of rhetoric to education across a wide range of disciplines as well as to effective participation in public arenas Thus the volume connects rhetoric s long teaching tradition to an activist agenda for informed civic engagement Addresses methodological and theoretical difficulties and offers means of negotiating them Provides one of the first introductions to rhetorical studies across cultures and to the related debates concerning comparative and contrastive rhetorics

Fragments of Rationality Lester Faigley, 2014-07-12 In an insightful assessment of the study and teaching of writing against the larger theoretical political and technological upheavals of the past thirty years *Fragments of Rationality* questions why composition studies has been less affected by postmodern theory than other humanities and social science disciplines

Beyond Postprocess and Postmodernism Theresa Jarnagi Enos, Keith D. Miller, Jill McCracken, 2003-01-30 Annotation Volume illuminates many of the tensions present in the field of rhetoric and composition studies explaining the scope and role of rhetoric in contemporary scholarship For scholars and other individuals interested in rhetoric and composition studies P
