America Aflame David Goldfield, 2011-03-15 In this spellbinding new history, David Goldfield offers the first major new interpretation of the Civil War era since James M. McPherson's *Battle Cry of Freedom*. Where past scholars have limned the war as a triumph of freedom, Goldfield sees it as America's greatest failure, the result of a breakdown caused by the infusion of evangelical religion into the public sphere. As the Second Great Awakening surged through America, political questions became matters of good and evil to be fought to the death. The price of that failure was horrific, but the carnage accomplished what statesmen could not: It made the United States one nation and eliminated slavery as a divisive force in the Union. The victorious North became synonymous with America as a land of innovation and industrialization, whose teeming cities offered squalor and opportunity in equal measure. Religion was supplanted by science and a gospel of progress, and the South was left behind. Goldfield's panoramic narrative, sweeping from the 1840s to the end of Reconstruction, is studded with memorable details and luminaries such as Harriet Beecher Stowe, Frederick Douglass, and Walt Whitman. There are lesser-known yet equally compelling characters too, including Carl Schurz, a German immigrant war hero and postwar reformer, and Alexander Stephens, the urbane and intellectual vice president of the Confederacy. *America Aflame* is a vivid portrait of the fiery trial that transformed the country we live in.

Monkey to Man Gowan Dawson, 2024-02-27 The first book to examine the iconic depiction of evolution, the march of progress, and its role in shaping our understanding of how humans evolved. We are all familiar with the march of progress, the representation of evolution that depicts a series of ape-like creatures becoming progressively taller and

more erect before finally reaching the upright human form Its emphasis on linear progress has had a decisive impact on public understanding of evolution yet the image contradicts modern scientific conceptions of evolution as complex and branching This book is the first to examine the origins and history of this ubiquitous and hugely consequential illustration In a story spanning more than a century from Victorian Britain to America in the Space Age Gowan Dawson traces the interconnected histories of the two most important versions of the image the frontispiece to Thomas Henry Huxley s Evidence as to Man s Place in Nature 1863 and The Road to Homo Sapiens a fold out illustration in the best selling book Early Man 1965 Dawson explores how the recurring appearances of this image pointed to shifting scientific and public perspectives on human evolution as well as indicated novel artistic approaches and advancements in technology
