Abraham, 2009-06-23 Forty years ago Buzz Aldrin became the second human minutes after Neil Armstrong to set foot on a celestial body other than the Earth The event remains one of mankind's greatest achievements and was witnessed by the largest worldwide television audience in history In the years since millions more have had their Earth-centric perspective unalterably changed by the iconic photograph of Aldrin standing on the surface of the moon the blackness of space behind him and his fellow explorer and the Eagle reflected in his visor Describing the alien world he was walking upon he uttered the words magnificent desolation And as the astronauts later sat in the Eagle waiting to begin their journey back home knowing that they were doomed unless every system and part on board worked flawlessly it was Aldrin who responded to Mission Control's clearance to take off with the quip Roger Understand We're number one on the runway The flight of Apollo 11 made Aldrin one of the most famous persons on our planet yet few people know the rest of this true American hero's story In Magnificent Desolation Aldrin not only gives us a harrowing first person account of the lunar landing that came within

seconds of failure and the ultimate insider's view of life as one of the superstars of America's space program he also opens up with remarkable candor about his more personal trials and eventual triumphs back on Earth From the glory of being part of the mission that fulfilled President Kennedy's challenge to reach the moon before the decade was out Aldrin returned home to an Air Force career stripped of purpose or direction other than as a public relations tool that NASA put to relentless use in a seemingly nonstop world tour The twin demons of depression and alcoholism emerged the first of which Aldrin confronted early and publicly and the second of which he met with denial until it nearly killed him He burned through two marriages his Air Force career came to an inglorious end and he found himself selling cars for a living when he wasn't drunkenly wrecking them Redemption came when he finally embraced sobriety gained the love of a woman Lois who would become the great joy of his life and dedicated himself to being a tireless advocate for the future of space exploration not only as a scientific endeavor but also as a thriving commercial enterprise These days Buzz Aldrin is enjoying life with an enthusiasm that reminds us how far it is possible for a person to travel literally and figuratively As an adventure story a searing memoir of self destruction and self renewal and as a visionary rallying cry to once again set our course for Mars and beyond Magnificent Desolation is the thoroughly human story of a genuine hero      **Buzz Aldrin** Elizabeth Raum,2005-12-28 An introduction to Buzz Aldrin the first astronaut to walk on the moon discussing his childhood in New Jersey his education and military service his career at NASA and his later life      **No Dream Is Too High** Buzz Aldrin,Ken Abraham,2016-04-05 Beloved American hero and astronaut Buzz Aldrin reflects on the wisdom guiding principles and irreverent anecdotes he's gathered both in outer space and on earth through his event filled life in this inspiring guide to life for the next generation Everywhere he goes crowds gather to meet Buzz Aldrin He is a world class hero a larger than life figurehead best known of a generation of astronauts whose achievements surged in just a few years from first man in space to first men on the moon Now he pauses to reflect and share what he has learned from the vantage point not only of outer space but also of time still a non stop traveler and impassioned advocate for space exploration Aldrin will be 86 in 2016 No Dream Is Too High whittles down Buzz Aldrin's event filled life into a short list of principles he values each illustrated by fascinating anecdotes and memories such as Second comes right after first NASA protocol should have meant he was first on the moon but rules changed just before the mission How he learned to be proud of being the second man on the moon Look for opportunities not obstacles Buzz was rejected the first time he applied to be an astronaut Failure is an opportunity to learn to do better Always maintain your spirit of adventure For his 80th birthday Buzz went diving in the Galapagos and hitched a ride on a whale shark He stays fit energetic and fascinated with life No Dream Is Too High is a beautiful memento a thought provoking set of ideas and a new opportunity for Buzz Aldrin to connect with the masses of people who recognize his unique place in human history

the Moon despite the fact the plans originated a year before the first Russian cosmonaut Yuri Gagarin orbited the Earth and two years before John Glenn did. Over the decade NASA would spend tens of billions on the Apollo missions, the most expensive peacetime program in American history to that point, and even though Apollo 11 was only one of almost 20 Apollo missions, it was certainly the crown jewel, only one of nearly 20 Apollo missions conducted by NASA. And to make Apollo 11 a success, it would take nearly a decade of planning by government officials, hard work by NASA scientists, intense training by the astronauts, and several missions preceding Apollo 11. It also cost over 20 billion, making the Apollo program the most expensive peacetime program in American history at the time. When the Apollo program reached its pinnacle, the man at the center of it was Neil Armstrong, a farm boy and pilot who rose from a hardworking rural home to become the first to set foot on the Moon and utter one of the 20th century's most famous phrases: "That's one small step for man, one giant leap for mankind." Armstrong did so through education, first in high school and later at Purdue University, a lot of hard work as a pilot during and after the Korean War, and some luck coming of age at a moment when the Space Race was in full effect. After reaching the peak of his fame and career at the young age of 40, Armstrong spent the second half of his life as he had the first, working hard and serving his country. In doing so, he serves as one of the best examples of national pride and service that America has ever known. Alongside him was Buzz Aldrin, which was somewhat fitting given his family's past. His father was a military test pilot, and Aldrin would follow a similar path on his way to becoming a member of the Gemini program and ultimately the Apollo 11 mission. Despite reaching the peak of his fame and career before the age of 40, Aldrin has continued to work in the field and has been one of the most effective advocates of further space travel, particularly to Mars. Neil Armstrong and Buzz Aldrin: The Lives and Careers of the First Men on the Moon profiles both astronauts and the most memorable space mission in history. Along with pictures of important people, places, and events, you will learn about Neil Armstrong and Buzz Aldrin like never before.
