Demands of Expanding Populations and Development Planning Frederic R. Siegel, 2008-08-03 Population Answering the Needs and Demands The world's human population is 6.6 billion people and growing by 80 million in 2005 Most of the growth is in less developed nations The Population Reference Bureau 2006 estimates that the global population will reach 7.9 billion people by 2025 It is projected to stabilize at 9.2 billion people by 2050 Governments strive to attract industrial manufacturing services and other projects to advance their economies and thus cope with existing social and political problems and future challenges heightened by expanding populations They are encouraged in these efforts by international lending and development organizations such as the World Bank and the International Finance Corporation These and other multilateral regional and sub regional development banks make funds available for economic and social improvement programs in developing countries Table p 1 Well planned projects can stimulate economic growth and create wealth in a society This wealth can be used to promote the health education and general welfare status of its members and their employment opportunities even as populations expand There are many theories that define and expound on economic development Malizia and Feser 1999 summarize the theories in terms of their essential dynamics strengths and weaknesses and how they are applied to achieve growth All theories agree that economic advancement is based on investing capital in projects that can flourish and yield financial gain over extended periods of time
