Performance Management Charles M. Cadwell, 2002-05-13 Organizational success depends on the continuous improvement of staff performance at all levels. People constitute the real competitive advantage in business and industries of all types. Enhancing the performance of your people and ultimately your organization depends on the continuous improvement of staff at all levels. An effective Performance Management system is essential to help employees perform at their best and align their contributions with the goals, values, and initiatives of the organization. Performance Management presents managers and supervisors with a clear model they can follow to plan, monitor, analyze, and maintain a satisfying process of performance improvement for their staff. Designed for readers to apply what they are learning to their current job responsibilities, this book offers exercises and assessments to determine your readiness to implement performance management. It also illustrates strategies for developing the crucial communication skills of coaching, problem solving, and giving feedback, while teaching methods for linking organization and personal goals. Sorin Dumitrascu, 2017-07-09 Can you say for sure whether your team or employee goals are consistently being met? It's important to know if everyone is working to the standards expected of them. Effective performance management can help boost productivity at all levels of your organization. A systematic approach is important to increase productivity throughout an organization. It's also important to focus on achieving results that contribute to the success of a company. These are two cornerstones of effective performance management. This course begins with an explanation of the nature of performance management and the advantages it provides to organizations that use it. Then the five phases that typically comprise a performance management system will be introduced. Much of the course is an in-depth look at the first phase: planning for performance, and it also covers how to establish performance expectations. During this first phase of the performance management process, you'll establish critical success factors and translate them into key performance indicators. Then you'll develop role profiles to help match people with the right skills to appropriate work, further improving performance. Once you've completed this course, you'll have an understanding of what a performance management system involves and be able to undertake the planning needed for such a system to be effective. This planning is the basis for all the

other phases of performance management Monitoring performance is critically important It shows you whether you re on track to achieve your goals And if you re not it gives you the chance to change things before it s too late You can only monitor and measure performance when you have clear and specific targets and standards You also need to be able to collect the right performance data and know how to analyze it use it and act on it Finally you must know how to deal effectively with underperformance whether that s from employees who aren t performing can t perform or won t perform to the standard required This course introduces a four step process for monitoring and improving performance It first explains how to determine and set appropriate targets and standards against which you can measure performance It then introduces different ways to collect the relevant data and shows you how to analyze the data and decide on appropriate action to help respond to gaps in performance Finally the course presents a technique for dealing with under performers in a positive and collaborative way Managing the performance of your employees is an essential part of being a manager And one of the most important parts of managing performance is taking a strategic integrated and cohesive approach to rewarding employees for the value they produce for the organization Reward management is a process of formulating and implementing policies strategies and practices to reward employees fairly consistently and in line with their value to the organization It s important that employees understand that there s a clear connection between how well they perform and how well they re rewarded An effective reward system organizes and categorizes reward related processes and activities to ensure that reward management produces value for both employees and employer Performance appraisal is the part of reward management that involves monitoring measuring and assessing how well employees meet the standards and competency requirements of their jobs Put simply performance appraisal puts a value on an employee s contribution to the organization The assessment of an employee s performance is communicated to the employee through the performance appraisal meeting This is a formal discussion about how well that person has achieved the key outcomes or goals of the job over a period of time But an appraisal meeting needs to be handled well if it s going to result in a positive and productive experience for both manager and employee
