*Pharaonic Egyptian Clothing* Gillian Vogelsang-Eastwood, 2023-08-14 This volume is an interesting guide to the identification of everyday Pharaonic Egyptian clothing. It discusses dated material from excavated sources as well as giving the construction of typical pieces and an indication of how the ancient Egyptians saw these garments. The book deals with each garment type in a separate chapter and covers such items as cloth and leather loincloths, dresses, bag tunics and various types of headgear. It is well illustrated with numerous line drawings as well as illustrations depicting various surviving garments. There is a glossary which describes both the basic garment types and the sewing techniques which may be encountered. *The Egyptian Museum in Cairo* Abeer El-Shahawy, Maḥaf al-Miṣrī, 2005 Cairo's Egyptian Museum houses the largest collection of Egyptian antiquities in the world. Some 150 000 pieces are exhibited and another 30 000 are held in storerooms. This book carries full color illustrations of many of the masterpieces of ancient art in the museum from the decorated vases, flint knives and palettes of the predynastic period through the magnificent artifacts of the pharaonic period to the beautiful tempera portraits of the Roman period. **Egyptian Cultural Identity in the Architecture of Roman Egypt (30 BC-AD 325)** Youssri Ezzat Hussein Abdelwahed, 2015-02-06 This volume considers the relationship between architectural form and different layers of identity assertion in Roman Egypt. It stresses the sophistication of the concept of identity and the complex yet close association between architecture and identity. *The Priests of Ancient Egypt* Serge Sauneron, 2000 Using as his sources the Egyptian texts and the testimony of classical authors, Serge Sauneron illuminates the role of the priesthood in Ancient Egypt. *Tomb Treasures of the Late Middle Kingdom* Wolfram Grajetzki, 2014-01-23 With detailed illustrations and archival images, Egyptologist Wolfram Grajetzki describes and compares the opulent tombs of eminent and royal women from the late Middle Kingdom, shedding new light on how the gendered and social identities of these women were viewed in the court and preserved in the grave. **Ancient Egypt and Early China** Anthony J. Barbieri-Low, 2021-07-17 The first comparative study of these two early empires. Although they existed more than a millennium apart, the great civilizations of New Kingdom Egypt (ca. 1548-1086 BCE) and Han dynasty China (206 BCE-220 CE) shared intriguing similarities. Both were centered around major flood-prone rivers, the Nile and the Yellow River, and established complex hydraulic systems to manage their power. Both spread their territories across vast empires that were controlled through warfare and diplomacy and underwent periods of radical reform led by charismatic rulers: the heretic king Akhenaten and the vilified reformer Wang Mang. Universal justice was dispensed through courts, and each empire was administered by bureaucracies staffed by highly trained scribes who held special status. Egypt and China each developed elaborate conceptions of an afterlife world and created games of fate that facilitated access to these realms. This groundbreaking volume offers an innovative comparison of these two civilizations. Through a combination of textual, art, historical, and archaeological analyses, *Ancient Egypt and Early China* reveals shared structural traits of each civilization as

well as distinctive features

**The People of the Cobra Province in Egypt** Wolfram Grajetzki, 2020-04-19 The book delivers a history from below for the first half of Egyptian history covering the earliest settlements, state formation and the pyramid age. The focus is on the Wadjet province, about 350 km south of modern Cairo in Upper Egypt. Here archaeological records provide an especially rich dataset for the material culture of farmers. Histories of Ancient Egypt have focussed heavily on the kings, monuments and inscriptions, while the working population is hardly mentioned. The book investigates the life of people far from the centres of power. One main aim of the book is the interaction between farmers and the ruling classes at the centres of power and locally. How did decisions at the royal centre affect the life of ordinary people? The Introduction offers a critical survey of Egyptologists and their attitudes towards the working class. The social and cultural background of these researchers is analysed to assess how heavily they are influenced by time and their political and cultural background. The First chapter then describes the location and gives a history of previous research and excavations. The archaeological sites and the recorded ancient place names of the province are presented to provide a geographical framework for the book. The following chapters are arranged in chronological order, mainly according to the archaeological phases visible in the province. It appears that in phases of a weak central government, people in the provinces were much better off, while in phases of a strong central government, burials of poorer people are almost absent. The reasons for this are discussed. A substantial part of the book comprises descriptions of single burials and the material culture in the province. The archaeology of the poorer people is the main focus. Burial customs and questions of production are discussed. For a fuller picture, evidence from other parts of Egypt is also taken into account. Thus, settlement sites in other regions are presented to provide contemporary evidence for living conditions in particular periods. As the book will focus on the lower classes, the Tributary Mode of Production will be used as the main theoretical framework. The Tributary Mode of Production, previously known as the Asiatic Mode of Production, is a term that goes back to Karl Marx but was mainly used in the 20th century to describe ancient societies whose economies were not based on slaves. A constant question will be the status of the working population: Were they slaves, serfs or free citizens? It will be argued that they were most often in a dependent position comparable to that of serfs, while there is little evidence for slavery. The numerous burials presented in the volume are important for highlighting the diversity of burials in the different periods. Many will be placed in special subchapters. Readers can skip these chapters when they prefer to concentrate on the main text.

**The Rise and Decline of Ancient Civilizations** Eka Avaliani, 2025-07-02 This book concerns the formation of ancient civilizations in the Near East and the central Mediterranean world. tomb scenes and messages to dead relatives      *The Netherworld in Ancient Egypt and China* Mu-chou Poo, 2023-11-16

Considering the striking similarities between the treatment of the dead and conceptions of the netherworld in ancient Egypt and China how can we compare the two traditions Mu chou Poo considers this question and provides a new perspective on archaeological materials including tomb structures and funerary texts by addressing them in the context of universal human problems such as death the future of the dead and the search for happiness in life Poo chronologically reconstructs the emergence of the idea of the netherworld and its evolution in both ancient Egypt and ancient China He explores the relationship between religious beliefs and social ethics in these civilizations considers why similar social and material conditions could have produced varied expressions of the afterlife and what such variations reveal about each culture Poo argues that a comparison between both visions of the netherworld and their relationship to life experience gives further insight into the nature of each civilization Through this analysis Poo shows that thematic comparison of ancient civilizations is not only possible but also relevant to modern society
