that constitutes America's musical declaration of independence from the European past. This volume opens with *The State of Music* 1939, the book that made Thomson's name as a critic and won him his 14-year stint at the New York Herald Tribune. This no-holds-barred polemic here presented in its revised edition of 1962 discusses the commissions, jobs, and other opportunities available to the American composer as a worker in a world of performance and broadcast institutions that today as much as in Thomson's time are dominated by tin-eared non-musical patrons of the arts who are shocked by the new and suspicious of native talent. Thomson's autobiography *Virgil Thomson* 1966 is more than just the story of the struggle of one such American composer; it is an intellectual, aesthetic, and personal chronicle of the twentieth century from World War I era Kansas City to Harvard in the age of straw boaters from Paris in the Twenties and Thirties to Manhattan in the Forties and after. A classic American memoir, it is marked by a buoyant wit, a true gift for verbal portrait making, and a cast of characters including Aaron Copland, Gertrude Stein, James Joyce, Paul Bowles, John Houseman, and Orson Welles. *American Music Since 1910* 1971 is a series of incisive essays on the lives and works of Ives, Ruggles, Varèse, Copland, Cage, and others who helped define a national musical idiom. *Music with Words* 1989, Thomson's final book, is a distillation of a subject he knew better than perhaps any other American composer: how to set English, especially American English, to music in opera and art song. The volume is rounded out by a judicious selection of Thomson's magazine journalism from 1957 to 1984, thirty-seven pieces, most of them previously uncollected, including many long-form review essays written for *The New York Review of Books*.

[What Killed the Great and Not So Great Composers?](#) Joseph W. Lewis, Jr., M.D., 2010-04-23. From a personally assembled database of 13,859 classical musicians, *What Killed the Great and Not So Great Composers* delves into the medical histories of a wide variety of composers from both a musical and medical standpoint. Biographies of musicians from Johann Sebastian Bach of the Baroque period to Benjamin Britten of the Modern era explore in depth their illnesses and the impact their diseases had on musical productivity. Other chapters, referenced to specific composers, are devoted to such diverse ailments as deafness, mental disorders, sexually transmitted diseases, surgery, and war injuries, to name a few. A unique section of statistics and demographics analyzes various aspects of composers' lives, such as their longevity related to contemporaneous non-musical populations, the incidence of various illnesses they experienced over the centuries, and the type of medical problems suffered by the so-called top 100 classical musicians. Although a precise and complete accounting of the great composers' ailments may never be possible, a general understanding of the medical problems experienced by these unique individuals nevertheless can heighten one's appreciation of their creative processes despite the hardships imposed by their physical and

mental illnesses Although some individuals surrendered to their disabilities for a variety of reasons others were able to rise above their infirmities and produce the wonderful music mankind has enjoyed through the centuries **Monthly Bulletin of the Carnegie Library of Pittsburgh** Carnegie Library of Pittsburgh,1927 Among Our Books Carnegie Library of Pittsburgh,1928
