George Smith's Money:

George Smith's Money ..., 1898 *George Smith's Money* Alice Elizabeth Smith, 1966 **An Elastic Currency; George Smith's Money in the Early Northwest: An Address to the American Bankers' Association at Chicago, October 19, 1893** (Classi Horace White, 2018-02-28 Excerpt from *An Elastic Currency George Smith's Money In the Early Northwest An Address to the American Bankers Association at Chicago October 19 1893* Nearly everybody who busies himself with the subject of finance says that we ought to have an elastic currency What is meant by that Evidently it means a currency that will expand when there is an active demand for it and contract when the demand subsides This suggests another query What do we mean by demand P The demand for money is nearly universal It is as great among the loafers around the City Hall as among the brokers on the Stock Exchange but when we speak of the demand for money we do not mean the demand of either beggars or speculators We mean the demand for money to carry on the exchange of the products of the country which move at certain periods and years in larger volume than at other periods and years We all agree that the currency ought to be elastic in the sense of being more abundant when the exchanges of goods are rapid and extensive and less abundant when the contrary condition exists How can we get this kind of a currency We cannot get it from the Government because the Government cannot know when the demand for money is increasing and when it is diminishing The Government has no commercial barometer All of its machinery is political The loafers around the City Hall have the same access to its ear as the merchants and the manufacturers Tammany Hall has a stronger pull on it than the Produce Exchange The advocates of a currency issued by the Government tacitly acknowledge these facts when they go in for a per capita currency They have no measure for the needs of the community except a count of heads They would not however apply this rule to the tribes of Central Africa Why not Because the business of Central Africa is not like our business So it appears that the kind of business should be taken account of as well as the number of people That is all that we contend for The Government has an infallible test for the numbers of the people because it can take the census But it has no test whatever for the state of business except such inferences as may be drawn from the collection of taxes I believe it has never been proposed to gauge the issuing of currency by the collections at the Custom House but that method would be much more philosophical than the per capita method About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works **An Elastic Currency** Horace White, 1893 **Money and Investments** Montgomery Rollins, 1924 **The History of Foreign Investment in the United States to 1914** Mira Wilkins, 1989 From the colonial

era to 1914 America was a debtor nation in international accounts owing more to foreigners than foreigners owed to us By 1914 it was the world s largest debtor nation Mira Wilkins provides the first complete history of foreign investment in the United States during that period The book shows why the United States was attractive to foreign investors and traces the changing role of foreign capital in the nation s development covering both portfolio and direct investment The immense new wave of foreign investment in the United States today and our return to the status of a debtor nation once again the world s largest debtor nation makes this strong exposition far more than just historically interesting Wilkins reviews foreign portfolio investments in government securities federal state and local and in corporate stocks and bonds as well as foreign direct investments in land and real estate manufacturing plants and even such service sector activities as accounting insurance banking and mortgage lending She finds that between 1776 and 1875 public sector securities principally federal and state securities drew in the most long term foreign investment whereas from 1875 to 1914 the private sector was the main attraction The construction of the American railroad system called on vast portfolio investments from abroad there was also sizable direct investment in mining cattle ranching the oil industry the chemical industry flour production and breweries as well as the production of rayon thread and even submarines In addition there were foreign stakes in making automobile and electrical and nonelectrical machinery America became the leading industrial country of the world at the very time when it was a debtor nation in world accounts
