Difficult Transitions Kurt M. Campbell,James B. Steinberg,2009-11-09 New presidents have no honeymoon when it comes to foreign policy Less than three months into his presidency for example John F Kennedy authorized the disastrous effort to overthrow Fidel Castro at the Bay of Pigs More recently George W Bush had been in office for less than eight months when he was faced with the attacks of September 11 How should an incoming president prepare for the foreign policy challenges that lie immediately ahead That s the question Kurt Campbell and James Steinberg tackle in this compelling book Drawing on their decades of government service in the corridors of Capitol Hill the intimate confines of the White House the State Department and the bare knuckles Pentagon bureaucracy Campbell and Steinberg identify the major foreign policy pitfalls that face a new presidential administration They explain clearly and concisely what it takes to get foreign policy right from the start The authors set the scene with a historical overview of presidential transitions and foreign policy including case studies of such prominent episodes as the Black Hawk Down tragedy in Somalia that shook the Clinton administration in its first year and the Bush administration s handling of the collision between a U S reconnaissance plane and a Chinese fighter jet in the spring of 2001 They pinpoint the leading causes of foreign policy fiascos including the tendency to write off the policies of the outgoing administration and the failure to appreciate the differences between campaign promises and policy realities Most important they provide a road map to help the new administration steer clear of

presidential leadership The presidency personifies government authority including moral authority In the first part of this book most of the essays argue that the moral authority of leaders depends on high personal standards as well as policy outcomes The second segment on the rule of law and character raises considerations not limited to the presidency Character and the authority that derives from it are demonstrated most effectively not by what someone does in his or her personal life but in the moral values of the causes espoused and effectiveness in pursuing them In the realm of international affairs governmental leadership must wrestle with the moral and constitutional guidelines known as reasons of state Under what circumstances is it morally acceptable for a leader or government to practice deception upon the citizenry to overthrow other governments to bomb civilians Many contributors raise the issue of what permits a government to take actions that would be immoral or illegal in individuals or groups The final segment expands and deepens this theme by exploring the work and role of non governmental agencies that influence both leaders and citizens in the public arena In short at a period that brings to a close a period in which the presidency has become more visible as well as more prominent this collective effort sheds new light on classic themes It will be an invaluable guide as we enter the new century The contributors include an illustrious galaxy of public officials and political scientists including Madeleine K Albright Judith A Best Betty Glad C Lowell Harriss Travis Beal Jacobs Ruth P Morgan Stanley A Renshon Donald L Robinson and William vanden Heuvel

President as Leader Michael E Siegel,2017-10-03 By analyzing the leadership skills of five recent American presidents this book seeks to de mystify the elements and dynamics of effective presidential leadership which our democracy has come to depend upon and value Building on the pioneering work of political scientist Fred Greenstein and others this book argues that leadership in the White House can be explained and assessed by using a consistent set of criteria
