The New Historical Dictionary of the American Film Industry Anthony Slide, 2014-02-25 The New Historical Dictionary of the American Film Industry is a completely revised and updated edition of Anthony Slide's *The American Film Industry* originally

published in 1986 and recipient of the American Library Association's Outstanding Reference Book award for that year. More than 200 new entries have been added and all original entries have been updated; each entry is followed by a short bibliography. As its predecessor, the new dictionary is unique in that it is not a who's who of the industry but rather a what's what: a dictionary of producing and releasing companies, technical innovations, industry terms, studios, genres, color systems, institutions, and organizations, etc. More than 800 entries include everything from Academy of Motion Pictures Arts and Sciences to Zoom Lens from Astoria Studios to Zoetrope. Outstanding Reference Source, American Library Association.

Fifty Contemporary Filmmakers Yvonne Tasker, 2002. From Luc Besson to Quentin Tarantino, *Fifty Contemporary Film* makers offers an up-to-date guide to the individuals who are shaping modern cinema. [Science Fiction Film Directors, 1895-1998](#) Dennis Fischer, 2011-12-14. This enormous and exhaustive reference book has entries on every major and minor director of science fiction films from the inception of cinema circa 1895 through 1998. For each director, there is a complete filmography including television work, a career summary, a critical assessment, and behind-the-scenes production information. Seventy-nine directors are covered in especially lengthy entries, and a short history of the science fiction film genre is also included. [The Empire of Effects](#) Julie A. Turnock, 2022-06-14. 2024 Finalist, Marshall McLuhan Outstanding Book Award, Media Ecology Association. How one company created the dominant aesthetic of digital realism. Just about every major film now comes to us with an assist from digital effects. The results are obvious in superhero fantasies; yet dramas like *Roma* also rely on computer-generated imagery to enhance the verisimilitude of scenes. But the realism of digital effects is not actually true to life. It is a realism invented by Hollywood by one company specifically, Industrial Light & Magic. *The Empire of Effects* shows how the effects company, known for the puppets and space battles of the original *Star Wars*, went on to develop the dominant aesthetic of digital realism. Julie A. Turnock finds that ILM borrowed its technique from the New Hollywood of the 1970s, incorporating lens flares, wobbly camerawork, haphazard framing, and other cinematography that called attention to the person behind the camera. In the context of digital imagery, however, these aesthetic strategies had the opposite effect: heightening the sense of realism by calling on tropes suggesting the authenticity to which viewers were accustomed. ILM's style on display in the most successful films of the 1980s and beyond was so convincing that other studios were forced to follow suit, and today ILM is a victim of its own success, having fostered a cinematic monoculture in which it is but one player among many.
