When Culture Overrides God and Reason S. N. Duru, 2012-12 For over two thousand years civilization has failed to live up to the expectations expounded by the Christian religion The last century alone saw two world wars a cold war and numerous other politically and racially motivated conflicts Where was Christianity amidst all that turmoil It was also believed that the end of colonial rule in Africa Asia and the Caribbean would usher in an era of peace and prosperity but the result has been decades of civil war genocide and corruption in those regions Author S N Duru theorizes that the cause of this leap frogging from crisis to crisis is that society has allowed culture to take precedence over faith and reason When Culture Overrides God and Reason addresses the issues that form the foundation of Duru's theory and provides a workable resolution for the nations of the world It is an impassioned call to action to correct civilization's current state of being

Whose Culture? James Cuno, 2012-05-23 The international controversy over who owns antiquities has pitted museums against archaeologists and source countries where ancient artifacts are found In his book Who Owns Antiquity James Cuno argued that antiquities are the cultural property of humankind not of the countries that lay exclusive claim to them Now in Whose Culture Cuno assembles preeminent museum directors curators and scholars to explain for themselves what's at stake in this struggle and why the museums critics couldn't be more wrong Source countries and archaeologists favor tough cultural property laws restricting the export of antiquities have fought for the return of artifacts from museums worldwide and claim the acquisition of undocumented antiquities encourages looting of archaeological sites In Whose Culture leading figures from universities and museums in the United States and Britain argue that modern nation states have at best a dubious connection with the ancient cultures they claim to represent and that archaeology has been misused by nationalistic identity politics They explain why exhibition is essential to responsible acquisitions why our shared art heritage trumps nationalist agendas why restrictive cultural property laws put antiquities at risk from unstable governments and more Defending the principles of art as the legacy of all humankind and museums as instruments of inquiry and tolerance Whose Culture brings reasoned argument to an issue that for too long has been distorted by politics and emotionalism In addition to the editor the contributors are Kwame Anthony Appiah Sir John Boardman Michael F Brown Derek Gillman Neil MacGregor John Henry Merryman Philippe de Montebello David I Owen and James C Y Watt

Moved to Tears Rebecca Bedell, 2018-11-13 In this volume Bedell examines received ideas about sentimental art Countering its association with trite and saccharine Victorian kitsch she argues that major American artists from John Trumbull and Charles Willson Peale in the eighteenth century and Asher Durand and Winslow Homer in the nineteenth to Henry Ossawa Tanner and Frank Lloyd Wright in the early twentieth produced what was understood in their time as sentimental art art intended to develop empathetic bonds and to express or elicit social affections including sympathy compassion nostalgia and patriotism

Communication and the Globalization of Culture Shaheed Nick Mohammed, 2011-09-16 Shaheed Nick Mohammed's Communication and the Globalization of Culture Beyond Tradition and Borders provides a unique perspective on the concept of culture and its fate in the globalized mediated environment Acknowledging widespread fears of cultural erosion at the hands of dominant global

forces Mohammed argues that what we understand as culture has always been the product of global forces including those of trade and exchange. Our very conceptions of culture are questioned. The sanctity of tradition, religion, and heritage the book suggests should give way to an appreciation of the quite mundane origins of cultural artifacts invented often as matters of political or social expedience adopted sometimes in accidents of history and canonized by time into the catechisms of cultural belief. Communication and the Globalization of Culture also suggests several mechanisms by which pragmatic social practices and fictional discourses make their way into the cultural beliefs and traditions of societies. Shaheed Nick Mohammed examines how the modern globalized environment gives rise to cultural practices that demonstrate cultural inventions, imagined communities, and manufactured cultural products suggesting that such inventions and imaginations are not uniquely modern but rather a continuation of cultural inventions that long pre-date our media globalized environment.

Culture Paves The New Silk Roads Sophia Kidd, 2022-03-01 This book approaches Silk Road studies from within the microcosm of China's Southwest avant garde arts sector in order to approach the macrocosm of China's cultural heritage and creative industry influence worldwide. While reading China's cultural hegemony and its attendant ideologies as shaping memory and history throughout New Silk Road regions, the book includes new regional research from within China's borders as well as throughout New Silk Road regions. With twenty years of experience in China, Sophia G. Kidd fills a void in discussions of the New Silk Roads (NSR) which fail to underscore the importance of the initiative's people-to-people component. Cultural diplomacy aids cooperation between New Silk Road Regions by reducing cultural discount of Chinese cultural exports, i.e. ideas and values, creating a shift of geo-cultural thinking to come. This book will prove illuminating for students of the arts and soft power in greater China. **Pictorial Cultures and Political Iconographies** Udo J.

Hebel, Christoph Wagner, 2011-06-30 The pictorial turn in the humanities and social sciences has foregrounded the political power of images and the extent to which historical, political, social, and cultural processes and practices are shaped visually. Political iconographies are taken to interpret norms of actions, support ideological formations, and enhance moral concepts. Visual rhetorics are understood as active players in the construction and contestation of the political realm and public space. The twenty-one articles by scholars from Europe and the United States explore the political function and cultural impact of images from the perspectives of Art History, American Studies, Visual Culture Studies, History, and Political Science. The contributions in particular address the complex interplay between agent and addressee in the public space as well as issues of national identity, discourses of inclusion and exclusion, and the designation of political spaces within transnational contexts. The publication is part of the interdisciplinary research initiative Perceiving and Understanding Functions, Perception Processes, Forms of Visualizations, Cultural Strategies of Pictures and Texts at the University of Regensburg. **American Masculinities: A Historical Encyclopedia** Bret Carroll, 2003-10-14 This is a highly recommended purchase for undergraduate, medium-sized, and large public libraries wishing to provide a substantial introduction to the field of men's
