## **Georgian Syntax A Study In Relational Grammar:**

Georgian Syntax Alice C. Harris, 1981-07-23 Georgian has sometimes been described as a language that is totally irregular where the notions of subject object and indirect object have no relevance Although it is often cited in work on general linguistics language universals and language typology no systematic account of the syntax of this morphologically complex language has been available for Western linguists Dr Harris's work fills this important need and indeed her book provides one of the best and most thorough studies available in English of the syntax of a non Indo European language Working in the framework of relational grammar a framework that is attracting great interest Dr Harris shows that Georgian does have constructions found in better known languages and the study of individual languages to the development of linguistic theory

**Studies in Relational Grammar 1** David M. Perlmutter, 1983 In this long awaited book the first in a three volume work David M Perlmutter has co authored and edited ten essays that introduce relational grammar a novel conception of sentence structure that offers far reaching conclusions for universal grammar The basic ideas of relational grammar can be simply stated First grammatical relations such as subject of direct object of and indirect object of are needed to characterize the class of grammatical constructions in the clausal syntax of natural languages to formulate universals of grammar and to construct adequate and insightful grammars of individual languages Second the range of linguistic variation in word order and case patterns makes it impossible to define grammatical relations in terms of phrase structure configurations or case Rather grammatical relations must be taken as primitive notions of linguistic theory The papers collected here take up the first of these ideas They lay out the basic theoretical constructs of relational grammar and discuss three areas of grammar advancement construction raising and clause union In his introduction Perlmutter discusses each of the papers most of which are published here for the first time and places them in the context of the whole of linguistic study

**The Syntax of the Albanian Verb Complex** Philip L. Hubbard, 2016-11-10 This work first published in 1985 is an analysis of the syntax of the Albanian verb complex The term verb complex is defined here as the verb stem and its conjugational endings together with the perfect auxiliaries and verb clitics In a wider sense the verb includes the verb and its central arguments subject direct object and indirect object The analysis is presented in a somewhat expanded version of the relational grammar framework of Perlmutter and Postal 1977 It is argued that by assuming the existence of multiple levels in the syntactic structure of a clause it is possible to account for the distribution of active and non active verb forms over the various constructions of Albanian with a single generalisation This title will be of interest to students of language and

This book is a collection of articles dealing with various aspects of grammatical relations and argument structure in the languages of Europe and North and Central Asia LENCA Topics covered with respect to individual languages are split intransitivity Basque causativization Agul transitives and causatives Korean and Japanese aspectual domain and quantification Finnish and Udmurt head marking principles Athabaskan languages and pragmatics Eastern Khanty and Xibe Typology of argument structure properties of give LENCA typology of agreement systems asymmetry in argument structure typology of the Amdo Sprachbund spatial realtors Northeastern Turkic core argument patterns languages of Northern California and typology of grammatical relations LENCA are the topics of articles based on cross linguistic data The broad empirical sweep and the fine tuned theoretical analysis highlight the central role of argument structure and grammatical relations with respect to a plethora of linguistic phenomena

**Cross-linguistic Influences in Multilingual Language Acquisition** Danuta Gabrys-Barker,2012-05-22 This volume depicts the phenomenon of cross linguistic influences in the specific context of multilingual language acquisition It consists of articles on various issues relating to the syntactic and lexical development of foreign language learners from different L1 backgrounds in many cases involving languages which are typologically distant from English such as Russian Croatian Greek and Portuguese Individual chapters highlight different areas expected to be especially transfer prone at the level of grammatical and lexical transfer in particular contexts of language contact

*Expressivity in European Languages* Jeffrey P. Williams,2023-09-07 There is an emerging perspective in the discipline of linguistics that takes expressivity as one of the key components of human communication and grammatical structure Expressivity refers to the use of grammar in natural languages to convey sensory information in a creative way for example through reduplication iconicity ideophones and onomatopoeia Expressives are more commonly associated with non European languages so their presence in European languages has so far been under documented With contributions from a

team of leading scholars this pioneering book redresses that balance by providing copious detailed information about the expressive systems of a set of European languages It comprises a collection of original surveys of expressivity in languages as diverse as Hungarian Finnish Turkish Scots German Greek Italian Catalan Breton and Basque all with the common goal of challenging structuralist assumptions about the role of syntax and showing how expressivity is both typologically diverse and universal

**The Oxford Handbook of Ergativity** Jessica Coon,Diane Massam,Lisa deMena Travis,2017-07-13 This volume offers theoretical and descriptive perspectives on the issues pertaining to ergativity a grammatical patterning whereby direct objects are in some way treated like intransitive subjects to the exclusion of transitive subjects This pattern differs markedly from nominative accusative marking whereby transitive and intransitive subjects are treated as one grammatical class to the exclusion of direct objects While ergativity is sometimes referred to as a typological characteristic of languages research on the phenomenon has shown that languages do not fall clearly into one category or the other and that ergative characteristics are not consistent across languages Chapters in this volume look at approaches to ergativity within generative typological and functional paradigms as well as approaches to the core morphosyntactic building blocks of an ergative construction related constructions such as the anti passive related properties such as split ergativity and word order and extensions and permutations of ergativity including nominalizations and voice systems The volume also includes results from experimental investigations of ergativity a relatively new area of research A wide variety of languages are represented both in the theoretical chapters and in the 16 case studies that are more descriptive in nature attesting to both the pervasiveness and diversity of ergative patterns

*Studies in Comparative Germanic Syntax* Höskuldur Thráinsson, Samuel David Epstein, Steve Peter, 2001-11-30 O THE CONTENTS OF THIS VOLUME AND THE FIELD OF COMPARATIVE GERMANIC SYNTAX Comparative synchronic and diachronic syntax has become an increasingly popular and fruitful research area over the past 10 15 years A central reason for this is that recent developments in linguistic theory have made it possible to formulate explicit and testable hypotheses concerning syntactic universals and cross linguistic variation Here we refer to the so called Principles and Parameters approach see Chomsky 1981a 1982 1986a and also Williams 1987 Freidin 1991 Chomsky and Lasnik 1993 and references cited in these works It may even be fair to say that the Government Binding framework first outlined by Chomsky 1981b a specific instantiation of the Principles and Parameters approach has been more influential than any other theoretical syntactic framework Since 1984 syntacticians investigating the formal properties of Germanic languages have as an international effort organized workshops on comparative Germanic syntax The first was held at the University of Trondheim in Trondheim Norway 1984 the second at the University of Iceland in Reykjavik Iceland 1985 the third at the University of Åbo in Åbo Finland 1986 the fourth at McGill University Montreal Canada 1987 the fifth in Groningen The Netherlands 1988 the sixth in Lund Sweden 1989 the seventh in Stuttgart Germany 1991 the eighth in Troms Norway 1992 the ninth at Harvard University Cambridge USA 1994 the tenth at the Catholic University in Brussels Belgium

1995 and the eleventh at Rutgers University New Brunswick USA 1995      **Historical Syntax in Cross-Linguistic Perspective** Alice C. Harris,Lyle Campbell,1995-09-21 In this major new work Alice Harris and Lyle Campbell set out to establish a general framework for the investigation of linguistic change Systematic cross linguistic comparison of syntactic change across a wide variety of languages is used to construct hypotheses about the universals and limits of language change more generally In particular the authors seek to move closer towards describing the range of causes of syntactic change to develop an understanding of the mechanisms of syntactic change and to provide an understanding of why some languages undergo certain changes and not others The authors draw on languages as diverse as Pipil and French Georgian and Estonian and the data presented is one of the book s great strengths Rigor and precision are combined here with a great breadth of scholarship to produce a unique resource for the study of linguistic change which will be of use to scholars and students alike      **The Typology of Semantic Alignment** Mark Donohue,Søren Wichmann,2008-01-24 Semantic alignment refers to a type of language that has two means of morphosyntactically encoding the arguments of intransitive predicates typically treating these as an agent or as a patient of a transitive predicate or else by a means of a treatment that varies according to lexical aspect This collection of new typological and case studies is the first book length investigation of semantically aligned languages for three decades Leading international typologists explore the differences and commonalities of languages with semantic alignment systems and compare the structure of these languages to languages without them They look at how such systems arise or disappear and provide areal overviews of Eurasia the Americas and the south west Pacific the areas where semantically aligned languages are concentrated This book will interest typological and historical linguists at graduate level and above      **Case** Barry J. Blake,2001-09-20 A new textbook on the ways languages mark the relations between words in sentences suffixes prepositions etc Copyright Libri GmbH All rights reserved      **Ergativity** Robert M. W. Dixon,1994-06-02 Although there is only one ergative language in Europe Basque perhaps one quarter of the world s languages show ergative properties and pose considerable difficulties for many current linguistic theories R M W Dixon here provides a full survey of the various types of ergativity looking at the ways they interrelate their semantic bases and their role in the organisation of discourse Ergativity stems from R M W Dixon s long standing interest in the topic and in particular from his seminal 1979 paper in Language It includes a rich collection of data from a large number of the world s languages Comprehensive clear and insightful it will be the standard point of reference for all those interested in the topic

**Passive and Voice** Masayoshi Shibatani,1988-01-01 This volume brings together 18 original papers dealing with voice related phenomena The languages dealt with represent both typological and geographic diversity ranging from accusative type languages to ergative type and Philippine type languages and from Australia to Africa and Siberia The studies presented here open up many possibilities for theorizing and offer data inviting formal treatments but the most important contribution they make is in terms of the insights they offer for a better understanding of the fundamentals of voice phenomena

**Linguists of Tomorrow** Kleanthes K. Grohmann, Aljona Shelkovaya, 2012-04-25 This volume is a selection of papers presented at Linguists of Tomorrow the 1st Cyprus Postgraduate Conference in Theoretical and Applied Linguistics held at the University of Cyprus on 7 & 8 May 2010. The collection includes nine chapters by postgraduate students of linguistics as well as two illustrious keynote papers by Prof Barbara Lust and Prof Thomas McFadden. The topics range from theoretical linguistics syntax semantics morphology and phonology to psycholinguistics first and second language acquisition language impairments and language processing and applied linguistics bilingualism dictionaries writing and ethnolinguistics. As such this collection of papers by established as well as up and coming researchers will appeal to a wide range of scholars students and academics alike interested in current issues in linguistics.

**Current Trends in Caucasian, East European, and Inner Asian Linguistics** Howard Isaac Aronson, Dee Ann Holisky, Kevin Tuite, 2003 This volume is a collection of seventeen papers on languages of all three indigenous Caucasian families as well as other languages spoken in the territory of the former Soviet Union. Several papers are concerned with diachronic questions either within individual families or at deeper time depths. Some authors utilize their field data to address problems of general linguistic interest such as reflexivization. A number of papers look at the evidence for contact induced change in multilingual areas. Some of the most exciting contributions to the collection represent significant advances in the reconstruction of the prehistory of such understudied language families as Northeast Caucasian Tungusic and the baffling isolate Ket. This book will be of interest not only to specialists in the indigenous languages of the former USSR but also to historical and synchronic linguists seeking to familiarize themselves with the fascinating typologically diverse languages from the interior of the Eurasian continent. Dee Ann Holisky is Professor of English and Linguistics and Associate Dean for Academic Programs of the College of Arts.

Montreal Editions Fides 2003    **Linguistic Diversity and Language Theories** Zygmunt Frajzyngier, Adam Hodges, David S. Rood, 2005-01-01 From the refinement of general methodology to new insights of synchronic and diachronic universals to studies of specific phenomena this collection demonstrates the crucial role that language data play in the evolution of useful accurate linguistic theories. Issues addressed include the determination of meaning in typological studies a refined understanding of diachronic processes by including intentional social statistical and level determined phenomena the reconsideration of categories such as sentence evidential or adposition and structures such as compounds or polysynthesis the tension between formal simplicity and functional clarity the inclusion of unusual systems in theoretical debates and fresh approaches to Chinese classifiers possession in Oceanic languages and English aspect. This is a careful selection of papers presented at the International Symposium on Linguistic Diversity and Language Theories in Boulder Colorado. The purpose of the Symposium was to confront fundamental issues in language structure and change with the rich variation of forms and functions observed across languages.
