The book captures the beauty and rich natural history of Georgia's biological and geological treasures inspiring leisure travelers nature enthusiasts and art lovers to explore these places on their own Provided by publisher *Life Traces of the Georgia Coast* Anthony J. Martin, 2013 Have you ever wondered what left behind those prints and tracks on the seashore or what made those marks or dug those holes in the dunes *Life Traces of the Georgia Coast* is an up close look at these traces of life and the animals and plants that made them It tells about how the tracemakers lived and how they interacted with their environments This is a book about ichnology the study of such traces and a wonderful way to learn about the behavior of organisms living and long extinct *Life Traces* presents an overview of the traces left by modern animals and plants in this biologically rich region shows how life traces relate to the environments natural history and behaviors of their tracemakers and applies that knowledge toward a better understanding of the fossilized traces that ancient life left in the geologic record Augmented by illustrations of traces made by both ancient and modern organisms the book shows how ancient trace fossils directly relate to modern traces and tracemakers among them insects grasses crabs shorebirds alligators and sea turtles The result is an aesthetically appealing and scientifically grounded book that will serve as source both for scientists and for anyone interested in the natural history of the Georgia coast *Coastal Nature, Coastal Culture* Paul S. Sutter, Paul M. Pressly, 2018-07-15 One of the unique features of the Georgia coast today is its thorough conservation At first glance it seems to be a place where nature reigns But another distinctive feature of the coast is its deep and diverse human history Indeed few places that seem so natural hide so much human history In *Coastal Nature Coastal Culture* editors Paul S Sutter and Paul M Pressly have brought together work from leading historians as well as environmental writers and activists that explores how nature and culture have coexisted and interacted across five millennia of human history along the Georgia coast as well as how those interactions have shaped the coast as we know it today The essays in this volume examine how successive communities of Native Americans Spanish missionaries British imperialists and settlers planters enslaved Africans lumbermen pulp and paper industrialists vacationing northerners Gullah Geechee nature writers environmental activists and many others developed distinctive relationships with the environment and produced well defined coastal landscapes Together these histories suggest that contemporary efforts to preserve and protect the Georgia coast must be as respectful of the rich and multifaceted history of the coast as they are of natural landscapes many of them restored that now define so much of the region Contributors William Boyd S Max Edelson Edda L Fields Black Christopher J Manganiello Tiya Miles Janisse Ray Mart A Stewart Drew A Swanson David Hurst Thomas and Albert G Way *Tracking the Golden Isles* Anthony J.
