**presentations: Plenary**, 1975 **History of Geoscience** W. Mayer, R.M. Clary, L.F. Azuela, T.S. Mota, S. Wołkowicz, 2017-06-06 The study of the Earth's origin, its composition, the processes that changed and shaped it over time, and the fossils preserved in rocks have occupied enquiring minds from ancient times. The contributions in this volume trace the history of ideas and the research of scholars in a wide range of geological disciplines that have paved the way to our present-day understanding and knowledge of the physical nature of our planet and the diversity of life that inhabited it. To mark the 50th anniversary of the founding of the International Commission on the History of Geology (INHIGEO), the book features contributions that give insights into its establishment and progress. In other sections, authors reflect on the value of studying the history of the geosciences and provide accounts of early investigations in fields as diverse as tectonics, volcanology, geomorphology, vertebrate palaeontology, and petroleum geology. Other papers discuss the establishment of geological surveys, the contribution of women to geology, and biographical sketches of noted scholars in various fields of geoscience.

Johnson, 2018-07-26 Women have been a part of the story of geology from the beginning, but they have struggled to gain professional opportunities, equal pay, and respect as scientists for decades. Some have been dismissed, some have been forced to work without pay, and some have been denied credit. This volume highlights the progress of women in geology, including past struggles and how remarkable individuals were able to overcome them. Current efforts to draw positive attention and perceptions to women in the science and recruitment and mentorship efforts to attract and retain the next generation of women in geology. Chapters include the first American women researchers in Antarctica, a survey of Hollywood disaster movies and the casting of women as geologists, social media campaigns such as 365ScienceSelfies, and the stories of the Association for Women Geoscientists and the Earth Science Women's Network and their work to support and mentor women in geology.
