The Power of Numbers Schrödinger, Stilovsky, 2019-10-09 In today's world the use of numbers grows by the day and we depend on them for so much. This book contains a series of lists that contain information about numbers and their use in society. They will be most useful to those with a quizzical nature but should be of general interest to all. Schrödinger's cat was an infamous and cruel thought experiment dreamt up in the last century to expose one of the mistaken ideas current in science at that time. Since escaping from the box, Felix has taken up writing and in collaboration with retired water engineer Pyotr Stilovsky he has compiled this factual compendium.

International Heritage Law for Communities Lucas Lixinski, 2019-05-30 This book critically engages the shortcomings of the field of international heritage law seen through the lenses of the five major UNESCO treaties for the safeguarding of different types of heritage. It argues that these five treaties have effectively prevented local communities who bear the brunt of the costs associated with international heritage protection from having a say in how their heritage is managed. The exclusion of local communities often alienates them not only from international decision-making processes but also from their cultural heritage itself, ultimately meaning that systems put in place for the protection of cultural heritage contribute to its disappearance in the long term. *International Heritage Law for Communities* adds to existing literature by looking at these UNESCO treaties not as isolated regimes but rather as belonging to a discursive continuum on cultural heritage. In doing so, the book focuses on themes that cut across the relevant UNESCO regimes like the use of expert rule in international heritage law, economics, the relationship between heritage and the environment, among others, rather than the regimes themselves. It uses this mechanism to highlight the blind spots and unintended consequences of UNESCO treaties and how choices made in their drafting have continuing and potentially negative impacts on how we think about and safeguard heritage.

Pharmacology of Fluorides Frank A. Smith, 2013-11-27

This volume is the completion of work initially planned several years ago as a compilation of selected aspects of the biological effects of fluorides. The first portion appeared in Volume XXII 1966 of this Handbuch under the title *Pharmacology of Fluorides Part 1*. Inasmuch as the present volume is an integral part of the original project, justification for offering it to the scientific community remains the same as that originally set forth. This may be recapitulated as follows: The tremendous increase in the annual production of fluorides over the amounts produced thirty years ago, together with the increased diversity of their uses, has correspondingly increased the hazard associated with these materials. That is to say, the possibilities of encountering their characteristic toxic effects under the conditions of their use has increased because the variety, amounts, and ways of usage have increased. Their inherent toxicity, of course, has not changed, but the increased

hazard has led to a vast increase in the amount and scope of research reported It is the purpose of these volumes to review selected aspects of this literature Rochester N Y February 1970 FRANK A SMITH Acknowledgements Even the casual reader of this volume will soon realize that contributing authors as well as those contributing to its predecessor Volume XX I have made good use of tables of data figures and pertinent quotations from previously published work *European Sculpture of the Nineteenth Century* National Gallery of Art (U.S.),2000 The National Gallery s collection of nineteenth century European sculpture is dominated by 37 works by Auguste Rodin and more than 30 portrait busts by Honore Daumier Works by Antoine Louis Barye Jean Baptiste Carpeaux Paul Gauguin Theodore Gericault and others are examined All works have been newly photographed highlighting the masterly execution of the marbles and the rich patinas of bronzes Publisher description
