Geriatric Medicine Early Policy And Practice In Western Australia:

Old Age in Australia Pat Jalland, 2015-01-05 The Australian population is rapidly getting older demanding important policy and service decisions This groundbreaking book is the first to explore a 100 year history of older people in Australia from 1880 to 1980 Over that period the aged suffered as forgotten people until 1945 when there was the promise of a new deal for the elderly Major themes examined include family histories of aged care poverty social and medical policy gender the impact of wars and economic depression housing nursing homes and the retirement debates Old Age in Australia provides essential historical context for current discussions about the implications of ageing in Australia *Geriatric Medicine* R. B. Lefroy, 2005 In 1963 the Western Australian Public Health Department decided it was time to introduce a geriatric service to Western Australia The Evolution of Geriatric Medicine is a fascinating chronicle of the early days of this service from its small beginning in one of the state s two so called benevolent homes these the relics of the asylum era when custodial care was the accepted solution to the health and social problems of old age The author s sensitively written account describes how rehabilitation provision of home care and attention to people needing residential care became the basic principles of a geriatric service in Western Australia Assessment of social and medical needs of elderly people was deemed paramount in deciding the most appropriate kind and level of care People in country centers at last had a choice of remaining at home rather than being transferred to Perth Hostels including ones catering for people with mild dementia were another aspect of aged care that was to receive attention The author also describes how geriatric medicine became a recognized area of study for medical undergraduates and a specialty within medicine as well as gaining an accepted role in acute hospitals today
