Handbook of Clinical Behavior Therapy with the Elderly Client Patricia A. Wisocki, 1991-04-30 Although we speak of the elderly as if there were one body of people with common characteristics older adults are more heterogeneous than any other population People over the age of 65 are also the fastest growing segment of the population in the United States currently numbering 25 million The majority of older adults reside in their communities a small fraction of them are cared for in institutions Most may expect to experience some kind of physical impairment Approximately a quarter of the population may expect to suffer a mental health impairment While traditional therapies have not been especially effective for older adults behavior therapy has shown exceptional promise as a treatment modality This book presents a comprehensive explication of the relatively new field of behavioral gerontology It was written for the clinician interested in the interaction of medical environmental and psychological variables and their effects on treatment of elderly clients and for the researcher who will be looking to extend knowledge about interventions with this population It will be useful for the graduate student in clinical psychology as well as the experienced clinician who will want to include the elderly in his or her therapeutic population

Readings in Psychotherapy with Older People Steven Steury, Marie L. Blank, 1977 **Comprehensive Handbook of Psychotherapy Integration** George Stricker, Jerold R. Gold, 2013-06-29 This Handbook is the culmination of an interest in psychotherapy integration that led to our first professional collaboration in 1978 At that time we undertook in research conducted for a doctoral dissertation by the second editor and supervised by the senior editor to understand from and within a psychodynamic perspective the experiences of patients who had completed behavioral therapies At that time psychotherapy integration was a topic considered viable and interesting by only a few clinicians and scholars with little communication among them and less awareness concern and appreciation on the part of psychotherapists in general The situation today has changed The appearance of this Handbook may be taken as a significant sign of maturation and legitimacy of work in psychotherapy integration It is our hope and expectation that this volume will serve as an up to date and exhaustive overview of the status of ongoing scholarly and clinical work in the integration of the major schools of psychotherapy The Handbook opens with a section that will provide the reader with an overview of the history sociocultural context and empirical status of

the broad field of psycho therapy integration **Strategies for Therapy with the Elderly** Claire Brody,Vicki Semel,2005-09-27 Newly revised and updated In this second edition Brody and Semel contend that meaningful and successful therapy can be accomplished with an aging population debunking the belief that the elderly can not pick up or put into practice newly acquired information Rather the way in which therapy with aging adults is approached may affect the way in which the therapist initially experiences and reacts to the client because of stereotypes about aging This book encompasses three major areas of work with elderly clients aged 60 years and older Living in nursing homes Living in assisted living housing while participating in community oriented activities for the aged Living independently and being seen in private practice It comprises a variety of approaches ranging from eclectic small group formats for nursing home residents group and individual counseling in assisted living settings and home care for the elderly to psychoanalytic therapy techniques in private practice Illustrative case examples used throughout the book bring to life successful strategies and interventions New areas of focus include Treatment of stress and mental disorders Alzheimer s disease Caregiving issues at home Expanded information on Medicare coverage issues **Geriatric Psychiatry** Ana Hategan,James A.
