National Library of Medicine (U.S.)

Geriatric Surgery Comprehensive Care Of The Elderly Patient:

Geriatric Surgery Mark R. Katlic,1990-01-01 Surgical Decision Making in Geriatrics Rifat Latifi,2020-08-12 This book is designed to present a comprehensive and state of the art approach to all aspects of geriatric surgery within the broad confines of surgery in geriatrics including general surgery neurosurgery thoracic surgery vascular surgery cardiac surgery surgical oncology hepatobiliary and transplant surgery plastic colorectal orthopedic gynecologic and urologic surgery The text is split into four parts The first part is organized under general considerations on the geriatric surgical patient and includes current trends in geriatric surgery and a number of important general issues such as practical approaches to reversal of bleeding anticoagulation role of anesthetic concerns in advanced age frailty index and measurements of physiological reserves nutritional support in the elderly quality of life in the elderly drug use and family involvement Part two of the book focuses on surgery specific system based problems in geriatric surgical patients The third part addresses many other important aspects of geriatric surgery including palliative and end of life care for the elderly religious issues and the elderly care surgery elderly with mental health issues and nursing care of elderly patients The fourth and final part describes the need for geriatric surgical care education and the components that are essential for the curriculum of current and future generations of students Written by experts in the field Surgical Decision Making in Geriatrics addresses patient selection pre operative considerations technical conduct of the most common operations and avoiding complications **Principles and Practice of Geriatric Surgery** Ronnie Ann Rosenthal,Michael E. Zenilman,Mark R. Katlic,2011-07-12 In the preface to this impressive and well produced book the editors state that their aim is not to describe a new surgical specialty since most surgeons will soon need to be geriatric surgeons but to assemble a comprehensive account that will allow all providers of healthcare to the elderly to understand the issues involved in choosing surgery as a treatment option for their patients This is a useful book that deserves to do well I hope that the editors and their publisher will have the stamina to make this the first of several editions as it is clear that updated information about surgery in the elderly will be required to keep pace with this important field NEJM Book Review Geriatric Anesthesiology Jeffrey Silverstein,Alec Rooke,J. G. Reves,Charles H. McLeskey,2008-04-16 Geriatric anesthesia is a rapidly growing and evolving field and this is the major revision of a classic anesthesia reference The last few years have seen significant advancements and important new modalities for addressing the needs of an aging population The editors of this second edition are uniquely situated to put together a text highlighting both essential knowledge and recent breakthroughs of importance to all who work with the elderly This edition easily maintains the high standard for quality scholarship and useful material set by the first **Cardiothoracic Surgery in the Elderly** Mark R. Katlic,2011-05-04 Cardiothoracic Surgery in the Elderly Evidence Based Practice is an important and timely book that reflects the thoughtful work of pioneers in geriatric surgery It encompasses their knowledge related to geriatric surgery and their reflections and guidance on the rapidly accumulating knowledge related to improving the health and surgical care

of seniors This book provides a scholarly review of the constantly expanding knowledge base about cardiovascular and thoracic surgery in seniors The book follows a logical sequence covering general aspects of care cardiac surgery and thoracic surgery Chapters are focused on common devastating and often missed complications of surgical care in the seniors These include delirium depression pressure sores functional losses incontinence volume depletion and asymptomatic or atypical complications myocardial infarction post operative diarrhea urinary tract infections and pneumonia Each is expertly reviewed Strategies to help the surgeons and the surgical team anticipate recognize and effectively prevent or manage such problems are discussed and the evidence basis for such strategies is provided Cardiothoracic Surgery in the Elderly Evidence Based Practice is particularly timely and the first to review the substantial body of knowledge that has been developed in recent years related to geriatric cardiothoracic surgical problems It catalogs well the expanding knowledge basis for achieving successful surgical outcomes in the very old It provides a most useful resources for cardiovascular thoracic surgeons in training and those already in practice

Geriatric Urology Tomas Lindor Griebeling, 2014-05-02 Geriatric Urology outlines important topics in the care of elderly urology patients The first section covers the biology of aging the genitourinary system and disease screening including urologic conditions serving as warning signs of other disorders Section two covers geriatric syndromes and urology including frailty polypharmacy dementia wound healing osteoporosis and endocrinology Urologic conditions in older adults are explored in detail including urinary incontinence pelvic organ prolapse urinary tract infection nocturia and benign prostate diseases Other topics covered include obtaining informed consent development of advance directives palliative medicine and care of the dying patient Geriatric Urology is of great value to urologists geriatricians internists residents and family practitioners

Principles and Practice of Geriatric Surgery Ronnie A. Rosenthal, 2001 Principles and Practice of Geriatric Surgery presents the fundamentals of surgical care for the fastest growing segment of the US population providing a vital integration of operative strategies with the physiological changes of aging Among the topics covered are the endocrine system otolaryngology respiratory system cardiovascular system GI system hepatobiliary system urogenital system soft tissue and musculoskeletal system neurosurgery and transplantation

Topics in Palliative Care Russell K. Portenoy, Eduardo Bruera, 1997

Perioperative Care of the Elderly Patient Sheila Ryan Barnett, Sara E. Neves, 2018-01-11 Older patients carry some of the highest risks of suffering an adverse event or death following anesthesia and surgery They are inherently vulnerable presenting with numerous comorbidities and reduced physiological reserve requiring geriatric centric perioperative care for everything from routine eye surgery to major cardiac surgeries Dementia frailty and the need for palliative care and pain management for the orthopedic patient are important areas requiring special consideration in this group This book provides a general overview of these topics for those healthcare providers who may not have extensive knowledge of this patient population while at the same time offering practical tips for the more experienced clinician Chapters cover the spectrum of perioperative care including preoperative management of

comorbid conditions intraoperative anesthetic management postoperative pain control and a primer on advanced directive discussions This book is appropriate not only for anesthesiologists but for any perioperative physician caring for the older patient National Library of Medicine Current Catalog National Library of Medicine (U.S.),1991 *Geriatric Surgery and Perioperative Care* Gabriella Bettelli,Riccardo A Audisio,2024-11-19 *Geriatric Surgery and Perioperative Care* presents clear evidence to support regulatory and financial decisions in the light of the value based care principles The book outlines standards of care for elderly patients undergoing surgery as well as minimal requirements for modern management aimed at delivering cost effective healthcare It opens with the epidemiology and patho physiological changes of aging and their impact on anesthesia and surgery Subsequent chapters guide readers through the surgical process addressing preoperative optimization intraoperative procedures and management and postoperative principles including ICU care The book concludes with ethical principles care models and hospital design to support a golden silver surgery using a team based approach This title is an important resource for healthcare professionals practitioners and others pursuing current strategies and methods for successful perioperative care of the elderly Presents clear evidence to support regulatory and financial decisions in the light of the value based care principles Provides a synthesis of optimal evidence based methods to support and treat geriatric surgical patients through all stages of the clinical path Outlines ethical principles and care models for managing all aspects of geriatric anesthesia and surgery Covers details on aging processes pathophysiological changes induced by aging and effective preventive strategies to improve clinical outcome and reduce costs Van Nostrand's Scientific Encyclopedia Douglas M. Considine,Glenn D. Considine,2013-12-11 Advancements in science and engineering have occurred at a surprisingly rapid pace since the release of the seventh edition of this encyclopedia Large portions of the reference have required comprehensive rewriting and new illustrations Scores of new topics have been included to create this thoroughly updated eighth edition The appearance of this new edition in 1994 marks the continuation of a tradition commenced well over a half century ago in 1938 Van Nostrand s Scientific Encyclopedia First Edition was published and welcomed by educators worldwide at a time when what we know today as modern science was just getting underway The early encyclopedia was well received by students and educators alike during a critical time span when science became established as a major factor in shaping the progress and economy of individual nations and at the global level A vital need existed for a permanent science reference that could be updated periodically and made conveniently available to audiences that numbered in the millions The pioneering VNSE met these criteria and continues today as a reliable technical information source for making private and public decisions that present a backdrop of technical alternatives Mastering Geriatric Surgery Kok-Yang Tan,Daniel Jin-Keat Lee,Priscilla Ng,2025-09-30 The book provides current principles and practices for integrating geriatric management with surgical and perioperative care The book discusses the science of aging and how this impacts surgery and surgical considerations It focuses on the concepts of frailty and sarcopenia accompanying surgical patients It

also provides insights into the optimal model of care for surgical patients with reduced functional reserves and specific considerations on what should be considered optimal outcomes and how to achieve them With rapidly aging populations surgical and perioperative care teams are presented with patients of increasing median ages The chapters cover current surgical practice incorporating management of geriatric issues for holistic and effective surgical care where value is captured by the patient and explain how to deal not only with the pathology of the surgical issues but also with the aging person within which the surgical pathology resides Each chapter provides helpful take home messages The book is written by experienced surgeons physicians anesthetists oncologists nursing and allied health professionals This book is beneficial for surgeons surgical trainees perioperative physicians trainees of anesthesia geriatric medicine and perioperative medicine

Current Catalog National Library of Medicine (U.S.),1991 First multi year cumulation covers six years 1965 70

Intramural Annual Report National Institute on Aging,1990 The Frail Surgical Patient Virginia Boccardi,Luigi Marano,2025-01-27 This book explores the transdisciplinary approach to general surgery for the frail patient promoting the use of a geriatric model of care in general surgical settings and thus proposing a gerosurgery approach in frail persons beyond chronological age Aging frailty and surgical needs are increasing dramatically worldwide while surgeons are daily facing with the trouble of the trade off between short term outcomes and efficacy of surgery in older persons However recent studies have clearly shown that age itself is not a prognostic risk factor for complications after elective surgery in older patients whereas cognitive or functional frailty is Neither a referring physician nor an assessing surgeon should deny patients surgery purely based on chronological age Instead decisions should be based on a CGA comprehensive geriatric assessment with a precise picture of the patient considering the cognitive functional nutritional socioeconomic and affective status Recent studies examining the use of preparative CGA in surgical patients showed encouraging results on postoperative outcomes in old and or frail patients The most compelling current evidence comes from the orthopaedic community which has embraced the idea of multidisciplinary team care Preoperative evaluation postoperative care pain control nutritional support delirium prevention mobilization and rehabilitation are necessary also in general surgery An expert multidisciplinary team including geriatricians anaesthesiologists specialist nurses physiotherapists and nutritionists should mandatorily support surgeons With this book the reader will have an exhaustive overview and will gain essential practical knowledge on how best to manage the surgical and frail patient and how to develop clinical systems that do so reliably **Perioperative Care of the Elderly** Gabriella Bettelli,2017-11-16 This innovative comprehensive book covers the key elements of perioperative management of older patients The book s chapter structure coincides with the clinical path patients tread during their treatment from preoperative evaluation to post hospital care Epidemiological aspects and aging processes are illustrated providing keys to understanding the quick expansion of geriatric surgery and defining the clinical profile of older surgical patients in a cybernetic perspective Preoperative evaluation and preparation for surgery including medication

reconciliation and pre habilitation are developed in the light of supporting decision making about surgery in an evidence based and patient focused way Intra and postoperative management are discussed aiming to tailor anesthetic surgical and nursing approaches to specific patients needs in order to prevent both general and age related complications This volume also addresses issues relevant to geriatric surgery from different organizational models to clinical risk management and systems engineering applied to hospital organization

Considerations for Diagnosing and Managing Asthma in the Elderly, 1996

Post-Operative Neuropsychiatric Disorder Chun Yang, Yiyang Zhang, Jie Sun, Yasushi Satoh, Diansan Su, 2024-03-08

Post operative neuropsychiatric disorder POND is a series of neuropsychiatric symptoms strongly linked to the triggering factors anesthesia and surgery exposure The clinical manifestations mainly include delirium cognitive dysfunction and affective disorders after surgeries POND is the most frequent postoperative complication in elderly patients especially those undergoing major surgery such as cardiac and hip surgeries It has been well recognized that oxidative stress abnormal changes in neurotransmitters and synapses as well as A deposition and phosphorylation of tau protein are probably involved in the mechanisms of POND Although studies on the POND are in full swing underlying pathogenesis is still ambiguous because of conflicting results and controversial evidence Currently patients with POND still fail to receive effective treatments although clinical studies in this field have focused on these potential therapeutic targets in the last decades Most importantly more than 320 million people are scheduled to undergo surgeries every year globally it is therefore an urgent need to develop and provide effective therapeutic strategies for patients with POND

Mental Health Services Bruce Lubotsky Levin, John Petrila, 1996 As efforts to develop a more unified national mental health policy continue a public health framework within which to examine this process is necessary This uniquely multidisciplinary work integrates knowledge derived from epidemiologic treatment and service systems research to develop such a framework It provides the basic critical elements for understanding the organization financing and delivery of mental health services The text also addresses the delivery of mental health services to individuals from ethnic and racial minorities and discusses the role of consumers and advocates in mental health service systems In addition it examines epidemiologic treatment and service delivery issues in three undeserved at risk populations children and adolescents the elderly and adult substance abusers Written by national experts in the field this timely work will provide policymakers administrators graduate students and service providers with the knowledge base needed to implement improvements and changes in mental health service systems
