**The Fight Against Germs** Josepha Sherman, Margaux Baum, 2016-07-15 From the dawn of history, individuals and civilizations have battled disease. The struggle shifted once epidemiologists, medical professionals, and other specialists identified the microscopic organisms often to blame for much of humanity's illnesses over time. This book examines both the history of battling disease and the ever-shifting frontlines of the modern struggle against germs, as well as possible future developments. From cutting-edge medical treatments to common sense measures to prevent and address the insidious effects of germs, measures that have changed remarkably little through the centuries, this work documents how the fight against germs helps the human race to survive and thrive.

*The New Killer Diseases* Elinor Levy, Mark Fischetti, 2007-12-18 Protect yourself and your family from the threat of emerging diseases with a detailed gripping exploration of the dangerous microbes we're up against from a respected immunologist and veteran science author with a new Epilogue by the authors. Levy and Fischetti excel at describing the sleuthing and science that helped to break the code on emerging infections. *Los Angeles Times*: All around us in our homes, workplaces, and public spaces, bacteria and viruses are evolving at a feverish rate, and our best defenses against them are in danger of being overwhelmed. The threat posed by an emerging outbreak is as formidable as any challenge the human race has ever faced, and the evolutionary scales may be tipping in favor of the microbes. From mad cow disease and Asian bird flu to SARS, West Nile virus, and Ebola, more than thirty new diseases have arisen since the 1970s, and old scourges from plague to tuberculosis have reemerged in more dangerous

forms But how imminent really is the danger Through riveting patient information and a behind the scenes tour of the health care system Levy and Fischetti reveal How we've managed to contain certain epidemics while allowing others to rage out of control Why the demand for vaccines too often exceeds the supply and why it took the FDA thirty four years to approve the first new class of antibiotics since 1965 How new infectious diseases manifest themselves symptoms to watch for and how to get a correct diagnosis in time The latest scientific developments from new genetic techniques to promising drug programs that might allow us to beat back the microbe menace The New Killer Diseases will leave you fully informed about the true extent of the threat we face and what you can do to help minimize risk of a pandemic

**Best Laid Plans** Terence E. McDonnell,2016-08-18 We see it all the time organizations strive to persuade the public to change beliefs or behavior through expensive expansive media campaigns Designers painstakingly craft clear resonant and culturally sensitive messaging that will motivate people to buy a product support a cause vote for a candidate or take active steps to improve their health But once these campaigns leave the controlled environments of focus groups advertising agencies and stakeholder meetings to circulate the public interprets and distorts the campaigns in ways their designers never intended or

dreamed In Best Laid Plans Terence E McDonnell explains why these attempts at mass persuasion often fail so badly McDonnell argues that these well designed campaigns are undergoing cultural entropy the process through which the intended meanings and uses of cultural objects fracture into alternative meanings new practices failed interactions and blatant disregard Using AIDS media campaigns in Accra Ghana as its central case study the book walks readers through best practice evidence based media campaigns that fall totally flat Female condoms are turned into bracelets AIDS posters become home decorations red ribbons fade into pink under the sun to name a few failures These damaging cultural misfires are not random Rather McDonnell makes the case that these disruptions are patterned widespread and inevitable indicative of a broader process of cultural entropy
