

An abstract architectural illustration in a monochromatic red and black color scheme. The scene features a large, curved, dome-like structure on the right side. In the center, there is a tall, thin, vertical element that resembles a spire or a chimney. To the left, a series of horizontal lines suggest a wide staircase or a series of terraces. The overall composition is geometric and modern, with a strong sense of scale and perspective.

German Architecture For A Mass Audience:

German Architecture for a Mass Audience Kathleen James-Chakraborty, 2000 Focusing on the idea of architecture for a mass audience Kathleen James Chakraborty addresses issues of space simplicity spirituality and spectacle *German Architecture for a Mass Audience* Kathleen James-Chakraborty, 2002-09-06 This book vividly illustrates the ways in which buildings designed by many of Germany's most celebrated twentieth century architects were embedded in widely held beliefs about the power of architecture to influence society *German Architecture for a Mass Audience* also demonstrates the way in which these modernist ideas have been challenged and transformed most recently in the rebuilding of central Berlin

Architecture, Politics, and Identity in Divided Berlin Emily Pugh, 2014-03-21 On August 13 1961 under the cover of darkness East German authorities sealed the border between East and West Berlin using a hastily constructed barbed wire fence Over the next twenty eight years of the Cold War the Berlin Wall grew to become an ever present physical and psychological divider in this capital city and a powerful symbol of Cold War tensions Similarly stark polarities arose in nearly every aspect of public and private life including the built environment In *Architecture Politics and Identity in Divided Berlin* Emily Pugh provides an original comparative analysis of selected works of architecture and urban planning in both halves of Berlin during the Wall era revealing the importance of these structures to the formation of political cultural and social identities Pugh uncovers the roles played by organizations such as the Foundation for Prussian Cultural Heritage and the Building Academy in conveying the political narrative of their respective states through constructed spaces She also provides an overview of earlier notable architectural works to show the precursors for design aesthetics in Berlin at large and considers projects in the post Wall period to demonstrate the ongoing effects of the Cold War Overall Pugh offers a compelling case study of a divided city poised between powerful contending political and ideological forces and she highlights the effort expended by each side to influence public opinion in Europe and around the World through the manipulation of the built environment

Modern Religious Architecture in Germany, Ireland and Beyond Lisa Godson, Kathleen James-Chakraborty, 2019-03-07 Modernity and religion are not mutually exclusive Setting German and Irish church synagogue and mosque architecture side by side over the last century highlights the place for the celebration of the new within faiths whose appeal lies in part in the stability of belief they offer across time Inspired by radically modern German churches of the 1920s and 1930s this volume offers new insights into designers of all three types of sacred buildings working at home and abroad It offers new scholarship on the unknown phenomenon of mid century ecclesiastical architecture in sub Saharan Africa by Irish designers a critical appraisal of the overlooked Frank Lloyd Wright trained Andrew Devane and an analysis of accommodating difficult pasts and challenging futures with contemporary synagogue and mosque architecture in Germany With a focus on influence and processes alongside conservationists and historians it features critical insights by the designers of some of the most celebrated contemporary sacred buildings including Niall

Concrete and Culture Adrian Forty, 2013-02-15 Concrete has been used in arches vaults and domes dating as far back as the Roman Empire Today it is everywhere in our roads bridges sidewalks walls and architecture For each person on the planet nearly three tons of concrete are produced every year Used almost universally in modern construction concrete has become a polarizing material that provokes intense loathing in some and fervent passion in others Focusing on concrete's effects on culture rather than its technical properties Concrete and Culture examines the ways concrete has changed our understanding of nature of time and even of material Adrian Forty concentrates not only on architects' responses to concrete but also takes into account the role concrete has played in politics literature cinema labor relations and arguments about sustainability Covering Europe North and South America and the Far East Forty examines the degree that concrete has been responsible for modernist uniformity and the debates engendered by it The first book to reflect on the global consequences of concrete Concrete and Culture offers a new way to look at our environment over the past century **Feminist Space** Mary Pepchinski, 2007-06-12 Feminist Space Exhibitions and Discourses between Philadelphia and Berlin 1865 1912 investigates the relationship between gender and the production of public space namely the exhibitions of feminine bourgeois culture that were created in Berlin between 1865 and 1912 This book demonstrates that these exhibitions gave expression to evolving bourgeois feminist discourses that proposed an expanded public sphere containing separate and equal masculine and feminine qualities In addition these feminine exhibitions were enriched by contact with and participation in the Woman's Buildings constructed at the 1876 Philadelphia and 1893 Chicago American world exhibitions as well as the ideals of the German applied arts movement As the exhibitions of feminine bourgeois culture were hugely popular and financially successful events they attracted attention and stimulated discourse and debate This book proposes that German bourgeois feminists created unique public spaces which can be seen as contributing to the seminal architectural culture which emerged in Germany prior to 1914 *Dark Forces at Work* Cynthia J. Miller, A. Bowdoin Van Riper, 2019-11-06 Dark Forces at Work examines the role of race class gender religion and the economy as they are portrayed in and help construct horror

narratives across a range of films and eras These larger social forces not only create the context for our cinematic horrors but serve as connective tissue between fantasy and lived reality as well While several of the essays focus on name horror films such as IT Get Out Hellraiser and Don t Breathe the collection also features essays focused on horror films produced in Asia Europe and Latin America and on American classic thrillers such as Alfred Hitchcock s Psycho Key social issues addressed include the war on terror poverty the housing crisis and the Time s Up movement The volume grounds its analysis in the films rather than theory in order to explore the ways in which institutions identities and ideologies work within the horror genre

Bruno Taut's Design Inspiration for the Glashaus David Nielsen,2015-09-16 As a formative exemplar of early architectural modernism Bruno Taut s seminal exhibition pavilion the Glashaus literally translated Glasshouse is logically part of the important debate of rethinking the origins of modernism However the historical record of

Bruno Taut's Glashaus has been primarily established by one art historian and critic. As a result the historical record of the Glashaus is significantly skewed toward a singular notion of Expressionism and surprisingly excludes Taut's diverse motives for the design of the building. In an effort to clarify the problematic historical record of the Glashaus this book exposes Bruno Taut's motives and inspirations for its design. The result is that Taut's motives can be found in yet unacknowledged precedents like the botanical inspiration of the Victoria regia lily, the commercial interests of Frederick Keppler as the Director of the Deutsche Luxfer Prismen Syndikat and imitation that derived openly from the Gothic. The outcome is a substantial contribution to the re-evaluation of the generally accepted histories of the modern movement in architecture.

Trash Culture Gillian Pye, 2010. In the late twentieth and early twenty-first centuries concerns about the environment and the future of global capitalism have dominated political and social agendas worldwide. The culture of excess underlying these concerns is particularly evident in the issue of trash, which for environmentalists has been a negative category heavily implicated in the destruction of the natural world. However, in the context of the arts, trash has long been seen as a rich aesthetic resource, and more recently, particularly under the influence of anthropology and archaeology, it has been explored as a form of material culture that articulates modes of identity construction. In the context of such shifting, often ambiguous attitudes to the obsolete and the discarded, this book offers a timely insight into their significance for representations of social and personal identity. The essays in the book build on scholarship in cultural theory, sociology, and anthropology that suggests that social and personal experience is embedded in material culture, but they also focus on the significance of trash as an aesthetic resource. The volume illuminates some of the ways in which our relationship to trash has influenced and is influenced by cultural products, including art, architecture, literature, film, and museum culture. Christoph Schlingensiefel Anna Teresa Scheer, 2018-02-22. The first book to focus specifically on the late German artist Christoph Schlingensiefel's theatre work, it subversively merges art, politics, and everyday life to imbue his productions both inside and outside the theatre with a re-energized concept of the political in art. Scheer traces Schlingensiefel's artistic lineage as a filmmaker with no formal training in theatre, whose work does not correspond to theoretical frameworks such as postdramatic theatre, Regietheater, or established categories of political theatre such as Brechtian community and agit-prop theatre. She explores how his work instead draws upon the highly performative gestures of the historical and post-Cold War avant-gardes, as well as the happenings and event-based practices of the sixties. Comprehensive case studies of six diverse theatrical and activist events are offered to demonstrate both the immediacy of Schlingensiefel's response to contemporary social and political events and his use of a range of artistic influences and different genres. Rocky Dutschke 68 1996 Save Capitalism Throw the Money Away 1999 The Berlin Republic or the Ring in Africa 1999 Hamlet 2001 Atta Atta Art Has Broken Out 2003 and the Church of Fear 2003. Key questions such as how his theatre functions as a provocation and how an artist can insert themselves into the powerful flows of imagery produced by the perpetual global news cycle form a coherent line of enquiry throughout each of

the chapters The significance of Schlingensiefel's artistic legacy of politicized theatre making that pioneers new modes of active aesthetic and public engagement in the political realm remains pertinent to topical socio political debates and is of relevance to an international audience across a diversity of disciplines **Trans-Europe Express** Owen
