Business Freedoms and Fundamental Rights in European Union Law Niall O'Connor, 2024-10-31 Article 16 of the EU Charter of Fundamental Rights recognizing the freedom to conduct a business in accordance with Union law and national laws and practices has been the subject of intense debate over the value of business freedoms within EU law Problematically the Court of Justice of the European Union CJEU relied on this provision in a series of highly deregulatory judgments invoking Article 16 to undermine the effectiveness of employee protective legislation Business Freedoms and Fundamental Rights in European Union Law assesses the value placed on the freedom to conduct a business as a fundamental right within the legal reasoning of the CJEU Arguing that this freedom can only properly be understood in relation to its wider constitutional and social rights functions it uses the employment law context as a case study given the tensions that exist between the economic rights of employers and the social rights of employees Examined holistically the book demonstrates that granting fundamental rights status to business freedoms is not inherently deregulatory with such freedoms also encapsulating social rights values and interests The freedom to conduct a business therefore emerges as a malleable fundamental rights concept dependent on the underlying constitutional context whether that be within national constitutional law the EU Charter of Fundamental Rights general principles of EU law or in the arrangements governing the United Kingdom's departure from the EU This is an open access title available under the terms of a CC BY NC ND 4.0 International licence It is free to read on Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations

Interlocking Constitutions Luis I Gordillo, 2012-04-25 The existence of interactions between different but overlapping legal systems has always presented challenges to black letter law This is particularly true of the relationship between international law and domestic law and the relationship between federal law and the laws of individual federation members Moreover some organisations have created their own supranational constitutional systems the United Nations Charter is the best known and is often referred to as the World Constitution but the European Court of Justice in Luxembourg views the European Treaties as a Constitutional Charter for Europe while the European Court of Human Rights has defined the European Convention on Human Rights as a constitutional instrument of European public order It is in the dynamic relationship between domestic constitutional laws EU law the ECHR and the UN Charter that the most persistent difficulties arise In this context interordinal instability not only provokes strong academic interest but also affects what has been called governance or global government and undermines both legal certainty and individual fundamental rights Different solutions constitutionalist and pluralist have been explored but none of them has received global acceptance In this book Luis Gordillo analyses the interordinal instabilities which arise at the European level focusing on three main strands of case law and their implications

Solange Bosphorus and Kadi To solve the difficulties caused by this instability Gordillo proposes a form of soft constitutionalism which he calls interordinal constitutionalism as a means to bring order and stability to global legal governance The original Spanish thesis on which this book is based was awarded the Nicol s P rez Serrano Prize by the Centro de Estudios Pol ticos y Constitucionales for the best dissertation in constitutional law 2009 2010 **Thine Own Self** Sarah R Borden,2010 An excellent addition to Edith Stein scholarship and philosophy Hamilton's Catechism on the art of writing for an Orchestra, and on playing from score.
