German For Economics German For Business Economics Vol 1:

German and Japanese Business in the Boom Years Matthias Kipping, Akira Kudo, Harm G. Schröter, 2004-07-31 This edited volume examines the American influence on West German and Japanese industry from the 1950s to the 1970s providing a valuable contribution to the debate on Americanization from a historical and comparative perspective Individual contributions provide an in depth analysis of the adoption and modification of management and technological issues from the US in West Germany and Japan at the micro economic level

Optimizing the German Workforce David Meskill, 2010-04-01 During the twentieth century German government and industry created a highly skilled workforce as part of an ambitious program to control and develop the country's human resources Yet these long standing efforts to match as many workers as possible to skilled vocations and to establish a system of job training have received little scholarly attention until now The author's account of the broad support for this program challenges the standard historical accounts that focus on disagreements over the German political economic order and points instead to an important area of consensus These advances are explained in terms of political policies of corporatist compromise and national security as well as industry's evolving production strategies By tracing the development of these policies over the course of a century the author also suggests important continuities in Germany's domestic politics even across such different regimes as Imperial Weimar Nazi and post 1945 West Germany

The Leaderless Economy Peter Temin, David Vines, 2013-01-20 A new way to understand financial crises and a blueprint for tomorrow's recovery The Leaderless Economy reveals why international financial cooperation is the only solution to today's global economic crisis In this timely and important book Peter Temin and David Vines argue that our current predicament is a catastrophe rivaled only by the Great Depression Taking an in depth look at the history of both they explain what went wrong and why and demonstrate why international leadership is needed to restore prosperity and prevent future crises Temin and Vines argue that the financial collapse of the 1930s was an end of regime crisis in which the economic leader of the

nineteenth century Great Britain found itself unable to stem international panic as countries abandoned the gold standard They trace how John Maynard Keynes struggled for years to identify the causes of the Great Depression and draw valuable lessons from his intellectual journey Today we are in the midst of a similar crisis one in which the regime that led the world economy in the twentieth century that of the United States is ending Temin and Vines show how America emerged from World War II as an economic and military powerhouse but how deregulation and a lax attitude toward international monetary flows left the nation incapable of reining in an overleveraged financial sector and powerless to contain the 2008 financial panic Fixed exchange rates in Europe and Asia have exacerbated the problem The Leaderless Economy provides a blueprint for how renewed international leadership can bring today's industrial nations back into financial balance domestically and between each other

German Yearbook on Business History 1985 Hans Pohl, Bernd Rudolph, 2012-12-06 **West German Industrialists and the Making of the Economic Miracle** Armin Grünbacher, 2017-07-13 West German Industrialists and the Making of the Economic Miracle investigates the mentality of post war German heavy industrialists through an analysis of their attitudes thinking and views on social political and of course economic matters at the time including the social market economy and how they saw their own role in society with this investigation taking place against the backdrop of the economic miracle and the Cold War of the 1950s and 60s The book also includes an assessment of whether the self declared new aristocracy of merit justified its place in society and carried out its actions in a new spirit of political responsibility This is an important text for all students interested in the history of Germany and the modern economic history of Europe *An Economic Background to Munich* Alice Teichova, 1974-08-29 The economic background to the dismemberment of Czechoslovakia at Munich in 1938 has not received the attention it deserves This book helps to redress this imbalance by analysing in depth the web of foreign interests direct foreign investment foreign long term loans and the activities of international cartels in Czechoslovakia in the interwar period After the First World War Central and Southeast Europe became one of the major regions of the world to which capital from France Great Britain and the United States was exported Czechoslovakia played a central part in this development foreign capital sought to invest in Czechoslovak industrial enterprises and banks to make loans to the state public institutions and private economic organizations and to influence production prices and the market through cartel agreements Dr Teichova discusses in detail the influence of foreign capital and business organizations in mining the metallurgical industries engineering electrical industries chemical industries and banking in the greater part of the modernized sector of the economy *The German Historical School* Yuichi Shionoya, 2000-10-12 This book clarifies the approach of the German Historical School by the reconstruction of their achievements in terms of rational and historical context **Germany Taxation Laws and Regulations Handbook Volume 1 Strategic Information and Corporate Taxation** IBP USA, **Quest for Economic Empire** Volker Berghahn, 1996 German unification evoked ambivalent reactions outside its borders it revived

disquieting memories of attempts by German big business during the two world wars to build an economic empire in Europe in conjunction with the military and the government bureaucracy But there are also high hopes that German finance and industry will serve as the engine of reconstruction in eastern Europe just as it played this role in the postwar unification of western Europe

The German Economy E. Owen-Smith, 2012-10-12 Germany is clearly the dominant economic force in Europe It occupies the pivotal position of being at the centre of both the EC and of attempts to rebuild the economies of East Central Europe The German Economy traces the various aspects of German policy and growth concentrating in particular on the last two decades These include the German economy in perspective the regional dimension fiscal policy monetary policy social policy the labour market banking and finance industry trade and economic policy In The German Economy Eric Owen Smith has produced the only comprehensive account of the contemporary German economy currently available in English

The Future of the German Economy Rebecca Harding, William E. Paterson, 2000 Flagships of Imperialism is the first scholarly monograph on the history of the P&O the founders attitudes to technical advances the shareholding base the company's involvement in the opium trade and with its acquisition of mail Admiralty and other government contracts It was the P&O's status as a government contractor which above all else implicated its fortunes in the wider politics of empire as illustrated by the book's concluding account of the company's rescue from the edge of a financial precipice by the award of a new government mail contract prompted among other things by the Abyssinian expedition of 1867 Flagships of Imperialism will be of interest to transport and company historians and to historians of the British empire alike as well as to anyone interested in the history of British ships and shipping in the nineteenth century

Systematic Chasing for Economic Success: An Innovation Management Approach for German SME's in Drive Technology Business Thomas Kamps, 2013-06-01 The industry of the German drive technology is dominated by SMEs and must supply its products to customers around the world In addition this industrial segment is challenged by competitors from many other countries and from customers with a variety of different needs Therefore there are two questions that arose for SMEs Firstly what is the best strategy to take an advantage in the competition and secondly how does the strategies can be used in the most efficient way The structure the essential needs and the boundary conditions will be derived from the analysis of the industrial segment In addition a suitable strategy that should take an advantage in the worldwide competition will be analysed and discussed In the end the author develops an innovative management process and a toolbox for SMEs to make this strategy applicable to a company
