was Britain's very serious attempt to protect our shores from invasion by Nazi Germany in the Second World War In the Spitfire summer of 1940 all that the 1 million unpaid untrained part timers of the Local Defence Volunteers as the organisation was originally called wanted was a service rifle for each man but even that was too much for a country threatened by defeat to provide Britain's Final Defence is the first book to explore the efforts made to arm the home defence force between 1940 and 1944 and describe the full range of weaponry available for Britain's last stand against invading Axis forces

The Bazooka Gordon L. Rottman, 2012-06-20 Most belligerents entering World War II armed their infantry with bulky and ineffectual anti tank rifles as their primary means of combating tanks US planners realized that what infantrymen

needed was a relatively lightweight man portable anti tank weapon that was simple to operate accurate and capable of knocking out the average tank at a reasonable range while also being effective against fortified buildings pillboxes and personnel in the open The bazooka combined a revolutionary new anti tank rifle grenade warhead a much modified British anti aircraft rocket motor and a cobbled together launcher tube and electrical firing system its first test firing astounded observers and it was immediately adopted by the US armed forces Featuring specially drawn colour artwork this engaging study tells the story of the bazooka which set the standard for future light anti tank weapons and their ammunition and was a key influence on anti tank tactics and techniques in the post war era
