Lepage,2014-11-18 This volume presents a cross section of the most common transport vehicles produced and used by the German army Tanks plus auxiliary vehicles such as cars motorcycles vans ambulances trucks and tractors made it possible for the troops to keep moving These lightly armored or unarmored vehicles aka soft skins operated behind the front lines maintaining supply lines connecting armies with their home bases and ultimately determining the outcome of battle Beginning with the development of military vehicles in the early 1930s this volume discusses the ways in which this new technology influenced and to some extent facilitated Hitler s program of rearmament Nomenclature standard equipment camouflage and the combat roles of the various vehicles are thoroughly examined Individual vehicle types are arranged and discussed by the following classifications cars and motorcycles trucks and tractors half tracks and wheeled combat vehicles Accompanied by well researched detailed line drawings each section deals with a number of individual vehicles describing their design manufacture and specific use American Book Publishing Record ,1997 **Logistics in World War II** John Norris,2020-04-30 John Norris shows how logistics though less glamorous than details of the fighting itself played a decisive

role in the outcome of every campaign and battle of World War Two The author marshals some astounding facts and figures to convey the sheer scale of the task all belligerents faced to equip vast forces and supply them in the field He also draws on first hand accounts to illustrate what this meant for the men and women in the logistics chain and those depending on it at the sharp end Many of the vehicles from supply trucks to pack mules and other relevant hardware are discussed and illustrated with numerous photographs This first volume of two looks at the early years of the war so we see for example how Hitlers panzer divisions were kept rolling in the Blitzkrieg a German division in 1940 still had around 5000 horses requiring hundreds of tonnes of fodder and the British armys disastrous loss of equipment at Dunkirk This is a fascinating and valuable study of a neglected aspect of World War Two Forthcoming Books Rose Arny,1996-10 **Motor Sport** William Boddy,1972 **Cross & Cockade Journal** ,1968
