German Nationalism and Religious Conflict Helmut Walser Smith, 2014-07-14 The German Empire of 1871 although unified politically remained deeply divided along religious lines In German Nationalism and Religious Conflict Helmut Walser Smith offers the first social cultural and political history of this division He argues that Protestants and Catholics lived in different worlds separated by an invisible boundary of culture defined as a community of meaning As these worlds came into contact they also came into conflict Smith explores the local as well as the national dimensions of this conflict illuminating for the first time the history of the Protestant League as well as the dilemmas involved in Catholic integration into a national culture defined primarily by Protestantism The author places religious conflict within the wider context of nation building and nationalism The ongoing conflict conditioned by a long history of mutual intolerance was an integral part of the jagged and complex process by which Germany became a modern secular increasingly integrated nation Consequently religious conflict also influenced the construction of German national identity and the expression of German nationalism Smith contends that in this religiously divided society German nationalism did not simply smooth over tensions between two religious groups but rather provided them with a new vocabulary for articulating their differences Nationalism therefore served as much to divide as to unite German society Originally published in 1995 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

**German nationalism and religious conflict** Helmut Walser Smith, 1995 , **Modern Gnosis and Zionism** Yotam Hotam, 2013-05-20 In the late nineteenth and early twentieth century the German intellectual world was challenged by a growing distrust in the rational ideals of the enlightenment and consequently by a belief in the existence of a radical cultural crisis One response to this crisis was the emergence of Life Philosophy which celebrated the irrational expressive instinctive and spontaneous while rejecting the rational conscious and logical Around the same time and place Zionist thought crystallized It discussed issues like the Jewish essence the creation of a new Jewish person and a new Jewish community return to the Jewish homeland and the negation of the diasporic way of life This book explores the connections between Zionism and Life Philosophy and argues that Life Philosophy represents a modern secularized version of gnostic dualism between God and world and that this was a particular secular impulse that lay at the core of the Zionist political mission Consisting of two main sections the book first shows the manner in which Life Philosophy should be understood as a modern secularized gnostic theology before concluding by discussing its political Zionist interpretation Drawing on published works of a wide range of thinkers and intellectuals alongside a variety of unpublished materials this book will be welcomed by

**Germany and the Modern World, 1880-1914** Mark Hewitson, 2018-07-05 The German Empire before 1914 had the fastest growing economy in Europe and was the strongest military power in the world. Yet it appeared from a reading of many contemporaries' accounts to be lagging behind other nation states and to be losing the race to divide up the rest of the globe. This book is an ambitious re-assessment of how Wilhelmine Germans conceived of themselves and the German Empire's place in the world in the lead up to the First World War. Mark Hewitson re-examines the varying forms of national identification, allegiance and politics following the creation and consolidation of a German nation state in light of contemporary debates about modernity, race, industrialization, colonialism and military power. Despite the new claims being made for the importance of empire to Germany's development, he reveals that the majority of transnational networks and contemporaries' interactions and horizons remained intra-European or transatlantic rather than truly global.

**Contested Rituals** Robin Judd, 2011-05-02 In *Contested Rituals* Robin Judd shows that circumcision and kosher butchering became focal points of political struggle among the German state, its municipal governments, Jews and Gentiles. In 1843 some German Jewish fathers refused to circumcise their sons, prompting their Jewish communities to reconsider their standards for membership. Nearly a century later, in 1933, another blood ritual, kosher butchering, served as a political and cultural touchstone when the Nazis built upon a decades-old controversy concerning the practice and prohibited it. In describing these events and related controversies that raged during the intervening years, Judd explores the nature and escalation of the ritual debates as they transcended the boundaries of the local Jewish community to include non-Jews who sought to protect, restrict or prohibit these rites. Judd argues that the ritual debates grew out of broad shifts in German politics: the competition between local and regional authority following unification; the possibility of government intervention in private affairs; the place of religious difference in the modern age; and the relationship of the German state to its religious and ethnic minorities, including Catholics. Anti-Semitism was only one factor driving the debates, and it often functioned in unexpected ways. Judd gives us a new understanding of the formation of German political systems, the importance of religious practices to Jewish political leadership, the interaction of Jews with the German government, and the reaction of Germans of all faiths to political change.

**The Young Bultmann** William D. Dennison, 2008 During his early life (1884-1925), Rudolf Bultmann passionately attempted to unite scholar and laity through his understanding of God, which developed in the context of his home and his love for the common people of the church. The legacy of Schleiermacher, Marburg Lutheran neo-Kantianism, the eschatological perspective of the History of Religion School, dialectical theology, and Heidegger's philosophy of existence: Bultmann always insisted that God reflected the inner forces of life within each human being. Over the years, however, Bultmann came to hold that Lutheran neo-Kantianism provided the basic structure by which to analyze, critique and strengthen his understanding of God. In light of this neo-Kantian structure, Bultmann insisted that God could not be the

formulation of any scientific ethical or artistic construction In other words God could not be the object or manifestation of human reason in any form since God transcended human reason Hence in 1925 through the assistance of the dialectical theologians and Heidegger Bultmann presented his purest formulation of a neo Kantian understanding of God God as the spontaneous moment of encountering the dialectical forces within our existential being **The Oxford Handbook of the**

From Popular Liberalism to National Socialism Oded Heilbrunner,2017-05-15 Long live liberty equality fraternity and dynamite So went the traditional slogan of the radical liberals in Greater Swabia the south western part of modern Germany This book investigates the development of what the author terms popular liberalism in this region in order to present a more nuanced understanding of political and cultural patterns in Germany up to the early 1930s In particular the author offers an explanation for the success of National Socialism before 1933 in certain regions of South Germany arguing that the radical liberal sub culture was not subsumed by the Nazi Party but instead changed its form of representation Together with the famous v lkish fraction and the leftist fraction within the chapters of the Nazi Party there were radical liberal associations ex members of radical liberal parties sympathizers with these parties and notables with a radical orientation derived from family and regional traditions These people and associations believed that the Nazi Party could fulfil their radical liberal vision rooted in the local democratic and liberal traditions which stretched from 1848 to the early 20th century By looking afresh at the relationship between local regional identities and national politics this book makes a major contribution to the study of the roots of Nazism
