German Armored Cars And Reconnaissance Halftracks 1939-1945:

German Halftracks at War, 1939-1945 Paul Thomas, 2012-03-15 The author of the bestselling *Panzer IV at War* delivers a highly illustrated look at a key element in the German Blitzkrieg during the Second World War. HistoryOfWar.org In the aftermath of the Great War which saw the introduction of the tank, the more far sighted military leaders realized that the future of warfare hinged on a balance of mobility, firepower and protection. Tanks would need to be accompanied into battle by supporting arms, specifically infantry, artillery and engineers. An all fully tracked field army was thought to be too expensive, so the semi tracked support vehicle, commonly called a halftrack, was born. The halftrack concept was embraced by France, the US and most notably Germany. The Germans commissioned numerous types of half tracked tractors which were classified by the weight of their towed load. These vehicles were designated *Sonderkraftfahrzeug* (special motorized vehicle) abbreviated as *Sd Kfz*. These front wheel steering vehicles with tracked drive transformed the fighting quality of the armored divisions. They carried the infantry alongside the advancing panzers and brought guns and pontoon bridge sections. The halftrack also became the preferred reconnaissance vehicle. This latest addition to the highly successful and collectable *Images of War* series has a superb collection of rare images supported by detailed captions and text of the many *Sd Kfz* variants in diverse theatres of war. It is worth reflecting that without half tracks there could have been no Blitzkrieg.

German Reconnaissance and Support Vehicles, 1939-1945 Paul Thomas, 2018-09-30 This WWII pictorial history illustrates the full range of Nazi vehicles used in reconnaissance and support missions throughout the war. The German military used reconnaissance and support vehicles widely in the Second World War. This book illustrates the full range of these vehicles with authoritative information and more than 200 rare wartime photographs. Both tracked and wheeled vehicles were employed for reconnaissance and screening. These included light tanks such as the Panzer I and Panzer II, armored cars such as the six and eight wheeled *Schwerer Panzerspähwagen* and motorcycles such as the famous BMW R75 or the Zundapp KS750. In addition to their recon role, they would on occasion engage similar light units. Support vehicles such as the tracked *Sd Kfz 2 Kettenkrad* and the renowned *Sd Kfz 251* halftracks were used in the follow up role frequently with mounted grenadiers to mop up over run enemy positions. *German Army Order of Battle, 1939-1945*, 1981 [Scouts Out!](#) [The Development Of Reconnaissance Units In Modern Armies \[Illustrated Edition\]](#) John J. McGrath, 2014-08-15 Illustrated with 60 maps, plans and diagrams. Reconnaissance and counter reconnaissance are battlefield missions as old as military history itself and missions for which many armies have created specialized units to perform. In most cases, these units were trained, equipped and used differently from the majority of an army's fighting units. Horse cavalry performed these missions for centuries for it had speed and mobility far in excess of main battle units. Once the horse was replaced by mechanization, however, the mobility advantage once enjoyed by the horse cavalry disappeared. Since the early 20th century, the search for the proper mix of equipment, the proper organization and the proper employment of reconnaissance units has bedeviled

armies around the world This survey uses a diverse variety of historical cases to illustrate the enduring issues that surround the equipping organizing and employment of reconnaissance units It seems that these specialized units are either too heavily or too lightly equipped and too narrowly specialized or too conventionally organized Pre war reconnaissance doctrines tend to undergo significant change once fighting begins leading to post conflict analysis that reconnaissance units were misused in one way or another McGrath ends his study with an intriguing conclusion about the role that specialized reconnaissance units should have in the future that may surprise many readers The Strategic Air War Against Germany, 1939-1945

British Bombing Survey Unit,1998 At the close of the Second World War both the RAF and the United States Army Air Forces sent teams of investigators to the continent of Europe to try and assess the effectiveness of Allied strategic bombing The British Survey was originally classified and is published here for the first time By combining the original Report and an analysis of its strengths and weaknesses together with a short history of the genesis of the British Survey this work is an important contribution to the continuing historical debate over the effects of the strategic bombing offensive in the Second World War **SS Leibstandarte, Ace of the Waffen SS, Werner Herman Gustav Pötschke** David G

Williams,2015-09-15 This book covers the life of Knights cross winner SS Sturmbannführer Werner Pötschke a little known officer of the Waffen SS This book also examines in detail the question of his personal involvement in the Malm dy massacre at the Baugnez crossroads This book is not an expose of the Nazi organisation or a concise history of the SS it will not come to the jaw dropping conclusion that Werner Pötschke was or was not a Nazi he was a committed Nazi he was an officer in the Waffen SS he was also a ferocious warrior and combat leader He was also quite possibly a mass murderer He was unusual in many ways but what is truly striking about him is just how much front line combat he was personally engaged in during WWII From the very beginning of the SS foundation unto the last month of the war this man was totally committed to the fight unquestioning and uncompromising For the men of steel there was only victory or Valhalla Panzer-Divisions at War, 1939-1945

Ian Baxter,2006-11-06 From the beginning in 1935 this attractive book describes the different elements that went into the Panzer Divisions It describes how the Germans carefully built up their assault forces utilizing all available reserves and resources into making an effective fighting machine It depicts how these awesome formations grew to be used four years later in war and provides much historical information and facts about the vehicles and its components that fought in all the campaigns of the war from the early victorious Blitzkrieg in Poland and France to the last ditch defense in Germany in 1945 Each chapter features unseen photographs of light tanks main battle tanks assault guns anti tank destroyers artillery reconnaissance units support vehicles pioneers with their bridge building platforms and the motorized infantry or Panzergrenadiers This book is a visual treat for the military enthusiast and collector and a worthy addition to the Images of War series Operation Barbarossa: the Complete Organisational and Statistical Analysis, and Military Simulation Volume

IIA Nigel Askey,2013-11-01 Operation Barbarossa Volume IIA concerns the Wehrmacht All the significant German weapon

systems and combat squads used in the campaign are analysed using the quantitative methodology detailed in Volume I along with the contextual history An assessment of each weapon system s inherent combat power is provided as well as attributes such as the relative anti tank anti personnel and anti aircraft values Volume IIA then focuses on the detailed Kriegstarkenachweisungen KStN or TOE for German land units including those in the West as well as the unit s actual organisation and equipment All significant units in the German Army Heer Waffen SS Luftwaffe and security forces are included ranging from the largest panzer divisions down to small anti aircraft companies military police units

Landeschützen battalions and rail road and construction companies In all cases the data is presented in detailed tables using the weapon systems and combat squads previously analysed

German Motorcycles at War, 1939-1945 Ian Baxter, 2024-12-30 Explores the crucial role of motorcycles in the Nazi war machine enhancing mobility and tactical effectiveness during WWII The success of fast moving Blitzkrieg tactics by the Nazi war machine depended on high mobility With their on and off road capabilities motorcycles became an important component of the Nazi war machine s arsenal making a particularly significant impact in French and Russian campaigns The motorcycles were used in a variety of roles including patrolling intelligence gathering and police duties in occupied Europe Motorcyclists could be found in every unit of an infantry and Panzer division including headquarters which had a motorcycle messenger platoon Their versatility also enabled them to survey enemy positions until coming under fire before reporting back with vital intelligence relating to enemy locations and strengths The German industry produced wide range of motor bikes for military use By 1938 some 200 000 motorcycles were produced in Germany and occupied territories The principal makes included BMW DKW NSU Triumph Victoria and Zundapp Sidecar combinations often mounted with an MG34 42 machine gun also made the bike a very effective weapon By describing in words and contemporary images the role of the German motorcycle and motorcyclists during the Second World War this Images of War book fills an overlooked gap in coverage of Nazi military capability It emphasizes that the German military perfected the use of motorcycles and employed them more widely than any other army

Infantry Warfare, 1939-1945 Simon Forty, Jonathan Forty, 2021-05-12 The infantry can always be found at the sharp end of the battlefield You may be able to crush an opponent with armour or artillery but there s only one way to take and hold ground and that s with riflemen the poor bloody infantry And it is the infantrymen of the Second World War from all sides Allied and Axis who are the subject of this highly illustrated history It uses over 400 wartime photographs plus contemporary documents and other illustrations to show the developments in equipment training and tactical techniques and to give an insight into the experience of the infantry soldier during the conflict Although the infantry were critical to the war effort their contribution is often overshadowed by the more dramatic roles played by soldiers with more specialized skills like tank crew paratroopers and special forces They also suffered devastating casualties in particular during the last phase of the war in the west when around 20 per cent of an infantry division s riflemen were likely to die and over 60 per cent could expect to be

wounded So as well as describing how the infantry fought the authors look at the motivation which kept them fighting in awful conditions and despite brutal setbacks The result is a thorough detailed and revealing portrait of infantry warfare over seventy years ago **Operation Barbarossa: the Complete Organisational and Statistical Analysis, and Military Simulation Volume IIB** Nigel Askey,2014-08-26 Volume IIB is the second volume relating to and completing the Wehrmacht and the German mobilisation and war economy from June to December 1941 It includes the most detailed Orders of Battle ever published on the German Heer Luftwaffe Waffen SS and Kriegsmarine in all areas of the Reich between 22nd June and 4th July 1941 Even small and obscure units are included such as flak companies artillery HQs observation battalions bridging columns Landeschützen battalions MP battalions railroad companies and Luftwaffe Kurierstaffeln Verbindungsstaffeln and Sanitätsflugbereitschaften The Luftwaffe OOBs also include details on aircraft types and strengths in each air unit *The International Military Encyclopedia: Arginusae, Battle of; Atonement, War of* Norman Tobias,2004

The Army Quarterly and Defence Journal ,1983 *German Field Fortifications 1939-45* Gordon L. Rottman,2012-09-20 The German Army of World War II considered itself an offensive mobile force The experiences in the trenches in World War I had done much to shape its concept of field fortification and its mobile warfare ethos was intended to prevent the previous war's stalemate This book addresses frontline defensive field fortifications built by infantrymen using local materials and includes rifle platoon positions trenches crew served weapon positions bunkers dugouts shelters and more It also covers anti tank and anti personnel obstacles as well as field camouflage methods and construction methods The integration of these positions into permanent systems and theatre specific defences are also discussed German Armoured Warfare of World War II Ian Baxter,2003 Starting from the Blitzkrieg period when Nazi Germany unleashed its mobile armored divisions into Poland France and the Low Countries German Armored Warfare of World War II captures the full might of the Panzerwaffe Hitler's Panzer arm from its early triumphs to its final demise Featuring previously unpublished photographs many of which have come from the albums of individuals who experienced the war firsthand the book presents a unique and vivid record of German armor in action from 1939 1945 The photographs detail in turn the different elements that went into making up a fully fledged Panzer division light tanks main battle tanks artillery assault guns and anti tank destroyers reconnaissance units support vehicles and of course the Panzergrenadiers in depth descriptive captions accompanying the photographs also provide much historical information and facts about the events portrayed Depicting action from the fields of France to the Russian steppes and rugged Italian terrain German Armored Warfare of World War II is a captivating glimpse of one of the most effective weapons of war ever to have appeared on the battlefield *German Armoured Cars* Bryan Perrett,1982
