History of Language Steven Roger Fischer, 2004-10-03 It is tempting to take the tremendous rate of contemporary linguistic change for granted

What is required in fact is a radical reinterpretation of what language is Steven Roger Fischer begins his book with an examination of the modes of communication used by dolphins birds and primates as the first contexts in which the concept of language might be applied As he charts the history of language from the times of Homo erectus Neanderthal humans and Homo sapiens through to the nineteenth century when the science of linguistics was developed Fischer analyses the emergence of language as a science and its development as a written form He considers the rise of pidgin creole jargon and slang as well as the effects radio and television propaganda advertising and the media are having on language today Looking to the future he shows how electronic media will continue to reshape and re invent the ways in which we communicate a delightful and unexpectedly accessible book a virtuoso tour of the linguistic world The Economist few who read this remarkable study will regard language in quite the same way again The Good Book Guide

Final Devoicing in the Phonology of German Wiebke

Brockhaus,2012-10-25 This book deals with the phonological event of final devoicing in a theoretical framework based on principles and parameters rather than rules It refers to data coming almost exclusively from German native and non native items The first chapter presents the raw facts providing an outline of the sort of alternations and distributional restrictions

on voicing to be accounted for Previous treatments of final devoicing in German are discussed and evaluated in the second chapter Chapters 3 and 4 provide an analysis of final devoicing in German couched in the framework of Government Phonology GP a phonological theory operating with principles and parameters Some of the central tenets of GP are introduced at the beginning of chapter 3 and additional concepts of the theory are explained as they become relevant to the discussion of final devoicing The author argues that final devoicing should be interpreted as a phonological weakening process involving the withdrawal of autosegmental licensing from the laryngeal element L which represents voicing in obstruents This occurs in phonologically weak environments where due to clearly definable prosodic conditions only reduced autosegmental licensing potential is available This analysis developed with reference to the prestige variety of German Hochlautung is then extended to Northern Standard German and the phonological differences between the two dialects are identified In the final chapter the author investigates whether final devoicing results in phonological neutralisation as is often assumed in the literature She observes that the GP account developed in chapters 3 and 4 is incompatible with this traditional view This is desirable since among other things the conflict between earlier phonological analyses and experimental studies of final devoicing can now be resolved
