Germany And The Next War:

Germany and the Next War (WWI Centenary Series) Friedrich Von Bernhardi, 2014-12-12 Our science our literature and the warlike achievements of our past have made me proudly conscious of belonging to a great civilized nation which in spite of all the weakness and mistakes of bygone days must and assuredly will win a glorious future and it is out of the fulness of my German heart that I have recorded my convictions I believe that thus I shall most effectually rouse the national feeling in my readers hearts and strengthen the national purpose This book is part of the World War One Centenary series creating collating and reprinting new and old works of poetry fiction autobiography and analysis The series forms a commemorative tribute to mark the passing of one of the world s bloodiest wars offering new perspectives on this tragic yet fascinating period of human history Each publication also includes brand new introductory essays and a timeline to help the reader place the work in its historical context

Germany and the Next War Friedrich von Bernhardi, 2019-11-20 In *Germany and the Next War* Friedrich von Bernhardi presents a compelling discourse on military strategy and the geopolitical landscape of Europe leading up to World War I The text emerges from the context of a rapidly industrializing continent marked by intense national competition and militarism Bernhardi employs a persuasive and often polemical style articulating a vision for Germany s place in a world defined by conflict He advocates for a proactive military stance and outlines the perceived threats from rival powers articulating a complex interplay between national identity and military necessity while simultaneously reflecting on the philosophical underpinnings of war itself Friedrich von Bernhardi a German general and military theorist was deeply shaped by the events preceding the Great War His extensive military experience and his position within the Prussian military elite led him to critically examine Germany s military doctrine and strategy His belief in the inevitability of conflict and the supremacy of military power as a means to achieve national aims propelled him to write this provocative work which has garnered both admiration and critique from contemporaries and historians alike *Germany and the Next War* is an essential read for scholars and enthusiasts of military history offering profound insights into the mindsets that guided nations towards the tumult of World War I Bernhardi s arguments resonate with broader questions of nationalism strategy and the philosophy of war making it a vital contribution to the understanding of modern military thought Readers looking to comprehend the historical roots of conflict in Europe will find this text indispensable

Germany and the Next War Friedrich Von Bernhardi, 2015-02-25 This was written just a few years before the outbreak of World War I and spells out the case for Germany s history and its war machine From the intro The value of war for the political and moral development of mankind has been criticized by large sections of the modern civilized world in a way which threatens to weaken the defensive powers of States by undermining the warlike spirit of the people Such ideas are widely disseminated in Germany and whole strata of our nation seem to have lost that ideal enthusiasm which constituted the greatness of its history With the increase of wealth they live for the moment they are incapable of sacrificing the enjoyment of the hour to the service of great

conceptions and close their eyes complacently to the duties of our future and to the pressing problems of international life which await a solution at the present time We have been capable of soaring upwards Mighty deeds raised Germany from political disruption and feebleness to the forefront of European nations But we do not seem willing to take up this inheritance and to advance along the path of development in politics and culture We tremble at our own greatness and shirk the sacrifices it demands from us Yet we do not wish to renounce the claim which we derive from our glorious past How rightly Fichte once judged his countrymen when he said the German can never wish for a thing by itself he must always wish for its contrary also The Germans were formerly the best fighting men and the most warlike nation of Europe For a long time they have proved themselves to be the ruling people of the Continent by the power of their arms and the loftiness of their ideas Germans have bled and conquered on countless battlefields in every part of the world and in late years have shown that the heroism of their ancestors still lives in the descendants In striking contrast to this military aptitude they have to day become a peace loving an almost too peace loving nation A rude shock is needed to awaken their warlike instincts and compel them to show their military strength

Germany and the Next War Friedrich Von Bernhardi, 2019-11-12 Since 1795 when Immanuel Kant published in his old age his treatise on Perpetual Peace many have considered it an established fact that war is the destruction of all good and the origin of all evil In spite of all that history teaches no conviction is felt that the struggle between nations is inevitable and the growth of civilization is credited with a power to which war must yield But undisturbed by such human theories and the change of times war has again and again marched from country to country with the clash of arms and has proved its destructive as well as creative and purifying power It has not succeeded in teaching mankind what its real nature is Long periods of war far from convincing men of the necessity of war have on the contrary always revived the wish to exclude war where possible from the political intercourse of nations Friedrich Adam Julius von Bernhardi was a Prussian general and military historian He was a best selling author prior to World War I A militarist he is perhaps best known for his bellicose book Deutschland und der N chste Krieg printed in 1911

Germany and the Next War Friedrich von Bernhardi, 2017-08-06 This work is most famous for its apotheosis of war War is a biological necessity of the first importance a regulative element in the life of mankind which cannot be dispensed with since without it an unhealthy development will follow which excludes every advancement of the race and therefore all real civilization but polemic aside it most useful as an indication of how the German General Staff viewed the modernization of the armed forces in the run up to the first World War

Germany and the Next War Friedrich von Bernhardi, 2015-06-15 Excerpt from Germany and the Next War All the patriotic sections of the German people were greatly excited during the summer and autumn of 1911 The conviction lay heavy on all hearts that in the settlement of the Morocco dispute no mere commercial or colonial question of minor importance was being discussed but that the honour and future of the German nation were at stake A deep rift had opened between the feeling of the nation and the diplomatic action of the Government Public opinion which was clearly in

favour of asserting ourselves did not understand the dangers of our political position and the sacrifices which a boldly outlined policy would have demanded I cannot say whether the nation which undoubtedly in an overwhelming majority would have gladly obeyed the call to arms would have been equally ready to bear permanent and heavy burdens of taxation Haggling about war contributions is as pronounced a characteristic of the German Reichstag in modern Berlin as it was in medieval Regensburg These conditions have induced me to publish now the following pages which were partly written some time ago Nobody can fail to see that we have reached a crisis in our national and political development At such times it is necessary to be absolutely clear on three points the goals to be aimed at the difficulties to be surmounted and the sacrifices to be made About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

But the devastation feared in 1938 during the Munich Crisis when gas masks were distributed and hundreds of thousands fled London was far in excess of the damage wrought by the Luftwaffe during the Blitz in 1940 and 1941 as terrible as that was The knock out blow then was a myth But it was a myth with consequences For the first time *The Next War in the Air* reconstructs the concept of the knock out blow as it was articulated in the public sphere the reasons why it came to be so widely accepted by both experts and non experts and the way it shaped the responses of the British public to some of the great issues facing them in the 1930s from pacifism to fascism Drawing on both archival documents and fictional and non fictional publications from the period between 1908 when aviation was first perceived as a threat to British security and 1941 when the Blitz ended and it became clear that no knock out blow was coming *The Next War in the Air* provides a fascinating insight into the origins and evolution of this important cultural and intellectual phenomenon Britain's fear of the bomber
