*Germany, from the Earliest Period, Vol. 1 of 4 (Classic Reprint)* Wolfgang Menzel,2015-07 Excerpt from Germany From the Earliest Period Vol 1 of 4 The Romans regarded the forests of Germany with superstitious dread There were said to be gigantic trees which when hollowed into boats held thirty men and through the arches formed by their projecting roots a horseman could ride at full speed The buffalo the bison and the elk once numerous in these wilds have now totally disappeared and the bears whose skins were the chief article of the dress of our forefathers the wolves boars and innumerable other large game daily become more scarce The country possessed neither towns roads nor bridges and it is easily conceivable that dissatisfied with their meagre forest fare the people continually migrated to and took possession of the fruitful lands of neighbouring nations Solitude created a desire or romantic longing in the breast of the ancient inhabitant of these wilds for what was distant and unknown whilst the habits of the chase rendered him enterprising and hardy The laws founded upon personal freedom the virtuous manners and cheerful temperament of the ancient German originated in

those mighty wastes where forced to trust to his own resources man necessarily became independent and was secure from the corruption incidental to crowded communities These wild forests also attached an idea of the marvellous so novel to the Romans to the character of the German who trained to war by the habits of the chase associated piety with ferocity and would still listen to the secret voice of Nature in the mysterious whisperings of the forest now disposing him to deep musings now creating strange forebodings which were recognised as true prophetic inspiration in the women and maidens About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

**Europe** Norman Davies, 1996 From the Ice Age to the Cold War and beyond from Reykjavik to Riga from Archimedes to Einstein Alexander to Yeltsin here between the covers of a single volume Norman Davies tells the story of Europe East and West from prehistory to the present day The book's absorbing narrative lays down the chronological and geographical grid on which the dramas of European history have been played out It zooms in from the distant focus of Chapter One which explores the first five million years of the continent's evolution to the close focus of the last two chapters which cover the twentieth century at roughly one page per year In between Norman Davies presents a huge and sweeping canvas packed with fascinating detail analysis and anecdote Alongside Europe's better known stories human national and continental he brings into focus areas often ignored or misunderstood remembering the stateless nation as well as the nation state Minority communities from heretics and lepers to Jews Romanies and Muslims have not been forgotten This masterly history reveals not only the rich variety of Europe's past but also the many and rewarding prisms through which it can be viewed Each chapter contains a selection of telephoto capsules illustrating narrower themes and topics that cut across the chronological flow Davies then concludes with a wide angle snapshot of the whole continent as seen from one particular vantage point The overall effect is stunning a kind of historical picture album with panoramic tableaux interspersed by detailed insets and close ups Never before has such an ambitious history of Europe been attempted In range and ambition the originality of its structure and glittering style Norman Davies's Europe represents one of the most important and illuminating history books to be published by Oxford Time Capsules 201 fascinating articles interspersed throughout the narrative focus on incidents or topics as various as The Iceman of the Alps Erotic Graffiti at Pompeii Stradivarius and Psychoanalysing Hitler Each capsule can be tasted as a separate self contained morsel or can be read in conjunction with the narrative into which it is inserted Snapshots 12 panoramic overviews across the changing map of Europe freeze the frames of the chronological narrative at moments of symbolic importance such as Knossos 1628 BC Constantinople AD 330 and

Nuremberg 1945 A fully illustrated history Incorporates over 100 superbly detailed maps and diagrams and 32 pages of black and white plates *Modern Tariff Policies with Special Reference to China* Ting Mien Liu, 1924 *Theology as Science in Nineteenth-Century Germany* Johannes Zachhuber, 2013-10-03 This study describes the origin development and crisis of the German nineteenth century project of theology as science Its narrative is focused on the two predominant theological schools during this period the Tbingen School and the Ritschl School Their work emerges as a grand attempt to synthesize historical and systematic theology within the twin paradigms of historicism and German Idealism Engaging in detail with the theological historical and philosophical scholarship of the story s protagonists Johannes Zachhuber reconstructs the basis of this scholarship as a deep belief in the eventual unity of human knowledge This idealism clashed with the historicist principles underlying much of the scholars actual research The tension between these paradigms ran through the entire period and ultimately led to the disintegration of the project at the end of the century Drawing on a wealth of primary sources many of which have never been used in English speaking scholarship before Zachhuber embeds the essentially theological story he presents within broader intellectual developments in nineteenth century Germany In spite of its eventual failure the project of theology as science in nineteenth century Germany is here described as a paradigmatic intellectual endeavour of European modernity with far reaching significance beyond the confines of a single academic discipline
