Germany's path from enmity to amity by focusing on the behavior of individual leaders, governments and non-governmental actors. The book demonstrates that at least in the cases of France, Israel, Poland and Czechoslovakia, the Czech Republic, Germany has gone far beyond banishing war with its former enemies; it has institutionalized active friendship. The German experience is now a model of its own, offering lessons for other cases of international reconciliation. Gardner Feldman concludes with an initial application of German reconciliation insights to the other principal post-World War II pariah, as Japan expands its relations with China and South Korea.

About Europe Denis Guénoun, 2013-02-20

The concept of the universal was born in the lands we now call Europe, yet it is precisely the universal that is Europe's undoing. All European politics is caught in a tension to assert a European identity is to be open to multiplicity, but this very openness could dissolve Europe as such. This book reflects on Europe and its changing boundaries over the span of twenty centuries. A work of philosophy, it consistently draws on concrete events. From ancient Greece and Rome to Christianity to the Reformation to the national revolutions of the twentieth century, what we today call Europe has been a succession of projects in the name of ecclesia or community. Empire, Church and EU all have been constructed in contrast to an Oriental other. The stakes of Europe then are as much metaphysical as political. Redefining a series of key concepts such as world, place, transportation and the common, this book sheds light on Europe as process by engaging with the most significant philosophical debates on the subject, including the work of Marx, Husserl, Heidegger, Patočka and Nancy.
