Geomorphology In The Tropics A Study Of Weathering And Denudation In Low Latitudes:

Geomorphology in the Tropics Michael F. Thomas, 1994-07-19 This source book has been designed for students of tropical environments who already have some knowledge of geomorphology and related Earth sciences It explores the special characteristics of the tropics and their impact on the balance of forces and materials within denudation systems

Geomorphology of the Tropics Alfred Wirthmann, 2013-04-17 Geomorphological research in the humid to seasonal tropics has primarily concentrated on the most characteristic landform assemblage of this zone namely that of stepped largely undissected etchplains often dotted with inselbergs and cutting across ancient basement rocks Although the author discusses extensively this subject he puts particular emphasis on the differences of chemical weathering and land forming processes on rocks of various lithology and structure This contrast becomes most evident when comparing the highly resistant quartzitic sediments often covering the basement rocks with the easily weathered volcanics e g the Deccan traps of India The book was first published in German in 1987 However the present version is much more than a translation encompassing a range of new ideas and findings in the field of tropical geomorphology The number of maps and illustrations has also been increased

IAEG/AEG Annual Meeting Proceedings, San Francisco, California, 2018 - Volume 1 Abdul Shakoor, Kerry Cato, 2018-08-25 This book is one out of six IAEG XIII Congress and AEG 61st Annual Meeting proceeding volumes and deals with topics related to slope stability including case histories landslide mapping and emerging technologies The theme of the IAEG AEG Meeting held in San Francisco from September 17 21 2018 is Engineering Geology for a Sustainable World The meeting proceedings analyze the dynamic role of engineering geology in our changing world The meeting topics and subject areas of the six volumes are Slope Stability Case Histories Landslide Mapping Emerging Technologies Geotechnical and Environmental Site Characterization Mining Aggregates Karst Dams Tunnels Groundwater Resources Climate Change Geologic Hazards Earthquakes Land Subsidence Coastal Hazards and Emergency Response and Advances in Engineering Geology Education Soil and Rock Properties Modeling Guidelines for Surveying Soil and Land Resources NJ McKenzie, MJ Grundy, R Webster, AJ Ringrose-Voase, 2008-04-07 Guidelines for Surveying Soil and Land Resources promotes the development and implementation of consistent methods and standards for conducting soil and land resource surveys in Australia These surveys are primarily field operations that aim to identify describe map and evaluate the various kinds of soil or land resources in specific areas The advent of geographic information systems global positioning systems airborne gamma radiometric remote sensing digital terrain analysis simulation modelling efficient statistical analysis and internet based delivery of information has dramatically changed the scene in the past two decades As successor to the Australian Soil and Land Survey Handbook Guidelines for Conducting Surveys this authoritative guide incorporates these new methods and techniques for supporting natural resource management Soil and land resource surveyors engineering and environmental consultants commissioners of surveys and funding agencies will benefit from the practical information provided on how best

to use the new technologies that have been developed as will professionals in the spatial sciences such as geomorphology ecology and hydrology

Guidelines for Surveying Soil and Land Resources Neil McKenzie, 2008 Provides guidelines to promote the development and implementation of consistent methods and standards for conducting soil and land resource surveys in Australia

Gondwana Landscapes in southern South America Jorge Rabassa, Cliff Ollier, 2014-04-11 This book presents extensive and new information on the geomorphology of cratonic areas of southern South America It includes valuable data relating to recurrent controversies in general geomorphology beyond the boundaries of South America and reveals the great need to integrate many different aspects of geomorphology in regional studies With the focus on ancient landscapes and especially on planation surfaces it addresses the question of what processes could form such huge features and how they can be preserved for so long Many of the papers include maps of planation surfaces or other geomorphic units The volume brings together an up to date state of the art collection of information on South American geomorphology and shows beyond doubt that geomorphology is on the same time scale as global tectonics biological evolution and major climate change Some of the papers describe ancient geomorphological features of areas that have never been studied or published before while others describe regions which are totally unknown to the public The scope of the book extends from tropical latitudes north of the Tropic of Capricorn south to freezing Patagonia in the roaring fifties more than 3 500 km from north to south Including over one thousand citations from geological and geomorphological literature this volume will serve as a starting point for a whole new phase of studies of the fascinating landscape history of southern South America

The Quaternary in the Tropics Klaus Heine, 2024-07-22 The Ice Age Quaternary is a period of extreme climate fluctuations that led to the growth and melting of massive ice sheets in the high latitudes Tropical deserts savannas rainforests and mountainous regions experienced equal dramatic climatic changes of which the traces are preserved in sedimentary deposits The knowledge of tropical climate history is of paramount importance because in the tropics and marginal tropics natural and more recently human induced processes significantly control global climate Yet relatively few palaeoclimate records are known from these regions This book presents the climate archives of the tropics and critically discusses their palaeoclimatic informative value Based on decades of research the author demonstrates that a lack of geocological knowledge leads to misinterpretations in modeling climate futures The results presented here call for a correction of many widely held views about the role of atmospheric greenhouse gases in global warming over the past 150 years The book is intended for natural scientists of all disciplines who are looking for a synopsis of the problem area Our climate in the past present and future in the tropics

Interpreting Soil Test Results Pam Hazelton, Brian Murphy, 2016-11-01 Interpreting Soil Test Results is a practical reference enabling soil scientists environmental scientists environmental engineers land holders and others involved in land management to better understand a range of soil test methods and interpret the results of these tests It also contains a comprehensive description of the soil properties relevant to many environmental and natural land resource issues

and investigations This new edition has an additional chapter on soil organic carbon store estimation and an extension of the chapter on soil contamination It also includes sampling guidelines for landscape design and a section on trace elements The book updates and expands sections covering acid sulfate soil procedures for sampling soils levels of nutrients present in farm products soil sodicity salinity and rainfall erosivity It includes updated interpretations for phosphorus in soils soil pH and the cation exchange capacity of soils Interpreting Soil Test Results is ideal reading for students of soil science and environmental science and environmental engineering professional soil scientists environmental scientists engineers and consultants and local government agencies and as a reference by solicitors and barristers for land and environment cases

Anthropogenic Tropical Forests Noboru Ishikawa, Ryoji Soda, 2019-11-06 The studies in this volume provide an ethnography of a plantation frontier in central Sarawak Malaysian Borneo Drawing on the expertise of both natural scientists and social scientists the key focus is the process of commodification of nature that has turned the local landscape into anthropogenic tropical forests Analysing the transformation of the space of mixed landscapes and multiethnic communities driven by trade in forest products logging and the cultivation of oil palm the contributors explore the changing nature of the environment multispecies interactions and the metabolism between capitalism and nature The project involved the collaboration of researchers specialising in anthropology geography Southeast Asian history global history area studies political ecology environmental economics plant ecology animal ecology forest ecology hydrology ichthyology geomorphology and life cycle assessment Collectively the transdisciplinary research addresses a number of vital questions How are material cycles and food webs altered as a result of large scale land use change How have new commodity chains emerged while older ones have disappeared What changes are associated with such shifts What are the relationships among these three elements commodity chains material cycles and food webs Attempts to answer these questions led the team to go beyond the dichotomy of society and nature as well as human and non human Rather the research highlights complex relational entanglements of the two worlds abruptly and forcibly connected by human induced changes in an emergent and compelling resource frontier in maritime Southeast Asia Chapters Commodification of Nature on the Plantation Frontier and Into a New Epoch The Plantationocene are available open access under a Creative Commons Attribution NonCommercial NoDerivatives 4.0 International License via link.springer.com

Principles and Practice of Soil Science Robert E. White, 2013-05-06 Principles and Practice of Soil Science Fourth Edition provides a current and comprehensive introduction to soil science for students in the fields of environmental and agricultural science ecology soil and land management natural resource management and environmental engineering Covers all aspects of soil science including soil habitat processes in the soil environment and soil management Emphasizes the applications of soil science to the solution of practical problems in soil and land management Highlights real world examples drawn from the author's international experience in the field Includes an expanded colour section of soil profiles and other features and greater coverage of international soil classification Features

new problem sets and questions at the end of each chapter designed to reinforce important principles An answer key is provided at the end of the text Artwork from the book is available to instructors online at www.blackwellpublishing.com white

Uplift, Erosion and Stability Bernard J. Smith, W. B. Whalley, Patricia A. Warke, 1999 **Climate without Nature** Andrew M. Bauer, Mona Bhan, 2018-03-15 The Anthropocene narrative reproduces an ideological divide between Society and Nature and forecloses an inclusive politics of global warming

2D Electrical Imaging Assessment for Geotropical Region Issues (Penerbit USM) Rosli Saad, Muhammad Sabiu Bala, 2019-10-30 This book aims to impart knowledge on tropical climate towards engineering and environmental field and 2D resistivity method in general It is written in its simplest way illustrated by examples and illustrations to enhance readers understanding of the general concepts and governing theories relating to electrical methods and how they are applied to solve problems affecting the subsurface of the tropical regions The discussion centres around the common problems detection using geophysical method of 2D resistivity reliability of the method to depicts the subsurface and solutions to overcome the problems related to tropical region Examples of 2D resistivity survey in various fields were presented in this book including structural geology groundwater exploration mineral prospecting and quarry management Others are seawater intrusion land subsidence geoenvironment and environmental hazards This book is suitable as a reference and companion to geophysics students professional geophysicists geologists and civil engineers as well as personnel involved in subsurface electrical works

The Physical Geography of Brazil André Augusto Rodrigues Salgado, Leonardo José Cordeiro Santos, Julio César Paisani, 2019-01-29 This book presents the Brazilian natural space and environment It describes the main environmental aspects of Brazil in relation to geology climate geomorphology vegetation fauna water resources and environmental issues The book presents a beautifully illustrated overview of the physical geography of the Amazon Forest the central Brazilian savannah Cerrado the Cacaos Forest the semi arid area Caatinga the Atlantic Forest area the Pantanal Brazilian wetlands the Araucarias Plateau the Pampas area South grasslands and the Brazilian Coastal Environment beaches and mangroves

Encyclopedia of Environmental Change John A Matthews, 2013-12-13 Accessibly written by a team of international authors the Encyclopedia of Environmental Change provides a gateway to the complex facts concepts techniques methodology and philosophy of environmental change This three volume set illustrates and examines topics within this dynamic and rapidly changing interdisciplinary field The encyclopedia includes all of the following aspects of environmental change Diverse evidence of environmental change including climate change and changes on land and in the oceans Underlying natural and anthropogenic causes and mechanisms Wide ranging local regional and global impacts from the polar regions to the tropics Responses of geo ecosystems and human environmental systems in the face of past present and future environmental change Approaches methodologies and techniques used for reconstructing dating monitoring modelling projecting and predicting change Social economic and political dimensions of environmental issues environmental conservation and management and environmental

Dynamics of Forest Ecosystems in Central Africa During the Holocene: Past - Present - Future J. Runge, 2014-04-21 Bringing together experts from several disciplines this volume collects the best papers presented at the international workshop on Environmental and Cultural Change in West and Central Africa held in Cameroon March 2006 Problems of Holocene and Late Pleistocene modifications of the rain forest savanna fringe and their possible influence on cultural innovations are discussed This is an important resource for those concerned with tropical forests and related development problems of third world countries It is an excellent source of information for new original manuscripts on the topic of Late Pleistocene and Holocene landscape evolution in the lower latitudes of Africa

Principles of Sustainable Soil Management in Agroecosystems Rattan Lal, B.A. Stewart, 2013-06-10 With the use of high level soil management technology Africa could feed several billion people yet food production has generally stagnated since the 1960s No matter how powerful the seed technology the seedling emerging from it can flourish only in a healthy soil Accordingly crop yields in Africa South Asia and the Caribbean could be doubled or tripled through adoption of technologies based on laws of sustainable soil management Principles of Sustainable Soil Management in Agroecosystems describes the application of these laws to enhance ecosystem services while restoring degraded soils and promoting sustainable use With chapters contributed by world class soil scientists ecologists and social scientists this book outlines critical changes in management of agricultural soils necessary to achieve food security and meet the food demands of the present and projected future population These changes include conversion to no till and conservation agriculture adoption of strategies of integrated nutrient management water harvesting and use of drip sub irrigation complex cropping farming systems such as cover cropping and agroforestry and use of nano enhanced fertilizers The book is based on the premise that it is not possible to extract more from a soil than what is put into it without degrading its quality The strategy is to replace what is removed respond wisely to what is changed and be pro active to what may happen because of natural and anthropogenic perturbations The chapters which exemplify these ideas cover a range of topics including organic farming soil fertility crop symbiotic soil microbiota human driven soil degradation soil degradation and restoration carbon sink capacity of soils soil renewal and sustainability and the marginality principle

Kankpénandja, 2020-09-10 This book presents the outcome of an interdisciplinary and international workshop supported by the Volkswagen Stiftung funding line Knowledge for Tomorrow on the topic of Natural Resources Socio Ecological Sensitivity and Climate Change in the Volta Oti Basin West Africa The conference was jointly organised by Goethe University Frankfurt Germany and the University of Kara Togo held from March 6 to 8 2019 in northern Togo It aimed to strengthen capacities of junior scientists from the sub region exchange and mobilise theoretical and methodological background from various scientific fields Botany Construction Geology Geography Infrastructure Politics Remote Sensing Sociology and Urban Planning One goal was to deliver reliable elements for ongoing and profound environmental analyses that lie outside the common questions of the academic and civil society stakeholders Ecosystem fragmentation and deforestation in West Africa are mainly triggered by humans such as agriculture and small scale forest disturbances for charcoal and firewood production Increasing population pressure declining of carrying capacity and demand for agricultural land caused the reduction of land conservation capacities even in protected areas The complexity of interactions between environmental and socio ecological systems and subsequent effects sensitivity has raised ongoing international awareness in light of ongoing climate change By the example of natural resources land use and stakeholders perceptions within the Volta Oti Basin the book's proceedings present discuss and distribute new findings that will sustainably stimulate the international debate The workshop also intended to overcome national borders and language barriers between the Anglophone Ghana and the Francophone Benin Burkina Faso Ivory Coast Togo research communities and supported better West African cooperation and networking The young as well as the established partners formed new collaborations and the event at the University of Kara Togo was a truly unique opportunity for all involved not only to discuss science but also to assess applied and best future management practices for the Oti Volta Basin in West Africa

***Reconceptualizing the Archaeology of Southern India* Peter Johansen, Andrew M. Bauer, 2024-09-16** This book presents a paradigm shift in the long term study of South India's deep history It refuses the disciplinary constraints of history and prehistory and interrogates the archaeological and textual records of the Deccan to disrupt its conventional archaeological periodizations which have tended to reify and dehistoricize social and cultural differences This book draws on over 20 years of original archaeological research from the southern Deccan region of India to critically reappraise the historiography that has framed its deep history It fundamentally questions conventional archaeological paradigms rooted in early colonial scholarship which have structured interpretations of deep time with curiously ahistorical narratives of the past This volume offers a more nuanced assessment of historical changes across a diversity of cultural social and political practices through the novel application of theoretical framings to archaeological and historical data including political ecology techno politics resource materialities and landscape production

This book will interest an interdisciplinary audience of graduate and undergraduate students and professional academics primarily in the fields of archaeology history and South Asian studies Its theoretical interventions will also be of interest to those invested in the anthropology and the archaeology of politics chronology historicity historiography materiality and landscapes
