policy studies showing how since 1990 the EU has enlarged to include Finland Sweden Estonia Latvia Lithuania and Poland and also incorporated the former East Germany He also examines how this northern expansion has led the EU to reflect on relations with Russia and its north western regions This unique study includes a fresh approach to the under theorized field of EU foreign policy key empirical material including hundreds of documents interviews and field experiments in depth case studies of relations between the EU Nordic states Baltic states and Russia with its north western regions This is essential reading for all students of European politics Russian studies and international relations

The European Union as a Global Actor Charlotte Bretherton, John Vogler, 2002-06-01 First published in 2002 Routledge is an imprint of Taylor Francis an informa company

NATO's Security Discourse After the Cold War Andreas Behnke, 2013 This book provides a critical investigation into the discursive processes through which the North Atlantic Treaty Organisation NATO reproduced a geopolitical order after the end of the Cold War and the demise of its constitutive enemy the Soviet Union

EU and NATO Relations with Russia Glenn Diesen, 2016-03-09 Do the EU and NATO threaten Russian security The book explores the rise of these exclusive inter democratic security institutions after the collapse of the Soviet Union and the ensuing effects on relations with Russia Two competing theories are tested to explore whether these institutions aggravate or mitigate the security dilemma with Russia These institutions can be theorised to promote security as a positive sum game through European integration and democracy promotion or pursue collective hegemony with ideologically uncompromising bloc politics Glenn Diesen argues that a European security architecture that demotes the largest state on the continent to an object of security inevitably results in European integration becoming a zero sum geopolitical project that has set the West on a collision course with Russia

Russia as a Great Power Jakob Hedenskog, Vilhelm Konnander, Bertil Nygren, Ingmar Oldberg, Christer Pursiainen, 2013-07-04 After a period of relative weakness and isolation during most of the 1990s Russia is again appearing as a major security player in world politics This book provides a comprehensive assessment of Russia s current security situation addressing such questions as What kind of player is Russia in the field of security What is the essence of its security policy What are the sources capabilities and priorities of its security policy What are the prospects for the future One important conclusion to emerge is that while Russian foreign policy under Putin has become more pragmatic and responsive to both problems and opportunities the growing lack of checks and balances in domestic politics makes political integration with the West difficult and gives the president great freedom in applying Russia s growing power abroad

Mapping European security after Kosovo Peter Van Ham, Sergei Medvedev, 2018-07-30 This electronic version has been made available under a Creative Commons BY NC ND open access license In the story of post Cold War conceptual confusion the war in and over Kosovo stands out as a particularly interesting episode This book provides new and stimulating perspectives on how Kosovo has shaped the new Europe It breaks down traditional assumptions in the field of security studies by sidelining the theoretical worldview that underlies mainstream strategic thinking on recent events in Kosovo The

book offers a conceptual overview of the Kosovo debate placing these events in the context of globalisation European integration and the discourse of modernity and its aftermath It then examines Kosovo s impact on the idea of war One of the great paradoxes of the war in Kosovo was that it was not just one campaign but two there was the ethnic cleansing campaign in Kosovo and the allied bombing campaign against targets in Kosovo and all over Serbia Serbia s killing of Kosovo has set the parameters of the Balkanisation integration nexus offering Europe and the West in general a unique opportunity to suggest itself as the strong centre that keeps the margins from running away Next it investigates Kosovo as a product of the decay of modern institutions and discourses like sovereignty statehood the warring state or the United Nations system Kosovo has introduced new overtones into the European Weltanschauung and the ways in which Europe asserts itself as an independent power discourse in a globalising world increasingly diffident looking for firm foundations in the conceptual void of the turn of the century

Energy Security Sanam S. Haghighi,2007-08-31 This book offers the first comprehensive assessment of the various internal and external measures undertaken by the European Union to guarantee security of oil and gas supply It sets out and analyses in a coherent and thorough manner those aspects of EU external policy that are relevant in establishing a framework for guaranteeing energy security for the Union What makes the book unique is that it is the first of its kind to bridge the gap between EU energy and EU external policy The book discusses EU policy towards the major oil and gas producing countries of Russia the Mediterranean and the Persian Gulf at the bilateral as well as regional and multilateral level It brings together not only the dimensions of trade and investment but also other important aspects of external policy namely development and foreign policy The author argues that the EU s energy security cannot be achieved through adopting a purely internal approach to energy issues but that it is necessary to adopt a holistic approach to external policy covering efficient economic relations as well as development co operation and foreign policies towards energy producing countries The book will be a valuable resource for students of EU law WTO law or international energy law as well as scholars and practitioners dealing with energy issues

Theory and Reform in the European Union Dimitris N. Chrysoschoou,1999-06-12 Completely updated and newly available in paperback this book examines the relationship between theory and reform in the European Union in the light of the Amsterdam Treaty

Europe as the Western Peninsula of Greater Eurasia Glenn Diesen,2021-09-27 Will the increased economic connectivity across the Eurasian supercontinent transform Europe into the western peninsula of Greater Eurasia The unipolar era entailed the US organising the two other major economic regions of the world Europe and Asia under US leadership The rise of the rest primarily Asia with China at the centre has ended the unipolar era and even 500 years of Western dominance China and Russia are leading efforts to integrate Europe and Asia into one large region The Greater Eurasian region is constructed with three categories of economic connectivity strategic industries built on new and disruptive technologies physical connectivity with bimodal transportation corridors and financial connectivity with new development banks trading currencies and payments systems

China strives for geoeconomic leadership by replacing the US leadership position while Russia endeavours to reposition itself from the dual periphery of Europe and Asia to the centre of a grand Eurasian geoeconomic constellation Europe positioned between the trans Atlantic region and Greater Eurasia has to adapt to the new international distribution of power to preserve its strategic autonomy

Pushing Back the Boundaries

Mike Mannin,1999 Missionary families were an integral component of the missionary enterprise both as active agents on the global religious stage and as a force within the enterprise that shaped understandings and theories of mission itself Taking the family as a legitimate unit of historical analysis in its own right for the first time Missionary families traces changing familial policies and lived realities throughout the nineteenth century and powerfully argues for the importance of an historical understanding of the missionary enterprise informed by the complex interplay between the intimate the personal and the professional By looking at marriage parenting and childhood along with professionalism vocation and domesticity this first in depth study of missionary families reveals their profound importance to the missionary enterprise and concludes that mission history can no longer be written without attention to the personal emotional and intimate aspects of missionary lives

Gariup,2017-05-15 Grounded on tenets of cultural realism and social constructivism Monica Gariup develops a theoretical framework to enhance our understanding of security culture at the European Union level She employs tools from political theory linguistic analysis and international relations theory to examine the implications of discourse and practice in European Security and Defense Policy ESDP Innovative in scope the volume analyzes whether elaborating a structurationist solution and proposing a discursive syntax of security makes it possible to identify and compare different types of security actors Providing a comprehensive and objective analysis on the links and implications between the discourse and actual policy of the ESDP this is essential reading for scholars and researchers in European politics international relations security and cultural studies

Governmentality in EU External Trade and Environment Policy Jessica Lawrence,2018-02-07

Governmentality and EU External Trade and Environment Policy applies theories drawn from Foucauldian governmentality studies to investigate the ideological and political roots of the European Union EU s external trade and environmental policy and their effects on the transnational legal landscape The EU s desire to spread environmental norms abroad is viewed in the book as a significant feature of contemporary EU trade policy The EU s activities in this area have not been uncontroversial for other transnational legal actors States individuals and organizations have challenged the EU s various trade and environment policies arguing that they are coercive unfair over reaching or inefficient Meanwhile these policies have also raised a number of questions from the perspective of legality and political theory This book considers what the practice of EU external trade and environment policy and international resistance to it tells us about the way the EU perceives the role and limits of transnational government the means and ends of politics and the drivers of human and institutional behavior Jessica Lawrence examines the legal and political discourse of the EU and those affected by its policies By studying legal cases

statements by officials legislative texts press releases and other representative documents the book identifies the rationalities technologies and subjectivities that underlie contemporary EU activity in this area The overall effect paints a more complicated and nuanced picture of the EU's vision of itself and its goals one that ultimately seeks to provide a better understanding of the functioning of power in this area **Governing Europe** Jens Henrik Haahr, William

Walters, 2004-08-02 This book uses post structuralist theories of power and discourse to study European integration and the associated forms of governance The European Union's Influence in Central Asia Olga Alinda Spaiser, 2018-03-12

Unknown yet highly strategic Central Asia attracts the interest of major global powers due to its vast energy resources and crucial geographic position Russia China and the European Union view this region as an indispensable springboard to enhance their political and economic influence on the Eurasian landmass Thus facing strong competition and working on low budget the EU is attempting to establish itself as a relevant and influential actor in an environment in which its leadership role is far from certain Unlike in other post communist regions the EU is not able to rely on the attractiveness of its political models and risks being marginalized by other global powers The crucial question then is How does the EU exert influence in such a challenging geopolitical context Which strategies does the EU apply to be an actor who counts Through an analysis of the EU's discourse instruments and the reception of its policies in Central Asia this study argues that the EU consciously takes the position of a second tier actor who acts as a consultant and projects a picture of itself as an honest broker with no geopolitical agenda The EU's influence is confined to niche domains in the security sphere that are nevertheless important for the regional security The EU is not a great power in the region nor is it willing to become one It does however have comparative advantages in being perceived as inoffensive and for occupying areas that are neglected by the other actors such as governance and water security Cultures of Border Control Ruben Zaiotti, 2011-04 In recent years a number of European countries abolished national border controls in favor of Europe's external frontiers In doing so they challenged long established conceptions of sovereignty territoriality and security in world affairs Setting forth a new analytic framework informed by constructivism and pragmatism Ruben Zaiotti traces the transformation of underlying assumptions and cultural practices guiding European policymakers and postnational Europe shedding light on current trends characterizing its politics and relations with others The book also includes a fascinating comparison to developments in North America where the United States has pursued more restrictive border control strategies since 9 11 As a broad survey of the origins evolution and implications of this remarkable development in European integration Cultures of Border Control will be of interest to students and scholars of international relations and political geography **Russia after the Cold War** Mike

Bowker, Cameron Ross, 2014-06-17 In Russia after the Cold War the editors provide an accessible and comprehensive survey of the state of Russia at the end of the twentieth century as it seeks to come to terms with its new status in the world community the pressures and tensions arising from economic and social change and with the problems of ensuring a
