Geopolitics of Antarctica Klaus Dodds, 1997 Recent controversies over the political and environmental management of the Antarctic ensure that it will remain an important global issue Drawing on recent developments in critical geopolitics and cultural geography Klaus Dodds examines the six major nations of the Southern hemisphere currently involved in the Antarctic Each of these nations Argentina Australia Chile India New Zealand and South Africa claims a natural interest in the future of the polar continent Geopolitics in Antarctica presents a detailed exploration of the rhetoric and politics behind each of these claims arguing that they are often based on

uncritical understandings of territory geographical proximity and national identity The book concludes with an examination of how geographical understandings of the Antarctic continue to influence the management of the frozen continent and Southern Ocean **Geopolitics** Bert Chapman,2011-04-07 This concise introduction to the growth and evolution of

geopolitics as a discipline includes biographical information on its leading historical and contemporary practitioners and detailed analysis of its literature An important book on a topic that has been neglected for too long Geopolitics A Guide to the Issues will provide readers with an enhanced understanding of how geography influences personal national and international economics politics and security The work begins with the history of geopolitics from the late 19th century to the present then discusses the intellectual renaissance the discipline is experiencing today due to the prevalence of international security threats involving territorial airborne space based and waterborne possession and acquisition The book emphasizes current and emerging international geopolitical trends examining how the U S and other countries including Australia Brazil China India and Russia are integrating geopolitics into national security planning It profiles international geopolitical scholars and their work and it analyzes emerging academic military and governmental literature including gray literature and social networking technologies such as blogs and Twitter *A Wise Adventure* Malcolm Templeton,2000 This is the story of how

New Zealand s attitude to its wedge shaped slice of Antarctica moved gradually over forty years from one of near neglect to one of active involvement in the negotiation of an international regime designed to protect the southernmost continent from political rivalries and potential damage to the fragile environment *Making Settler Colonial Space* Tracey Banivanua Mar,P. Edmonds,2010-05-07 Charts the making of colonial spaces in settler colonies of the Pacific Rim during the last two centuries Contributions journey through time place and region and piece together interwoven but discrete studies that illuminate transnational and local experiences violent ideological and cultural that produced settler colonial space

Tourism and Change in Polar Regions C. Michael Hall,Jarkko Saarinen,2010-07-15 Explores the relationship between tourism and climate change in both Arctic and Antarctic polar regions by considering the associated environmental economic social and political factors This book draws on both Arctic and Antarctic Polar region case studies to help illustrate these climate change issues **Frozen Empires** Adrian Howkins,2017 Frozen Empires is a study of the ways in which imperial

powers American European and South American have used and continue to use the environment and the value of scientific research to support their political claims in the Antarctic Peninsula region In making a case for imperial continuity this book offers a new perspective on Antarctic history and on global environmental politics more broadly **Globalizing Polar**

Science R. Launius,J. Fleming,D. DeVorkin,2010-11-22 The International Polar Years and the International Geophysical Year represented a remarkable international collaborative scientific effort that has been largely neglected by historians This groundbreaking collection seeks to redress that neglect and illuminate critical aspects of the last 150 years of international scientific endeavour Antarctic Security in the Twenty-first Century Alan D. Hemmings,Donald Rothwell,Karen N.

Scott, 2012 The Antarctic Treaty 1959 was adopted for the purpose of bringing peace and stability to the region and to facilitate cooperation in scientific research conducted on and around the continent. It has now been over fifty years since the Antarctic Treaty's entry into force; nevertheless, security continues to both drive and shape the legal and policy regime which applies to Antarctica. This book explores a wide range of Antarctic and Southern Ocean issues through the lens of security. The contributions to this volume engage with a security discourse which has expanded beyond the traditional military domain to include notions of economic security, environmental security, food security, bio security, health security, and human security. The chapters consider topics such as the implications for Antarctica and the Southern Ocean of the growing strategic competition between the rising powers of Asia, the possible effects of climate change on the authority, legitimacy, and effectiveness of the Antarctic Treaty System, and the shift from strategic security to human security and its potential consequences for the Antarctic treaty regime.

Pink Ice Klaus Dodds, 2002-08-23 *Pink Ice* tells the compelling story of the political struggles over Antarctica and the South Atlantic. It shows how Britain and Argentina have sought to invest these thinly populated spaces, composed mostly of ice, rock, and water, with cultural and national importance. The author, who has interviewed leading politicians and civil servants including Lord Carrington, Lord Owen, Lord Chalfont, Lord Hurd, and Lord Shackleton, demonstrates how political rivalries may be played out in other competitive arenas such as World Cup football. With the 20th anniversary of the Falklands War in 2002, *Pink Ice* provides a timely analysis of how territorial disputes simply refuse to fade away.

The European Antarctic P. Roberts, 2011-12-19 This is the first transnational study of British, Norwegian, and Swedish engagement with the Antarctic. Rather than charting how Europeans unveiled the Antarctic, it uses the history of Antarctic activity as a window into the political and cultural worlds of twentieth-century Britain and Scandinavia.

A Frozen Field of Dreams, Science, Strategy, and the Antarctic in Norway, Sweden, and the British Empire, 1912-1952 Peder William Chelley Roberts, 2010 The dissertation examines how actors in Norway, Sweden, and the British Empire conceived the Antarctic as a space for science during the years 1912 to 1952. Instead of tracing a narrative of enlightenment, how science became the dominant form of activity in the Antarctic, I examine a series of episodes with particular attention to why particular kinds of science held sway within specific political, cultural, and economic contexts. Concerned more with how Antarctic science was planned and justified than how it was executed in the field, the project draws upon recent scholarship in geography and geopolitics as well as the history of exploration. The six case studies involve an aborted Anglo-Swedish Antarctic expedition in 1912, Britain's interwar Antarctic whaling research program, debates among whaling magnates and their associates over the relationship between Antarctic science and whaling in interwar Norway, the culture of polar exploration that emerged at Cambridge and to some extent Oxford between the world wars, the approach to polar exploration and quantitative glaciology pioneered by the Swedish geographer Hans Ahlmann, and the complicated history of the Norwegian-British-Swedish Antarctic Expedition 1949-52. I conclude with an epilogue arguing that the rise of

international science in the Antarctic during the 1950s reflected the geopolitical dynamics of the Cold War rather than the triumph of science over politics

International Relations in India: Theorising the region and nation Kanti P.

Bajpai, Siddharth Mallavarapu, 2005 The Companion Volume To International Relations In India Bringing Theory Back Home Deals With The Interplay Between Identities And Foreign Policy Borders And Notions Of Territoriality And Critical Geopolitics The Book Also Makes Room For New Interpretations Of Conventional Areas Of International Relations Such As Power And Violence Thereby Creating The Conditions For A Sustained And Serious Theoretical Conversation Of The Discipline In India Of Particular Relevance Are Contributions In The Field Of International Political Economy An Area Of Traditional Neglect In The South Asian Setting

The Greening of Antarctica Alessandro Antonello, 2019-05-03 In The Greening of Antarctica Alessandro Antonello investigates the development of an international regime of environmental protection and management between the signing of the Antarctic Treaty in 1959 and the signing of the Convention on the Conservation of Antarctic Marine Living Resources in 1980 In those two decades the Antarctic Treaty parties and an international community of scientists reimagined what many considered a cold sterile and abiotic wilderness as a fragile and extensive regional ecosystem Antonello investigates this change by analyzing the negotiations and developments surrounding four environmental agreements the Agreed Measures for the Conservation of Antarctic Fauna and Flora in 1964 the Convention for the Conservation of Antarctic Seals in 1972 a voluntary restraint resolution on Antarctic mining in 1977 and the Convention on the Conservation of Antarctic Marine Living Resources in 1980 Though distant from world populations Antarctica has long been a site of inter state contest for geopolitical power and standing This book reveals how a range of contests geopolitical epistemic and imaginative created the environmental protection regime of the Antarctic Treaty System and discusses the tension between states individual searches for power and the collective desire for stability in the region In this international and diplomatic context the actors were not only trying to keep relations between themselves orderly but they were also using treaties to order the human relationship with the environment Drawing on a wide range of international archives many newly opened The Greening of Antarctica offers the first detailed narrative of a crucial period in Antarctic history and reveals the contours of global environmental thought and diplomacy in the transformative Age of Ecology

Political Geography Mark Blacksell, 2006 In 1904 Sir Halford Mackinder published his seminal paper The Geographical Pivot of History demonstrating the central position of political geography in the study of geography as a whole a century later and political geography is still at the heart of human geography Yet over time political geography has experienced many significant ups and downs eventually recovering to a position of renewed pre eminence as the last century drew to a close This fascinating journey charted by this equally fascinating book forms a key part of the history of the evolution of spatial science Beyond a narrative the book provides an introduction to all the complex elements that constitute political geography today Organized in three distinct sections it covers process and patterns ideology and geopolitical visions beyond the state

Tackling key contemporary issues such as politics and the local state as well as more traditional topics such as state formation and international relations this thought provoking book covers the range of theoretical approaches Including many original maps and diagrams which skilfully illustrate key themes this book is a concise student friendly pedagogically rich introduction for students of geography political science and world affairs **Connectography** Parag Khanna,2016-04-19

Ryan, 2009-12-18 For many the dawn of the twentieth century ushered in an era where the world map had few if any blank spaces left to discover The age of exploration was supposedly dead New Spaces of Exploration challenges this assumption Focusing specifically on exploration in the twentieth century the authors demonstrate how new technologies and changing geopolitical configurations have ensured that exploration has remained a key feature of our rapidly globalizing world Ranging widely in their geographical focus from the Europe and Asia to Australia and from the polar regions to outer space they demonstrate the increasing diversity of modern exploration and reveal the continuing political military industrial and cultural motivations at play The result is a major contribution to our understanding of the significance of exploration in the twentieth century Contributors include E Baigent C Collis K Dodds F Driver M Godwin J Hill F Korsmo F MacDonald S Naylor
