

nationalization of [public goods](#).^[240] Rudolph Kjellén would call for an economic federation in Central Europe for the purpose of extending German colonial possessions, a sentiment endorsed by many Germans before 1914.^[241]

However, [economic growth](#) would increasingly bring Germany into conflict with England, with two distinct paths open to the empire: naval conflict with England, or land expansion within Europe.^[242] German industry demanded political independence from British hegemony in world politics, the shattering of Russian influence, and the annexation of weak states on Germany's border for their resources.^[243] But to break dependency on Britain, Germany required a formidable [mischance machine](#) force, which it would not have despite Wilhelm's aims.^[244] As a kind of half-measure, Germany realized that it should pursue alliance with Italy, and encourage the strengthening of its naval presence in the Mediterranean in order to counter what British influence they could.^[245]

[edit] Geopolitik rises

German geopolitik contributed to Nazi foreign policy chiefly in the strategy and justifications for [Lebensraum](#). Geopolitik contributed five ideas to German foreign policy in the interwar period: the [organic state](#), lebensraum, autarky, pan-regions, and the [land power](#) vs power [dichotomy](#).

Geostrategy as a [political science](#) is both descriptive and analytical like Political Geography, but adds a [normative](#) element in its strategic prescriptions for national policy.^[246] While it stems from earlier [American](#) and [British geostrategy](#), German geopolitik adopts an essentialist outlook toward the national interest, oversimplifying issues and representing itself as a [panacea](#).^[247] As a new and essentialist [ideology](#), geopolitik found itself in a position to prey upon the [post-World War I insecurity](#) of the populace.^[248]

In 1919, General Karl Haushofer would become professor of geography at the [University of Munich](#). This would serve as a platform for the spread of his geopolitical ideas, magazine articles and books. By 1924, as the leader of the German geopolitik school of thought, Haushofer would establish the *Zeitschrift für Geopolitik* monthly devoted to geopolitik. His ideas would reach a wider audience with the publication of *Die deutsche Raum* by [Hans Grottel](#) in 1926, popularizing his concept of lebensraum.^[249] Haushofer exercised influence both through his academic teachings, urging his students to think in terms of [continents](#) and emphasizing motion in international politics, and through his political activities.^[250] While Hitler's speeches would attract the masses, Haushofer's works served to bring the remaining [intellectuals](#) into the fold.^[251]

Geopolitik was in essence a consolidation and codification of older ideas, given a scientific gloss:

- [Lebensraum](#) was a revised colonial imperialism;
- [Autarky](#) a new expression of tariff protectionism;
- Strategic control of key geographic territories exhibiting the same thought behind earlier designs on the [Suez](#) and [Panama canals](#); and
- [Pan-regions](#) based upon the [British Empire](#), and the American [Monroe Doctrine](#), [Pan-American Union](#) and [hemispheric defense](#).^[252]

Geopolitik Doctrine Of National Self Sufficiency And Empire:

Geopolitik: a doctrine of national self-sufficiency and empire Johannes Mattern, Geopolitik Johannes Mattern, 1942 *Geopolitics and Empire* Gerry Kearns, 2009-06-11 Geopolitics and Empire examines the relations between two phenomena that are central to modern conceptions of international relations Geopolitics is the understanding of the inter relations between empires states individuals private companies NGOs and multilateral agencies as these are expressed and shaped spatially This view of the world achieved notoriety as the scientific basis claimed by Nazi ideologists of global conquest However under this or another name similar sets of ideas were important on both sides of the Cold War and now have a renewed resonance in debates over the New World Order of the so called Global War on Terror Geopolitics is a way of describing the conflicts between states as constrained by both physical and economic space It makes such conflicts seem inevitable The argument of the book is that this view of the world continues to appear salient because it serves to make the projection of force overseas seem an inevitable aspect of the foreign policy of states This quasi Darwinian view of international relations makes the pursuit of Empire appear a responsibility of larger and more powerful states Powerful states must become Empires or submit to others seeking something similar In its associations with Empire the study of Geopolitics returns continually to the ideas of a British geographer who never himself used the term Halford Mackinder is the source of many of the ideas of Geopolitics and by examining his ideas both in their original context and as they have been repeatedly rediscovered and reinvented this book contributes to current discussions of the ideology and practices of the US Empire today **The Atlantic Realists** Matthew Specter, 2022-02-08 In *The Atlantic Realists* intellectual historian Matthew Specter offers a boldly revisionist interpretation of realism a prevalent stance in post WWII US foreign policy and public discourse and the dominant international relations theory during the Cold War Challenging the common view of realism as a set of universally binding truths about international affairs Specter argues that its major features emerged from a century long dialogue between American and German intellectuals beginning in the late nineteenth century Specter uncovers an Atlantic realist tradition of reflection on the prerogatives of empire and the nature of power politics conditioned by fin de siècle imperial competition two world wars the Holocaust and the Cold War Focusing on key figures in the evolution of realist thought including Carl Schmitt Hans Morgenthau and Wilhelm Grewe this book traces the development of the realist worldview over a century dismantling myths about the national interest Realpolitik and the art of statesmanship

Geopolitik Doctrine of Self-Sufficiency and Empire Johannes Mattern, 1978-06-01 **Progress in Political Geography (Routledge Revivals)** Michael Pacione, 2014-06-03 Since the 1970s the field of political geography has undergone a significant transformation where new methodologies have been implemented to investigate the exercise of the power of the state within the urban environment First published in 1985 the essays in this collection addressed the growing need to assess the academic revisions that had been taking place and provide a reference point for future developments in

the discipline Still of great relevance the essays consider the most prominent themes in areas of key importance to political geography including theory and methodology minority groups local government and the geography of elections This volume will be of significant value for students of political geography urban demography and town planning

New Thinking In International Relations Theory Michael W Doyle, 2018-06-26 This book of ten original essays provides a showcase of currently diverse theoretical agendas in the field of international relations Contributors address the theoretical analysis that their perspective brings to the issue of change in global politics Written for readers with a general interest in and knowledge of world affairs New Thinking in International Relations Theory can also be assigned in international relations theory courses The volume begins with an essay on the classical tradition at the end of the Cold War Essays explore work outside the mainstream such as Jean Bethke Elshtain on feminist theory and James Der Derian on postmodern theory as well as those developing theoretical advances within traditional realms from James DeNardo's formal modeling to the more descriptive analyses of Miles Kahler and Steve Weber Other essays include Matthew Evangelista on domestic structure Daniel Deudney on naturalist and geopolitical theory and Joseph Grieco on international structuralist theory

American Power and International Theory at the Council on Foreign Relations, 1953-54 David M. McCourt, 2020-02-04 Between December 1953 and June 1954 the elite think tank the Council on Foreign Relations CFR joined prominent figures in International Relations including Pennsylvania's Robert Strausz Hup Yale's Arnold Wolfers the Rockefeller Foundation's William Thompson government adviser Dorothy Fosdick and nuclear strategist William Kaufmann They spent seven meetings assessing approaches to world politics from the realist theory of Hans Morgenthau to theories of imperialism of Karl Marx and V I Lenin to discern basic elements of a theory of international relations The study group's materials are an indispensable window to the development of IR theory illuminating the seeds of the theory practice nexus in Cold War U S foreign policy Historians of International Relations recently revised the standard narrative of the field's origins showing that IR witnessed a sharp turn to theoretical consideration of international politics beginning around 1950 and remained preoccupied with theory Taking place in 1953-54 the CFR study group represents a vital snapshot of this shift This book situates the CFR study group in its historical and historiographical contexts and offers a biographical analysis of the participants It includes seven preparatory papers on diverse theoretical approaches penned by former Berkeley political scientist George A Lipsky followed by the digest of discussions from the study group meetings American Power and International Theory at the Council on Foreign Relations 1953-54 offers new insights into the early development of IR as well as the thinking of prominent elites in the early years of the Cold War

Integrated Models in Geography (Routledge Revivals) Richard Chorley, Peter Haggett, 2013-11-05 First published in 1967 this book explores the theme of geographical generalization or model building It is composed of five of the chapters from the original Models in Geography published in 1967 The first chapter broadly outlines this theme and examines the nature and function of generalized statements ranging from conceptual models to scale

models in a geographical context The following chapters deal with mixed system model building in geography wherein data techniques and concepts in both physical and human geography are integrated The book contains chapters on organisms and ecosystems as geographical models as well as spatial patterns in human geography This text represents a robustly anti idiographic statement of modern work in one of the major branches of geography **Introduction to International Law**

Marek St. Korowicz, 2013-06-29 This book in its entirety as well as in each of its parts is an outline of the problems under discussion The subject matter of some eighty sections of the book is extensive it could indeed be presented by experts in as many volumes This study offers an attempt to formulate a synthesis however difficult of the vast amount of available material Unlike the well known standard Introductions to International Law which deal with all the major fields of international law this book treats exclusively the present conceptions of that law as expressed in legal literature international treaties and other agreements inter national judgements and awards governmental and diplomatic state ments and the like Special attention is devoted in several chapters of the book to the teachings of the most highly qualified publicists of the various nations which are considered by Article 38 paragraph 1 d of the Statute of the International Court of Justice as subsidiary means for the determination of rules of law An endeavor is made to ascertain whether in certain fields of the theory of international law a *Communis opinio doctorum* has either been reached or is in the process of achievement Some readers may consider that there are too many quotations from writings of publicists others will certainly feel as does this writer that too many outstanding international lawyers have not been included The SAGE Handbook of Geographical Knowledge

Geography and Strategy Colin S. Gray, Geoffrey Sloan, 2014-01-14 Geopolitical conditions influence all strategic behaviour even when cooperation among different kinds of military power is expected as the norm action has to be planned and executed in specific physical environments The geographical world cannot be avoided and it happens to be organized into land sea air and space and possibly the electromagnetic spectrum including cyberspace Although the meaning of geography for strategy is a perpetual historical theme explicit theory on the subject is only one hundred years old Ideas about the implication of geographical especially spatial relationships for political power which is to say geopolitics flourished early in the twentieth century Divided into theory and practice sections this volume covers the big names such as Mackinder Mahan and Haushofer as well as looking back at the vital influence of weather and geography on naval power in the long age of sail sixteenth to nineteenth centuries It also looks forward to the consequences of the revival of geopolitics in post Soviet Russia and the new space based field of astropolitics *The United States and the Global Struggle for Minerals* Alfred E.

Eckes, 2014-09-10 In 1973 1974 soaring commodity prices and an oil embargo alerted Americans to the twin dangers of resource exhaustion and dependence on unreliable foreign materials suppliers This period seemed to mark a watershed in

history as the United States shifted from the era of relative resource abundance to relative materials scarcity Alfred E Eckes s comprehensive study shows that resource depletion and supply dislocations are not concerns unique to the 1970s Since 1914 the quest for secure and stable supplies of industrial materials has been an important underlying theme of international relations and American diplomacy Although the United States has been blessed with a diversified materials base it has pursued a minerals strategy designed to exploit low cost high quality ores abroad Eckes demonstrates how this policy has led to official protection for overseas private investments involving a role for the Central Intelligence Agency Some modern historians have neglected the importance of resources in shaping diplomacy and history This book based on a vast variety of unutilized archival collections and recently declassified government documents helps to correct that imbalance In the process it illuminates an important and still timely aspect of America s global interests

The Quest for Political Unity in World History Stanley McCrory Pargellis,1944

Postmodern Imperialism Eric Walberg,2011-06-09 Eric Walberg s

POSTMODERN IMPERIALISM Geopolitics and the Great Game is a riveting and radically new analysis of the imperialist onslaught which first engulfed the world in successive waves in the 19th 20th centuries and is today hurtling into its endgame The term Great Game was coined in the nineteenth century reflecting the flippancy of statesmen and historians personally untouched by the havoc that they wreaked What it purported to describe was the rivalry between Russia and Britain over interests in India But Britain was playing its deadly game across all of Eurasia from the Balkans and Palestine to China and southeast Asia alternately undermining and carving up premodern states disrupting the lives of hundreds of millions with consequences that endure today With roots in the European enlightenment shaped by Christian and Jewish cultures and given economic rationale by industrial capitalism the inter imperialist competition turned the entire world into a conflict zone leaving no territory neutral The first game was brought to a close by the cataclysm of World War I But that did not mark the end of it Walberg resurrects the forbidden i word to scrutinize an imperialism now in denial but following the same logic and with equally horrendous human costs What he terms Great Game II then began with America eventually uniting its former imperial rivals in an even more deadly game to destroy their common revolutionary antagonist and potential nemesis communism Having won this game America and the new player Israel offspring of the early games have sought to entrench what Walberg terms empire and a half on a now global playing field using a neoliberal agenda backed by shock and awe With swift sure strokes Walberg paints the struggle between domination and resistance on a global canvas as imperialism engages its two great challengers communism and Islam its secular and religious antidotes Paul Atwood War and Empire The American Way of Life calls it an epic corrective It is a carefully argued and most of all cliché smashing road map according to Pepe Escobar journalist Asia Times Rigorously documented it is a valuable resource for all those interested in how imperialism works and sure to spark discussion about the theory of imperialism according to John Bell Capitalism and the Dialectic

Bounding Power Daniel H. Deudney,2010-12-16 Realism the dominant theory of international relations

particularly regarding security seems compelling in part because of its claim to embody so much of Western political thought from the ancient Greeks to the present Its main challenger liberalism looks to Kant and nineteenth century economists Despite their many insights neither realism nor liberalism gives us adequate tools to grapple with security globalization the liberal ascent and the American role in their development In reality both realism and liberalism and their main insights were largely invented by republicans writing about republics The main ideas of realism and liberalism are but fragments of republican security theory whose primary claim is that security entails the simultaneous avoidance of the extremes of anarchy and hierarchy and that the size of the space within which this is necessary has expanded due to technological change In Daniel Deudney s reading there is one main security tradition and its fragmentary descendants This theory began in classical antiquity and its pivotal early modern and Enlightenment culmination was the founding of the United States Moving into the industrial and nuclear eras this line of thinking becomes the basis for the claim that mutually restraining world government is now necessary for security and that political liberty cannot survive without new types of global unions Unique in scope depth and timeliness Bounding Power offers an international political theory for our fractious and perilous global village

Entangled Histories of the Balkans - Volume Four Roumen Dontchev Daskalov,Diana Mishkova,Tchavdar Marinov,Alexander Vezenkov,2017-02-06 The present volume is the last in the Entangled Balkans series and marks the end of several years of research guided by the transnational entangled history and histoire crois e approaches The essays in this volume address theoretical and methodological issues of Balkan or Southeast European regional studies not only questions of scholarly concepts definitions and approaches but also the extra scholarly ideological political and geopolitical motivations that underpin them These issues are treated more systematically and by a presentation of their historical evolution in various national traditions and schools Some of the essays deal with the articulation of certain forms of Balkan heritage in relation to the geographical spread and especially the cultural definition of the Balkan area Concepts and definitions of the Balkans are thus complemented by self representations that reflect on their cultural foundations **The Nazi State, War Crimes and War Criminals** Library of Congress. General Reference and Bibliography Division,1945

The Future of Post-Human War and Peace Peter Baofu,2010-04-16 Is peace really so precious that it is popularly viewed in irenology peace studies of our time as natural and a prime force in human behavior whereas war its opposite is instead condemned as sinful and not natural In fact there is even the prestigious Nobel peace prize to be awarded to those who contribute to world peace but not an equivalent Nobel war prize to those who do the contrary This euphoric view of peace is by no means a constant conventional wisdom in human history as it can be sharply contrasted with an equally seductive view of war in polemology war studies For instance only several decades ago the well known writer Thomas Mann once approvingly asked about war Is not peace an element of civil corruption and war a purification a liberation an enormous hope WK 2009a This fickleness of conventional wisdom on war and peace has blinded us from the dark sides of both war and peace

with the consequence of impoverishing our understanding of the human condition and its future Contrary to the two opposing sides of this conventional wisdom in its fickle history war and peace are neither possible nor desirable to the extent that their respective ideologues would like us to believe In addition war and peace cannot exist with each other Of course this is not to suggest that irenology peace studies and polemology war studies are worthless or that other fields of study related to war studies and peace studies like political science economics psychology sociology international relations history anthropology religious studies gender studies as well as a variety of others should be ignored WK 2009 Needless to say neither of these two extreme views is reasonable either Instead this book accepts the challenging task to provide an alternative better way to understand the nature of war and peace especially in relation to aggression and pacificity while learning from different approaches in the literature but without favoring any one of them nor integrating them since they are not necessarily compatible with each other Thus this book offers a new theory to transcend the existing approaches in the literature on war and peace in a way not conceived before If successful this seminal project is to fundamentally change the way that we think about war and peace from the combined perspectives of the mind nature society and culture with enormous implications for the human future and what I originally called its post human fate *Signal Corps Library Record*
