George and Robert Stephenson Samuel Smiles, 1879-01-01 Since the appearance of this book in its original form some seventeen years since the construction of Railways has continued to make extraordinary progress Although Great Britain first in the field had then after about twenty five years work expended nearly 300 millions sterling in the construction of 8300 miles of railway it has during the last seventeen years expended about 288 millions more in constructing 7780 additional miles But the construction of railways has proceeded with equal rapidity on the Continent France Germany Spain Sweden Belgium Switzerland Holland have largely added to their railway mileage Austria is actively engaged in carrying new lines across the plains of Hungary which Turkey is preparing to meet by lines carried up the valley of the Lower Danube Russia is also occupied with extensive schemes for connecting Petersburg and Moscow with her ports in the Black Sea on the one hand and with the frontier towns of her Asiatic empire on the other Italy is employing her new born liberty in vigorously extending railways throughout her dominions A direct line of communication has already been opened between France and Italy through the Mont Cenis Tunnel while another has been opened between Germany and Italy through the Brenner Pass so that the entire journey may now be made by two different railway routes excepting only the short sea passage across the English Channel from London to Brindisi situated in the south eastern extremity of the Italian peninsula During the last sixteen years nearly the whole of the Indian railways have been made When Edmund Burke in 1783 arraigned the British Government for their neglect of India in his speech on Mr Fox's Bill he said England has built no bridges made no high roads cut no navigations dug out no reservoirs Were we to be driven out of India this day nothing would remain to tell that it had been possessed during the inglorious period of our dominion by anything better than the ourang outang or the tiger But that reproach no longer exists Some of the greatest bridges erected in modern times such as those over the Sone near Patna and over the Jumna at Allahabad have been erected in connection with the Indian railways More than 5000 miles are now at work and they have been constructed at an expenditure of about 88 000 000 of British capital guaranteed by the British Government The Indian railways connect the capitals of the three Presidencies uniting Bombay with Madras on the south and with Calcutta on the north east while a great main line 2200 miles in extent passing through the north western provinces and connecting Calcutta with Lucknow Delhi Lahore Moultan and Kurrachee unites the mouths of the Hooghly in the Bay of Bengal with those of the Indus in the Arabian Sea When the first edition of this work appeared in the beginning of 1857 the Canadian system of railways was but in its infancy The Grand Trunk was only begun and the Victoria Bridge the greatest of all railway structures was not half erected The Colony of Canada has now more than 3000 miles in active operation along the great valley of the St Lawrence connecting Rivi re du Loup at the mouth of that river and the harbour of Portland in the State of Maine vi Montreal and Toronto with Sarnia on Lake Huron and with Windsor opposite Detroit in the State of Michigan During the same time the Australian Colonies have been actively engaged in providing themselves with railways many of which are at work and others are in course of formation The Cape of Good Hope has several lines open and others making

France has constructed about 400 miles in Algeria while the Pasha of Egypt is the proprietor of 360 miles in operation across the Egyptian desert The Japanese are also making railroads

Sacred Space and Anglo-Turkish Relations John Fisher, 2024-09-05 This work investigates how various sacred spaces in Ottoman and Republican Turkey interfaced with British foreign policy It considers how these spaces impacted upon British prestige in the context of its dealings with Turkey chiefly as well as other Great Powers The period covered is from the demise of the Levant Company in 1825 to the deconsecration of the Crimean Memorial Church in Istanbul in 1976 Other sacred spaces discussed include the British Embassy Chapel the Crimean War cemeteries various British churches and cemeteries in Izmir the Gallipoli cemeteries connected with the campaign of 1915 and the Phanar the Ecumenical Patriarch's home in Istanbul The book considers how and to what extent the Foreign Office in London and its staff in Turkey intervened to secure those spaces and why the politics of the Patriarchate intruded into the Foreign Office's geo strategic considerations It considers the limits of that support and how dealings over sacred space intermeshed generally with British policy towards Turkey It further explores the motives not just of diplomats and consuls who were instrumental in establishing or safeguarding those spaces but also the aims of other organisations and of expatriate Britons who were similarly involved It also considers instances where such support became attenuated or was withdrawn The book is unique in illuminating in a broad fashion the role of sacred space in the context of Anglo Turkish relations and British power projection in the Near East
