*The Engineering Geology and Hydrology of Karst Terrains* Barry F. Beck,J. Gayle Herring,J. Brad Stephenson,2020-12-17 Engineers from around the world recount in this volume their successes and failures in attempting to deal with unique and quixotic landscapes

*Geotechnical and Environmental Applications of Karst Geology and Hydrology* B.F. Beck,J.G. Herring,2001-01-01 This text covers topics such as sinkhole formation and regional studies of sinkholes and karst Issues addressed are taken from the 8th multidisciplinary conference on this subject and chart the characteristics of sinkholes and karst as well as their environmental repercussions

*Monitoring and Early Warning Technologies on Karst Lands* Xiaozhen Jiang,Mingtang Lei,Wanfang Zhou,Fubiao Zhou,Xiao Ma,Jianling Dai,Zongyuan Pan,2024-06-19 This book compiles a broad range of monitoring and early warning technologies focused on high resolution in situ water quality parameters at springs and monitoring wells The surface collapses often cause severe damage to infrastructures properties and loss of lives whereas contaminated groundwater poses risks to human health and the environment Collapses are critical in karst systems sparsening a seventh of Earth's land surface Karsts are also very relevant for drinking water yet karst represents a fourth of global drinking water Mitigating collapses and contaminated groundwater in karst aquifers can be complicated and costly These parameters detect hydrodynamics internal soil erosion and ground deformation changes as karst collapse and pollution proxies This book represents the most comprehensive overview of decades of research on karst collapse and groundwater contamination This book is of interest to researchers and policymakers

*Site Characterization in Karst and Pseudokarst Terraines* Richard C. Benson,Lynn B. Yuhr,2015-09-24 This book provides a practical strategy for obtaining a more complete and accurate geologic site characterization The strategy and methods to characterize complex geologic settings are readily available The strategy utilizes readily available technology basic science and good old fashioned common sense resulting in a solid understanding of geologic and even karst or pseudokarst conditions We provide an introduction to many off the shelf methods available for site characterization as well as examples of their application throughout the book The purpose of a geologic site characterization is to understand the 3 dimensional geologic framework along with the engineering and hydrologic properties of a site including any man made impacts A well done site characterization is the cornerstone of all

geotechnical groundwater and environmental projects The geologic conditions particularly karst conditions can significantly impact a site including its structural stability groundwater pathways and potential for rapid transport or traps for contaminants Once we have adequately characterized the geologic conditions can we carry our remediation design and construction model flow and make risk assessments that are accurate and reliable **Karst Geohazards** Barry F.

Beck,2018-12-19 Geologists and geographers study how to develop how and where karst develops and how sinkholes form but engineers must use this information to develop karst terrane Over the past ten years these multidisciplinary conferences on the applied aspects of karst hydrogeology and engineering have been successful in bringing together engineers geologists other scientists and government regulators who must safely establish human infrastructure on karst terrane whilst protecting the environment The essences of these conferences has always been communication between geologists and engineers with an emphasis on practical applications and case studies This text contains the proceedings of the fifth conference on karst geohazards It presents 65 papers that cover topics such as groundwater contamination through sinkholes and the karst surface stormwater drainage and flooding problems and foundation considerations and improvements in karst **Reclaiming The Underground Space - Volume 1** International Tunnelling Association,J. Saveur,2022-02-13
