Challenges in Long-term Geriatric and Palliative Care Jochanan E. Naschitz, 2020 Practice guidelines for management of conditions prevalent in long term geriatric care are based by and large on expert consensus and rarely on controlled studies Though enforced by tradition some of the rules often applied in clinical practice fall short of scientific foundation In lacking high grade scientific evidence geriatric practice might benefit from an evidence balanced approach A step forward in this direction is by corroboration of observational data In this book we brought our share of observational data input from our experience in geriatric care to be merged with the profession s collective information base Seventy five case histories illustrate a variety of conditions met at the bedside some of them challenging the clinician s expertise and judgement We hope that illustrating clinical practice in the real world might be a suitable addition for physicians

Geriatric Palliative Care R. Sean Morrison, Diane E. Meier, 2003-05-08 Geriatric Palliative Care covers a broad spectrum of issues characterizing care near the end of life for older adults Beginning with the social and cultural context of old age and

frailty this volume details specific aspects of palliative care relevant to particular disorders e g cancer strokes dementia etc as well as individual symptoms e g pain fatigue anxiety etc Communication between care givers and patients in a variety of settings is also discussed The theme of this book is that palliative care is the best approach to the care of chronically ill and frail elderly because of its focus on quality of life support for functional independence and the centrality of the patient s values and experiences in determining the goals of medical care Indeed Geriatric Palliative Care provides a comprehensive medical reference for all clinicians who care for older adults

Geriatric Palliative Care Suzanne Goldhirsch,2014-03-21

The growing geriatric population in the United States has created an increasing need for palliative medicine services across the range of medical and surgical specialties Yet palliative medicine lacks the resources to carry such a workload itself Geriatric Palliative Care addresses this need by encouraging individual specialties to own the management of elderly with the same vigor as they own other key management competencies within their specialty This clinically focused and highly practical handbook which compliments the more comprehensive text Geriatric Palliative Care by Sean Morrison and Diane Meier Oxford University Press 2003 encourages this process of learning and ownership across many medical specialties Designed to be readable and easily accessible to a range of health care providers Geriatric Palliative Care outlines specific strategies for caring for specific palliative care issues common in elderly patients The handbook also provides evidence based advice for helping patients relatives and staff cope with such issues as polypharmacy dementia and consent multiple pathologies home care elderly caregivers and supporting the elderly in the place where they would like to be

Living with Ageing and Dying Merryn Gott,Christine Ingleton,2011-05-12 Ageing populations mean that palliative and end of life care for older people must assume greater priority Indeed there is an urgent need to improve the experiences of older people at the end of life given that they have been identified as the disadvantaged dying To date models of care are underpinned by the ideals of specialist palliative care which were developed to meet the needs of predominantly middle aged

and young old people and evidence suggests these may not be adequate for the older population group This book identifies ways forward for improving the end of life experiences of older people by taking an interdisciplinary and international approach Providing a synergy between the currently disparate literature of gerontology and palliative care a wide range of leading international experts contribute to discussions regarding priority areas in relation to ageing and end of life care Some authors take a theoretical focus others a very practical approach rooted in their clinical and research experience The issues covered are diverse as are the countries in which discussions are contextualised Those working in both palliative care and gerontology will find the issues and advice discussed in this book hugely topical and of real practical value Palliative Care II Linda L. Emanuel, 2005-01 This issue is the second of two on Palliative Care guest edited by Linda Emanuel MD Director of the Buehler Center on Aging at Northwestern Medical School Specifically devoted to Improving Care Palliative Care II is divided into three sections that cover End of Life Care in the Modern Era Research and Education and Ethical Legal and Policy Issues Within these sections the authors focus on norms and standards of end of life care an evaluation of the instruments of assessment in geriatric medicine and an agenda for policy improvement Palliative Care aims to relieve suffering and improve quality of life for patients with advanced illness and as such it is a topic of prime concern to all geriatricians **Advanced Age Geriatric Care** Nages Nagaratnam, Kujan Nagaratnam, Gary Cheuk, 2018-11-26 As the Baby Boomers age concerns over healthcare systems abilities to accommodate geriatric patients grow increasingly challenging This is especially true with the population deemed to be the oldest of the old specifically those over the age of 85 Unlike any other time in history this demographic is the fastest growing segment of most developed countries In the United States the oldest old is projected to double from 4.3 million to 9.6 million by 2030 The increased life expectancy of the population since the early 1900s has been built on the improvement of living conditions diet public health and advancement in medical care With this we have seen a steady decline in the age specific prevalence of vascular and heart diseases stroke and even dementia Older persons are healthier today than their counterparts decades ago More importantly than in any other age group the care of the oldest old must be individualized management decisions should be made taking into consideration the older persons expressed wishes quality of life function and mental capacity The inevitable consequence is that there will be an increase in the prevalence of older persons with chronic diseases multiple co existing pathologies and neuro degenerative diseases The oldest of the aging population are often excluded from drug trials and their treatments are largely based on findings extrapolated from that of the younger old Furthermore among the oldest old physiologically they are more diverse than other segments of the population Their demographic characteristics are unparalleled and different compared to that of the younger old Several studies have drawn attention to the differing attitudes among health professionals towards elderly people and many show prejudice because they are old As a result the use of age as a criteria in determining the appropriateness of treatment is of very limited validity yet there are limited resources that guide physicians through these

challenges This book creates a greater awareness of these challenges and offers practical guidelines for working within the infrastructures vital to this demographic This book is designed for geriatricians primary care physicians junior medical officers specialty geriatrics nurses and gerontologists It is divided into 3 sections General Considerations Chronic diseases and Geriatric Syndromes Each chapter provides a summary of important and essential information under the heading of Key Points Case studies are included in some of the chapters to highlight the principles of management Primary Care Geriatrics Richard J. Ham,2007-01-01 Accompanying CD ROM contains video learning modules on gait and balance and dizziness a dermatology quiz and downloadable cognitive assessment tools to hone clinical skills File formats include QuickTime movies PDFs and HTML documents **Geriatric Palliative Care** ,2015 *Difficulties and Challenges in Geriatric Health Management* Alharthi, Adil Hamad,2024-08-05 Within modern medicine a pressing concern looms the care and well being of our aging population As the number of elderly individuals seeking medical attention continues to rise healthcare professionals particularly internists and family medicine specialists find themselves faced with unique challenges in the diagnosis and management of geriatric patients The specialized field of geriatrics demands a comprehensive understanding of the intricacies involved in providing top tier care to the elderly Without this expertise there is a risk of suboptimal healthcare outcomes diminished quality of life and increased mortality rates *Difficulties and Challenges in Geriatric Health Management* offers profound insights and practical strategies to address the unique challenges geriatric patients present Covering essential topics such as palliative care pulmonary health renal function neurological disorders endocrine conditions and orthopedic concerns this book equips scholars with the tools they need to deliver exemplary care to the elderly With *Difficulties and Challenges in Geriatric Health Management* in hand healthcare professionals can confidently navigate the intricate landscape of geriatric healthcare ultimately contributing to a brighter and healthier future for our aging population *Principles and Practice of Geriatric Surgery* Ronnie Ann Rosenthal,Michael E. Zenilman,Mark R. Katlic,2011-07-12 In the preface to this impressive and well produced book the editors state that their aim is not to describe a new surgical specialty since most surgeons will soon need to be geriatric surgeons but to assemble a comprehensive account that will allow all providers of healthcare to the elderly to understand the issues involved in choosing surgery as a treatment option for their patients This is a useful book that deserves to do well I hope that the editors and their publisher will have the stamina to make this the first of several editions as it is clear that updated information about surgery in the elderly will be required to keep pace with this important field NEJM Book Review **Fundamentals of Geriatric Pharmacotherapy: An Evidence-Based Approach** Lisa C. Hutchison,Rebecca B. Sleeper,2025-08-14 The Fundamentals of Geriatric Pharmacotherapy 3rd Edition is a comprehensive guide to the safe and effective management of medications in older adults Updated with the latest evidence and treatment recommendations including a new chapter on oncology in older adults it s an essential resource for students pharmacists and clinicians Patient cases clinical pearls and self assessment

Geriatrics for Specialists Andrew G. Lee, Jane F. Potter, G. Michael Harper, 2021-08-31 This book aims to be a single point of reference for advances in the care of geriatric populations across medical and surgical specialties The aging population is a unique demographic with its own health challenges Geriatricians are specifically trained to address these challenges but few medical students or residents enter geriatrics even as the demand for geriatric expertise increases The practices of many medical and surgical specialists are dominated by older patients who may themselves see many specialists but rarely visit geriatricians This updated edition elucidates the most common medical conditions seen in aging patients and translates approaches to those conditions for physicians across specialties Divided into three sections that assemble crosscutting issues medical specialties and surgical and related specialties this book serves as a guide for clinicians of all backgrounds who will work with older patients as the demographic ages further This second edition of *Geriatrics for Specialists* expands the number of specialist chapters to reflect growth in research in aging and clinical care for older people in dermatology plastic surgery and behavioral neurology All original chapters from the first edition are extensively revised and updated to reflect the rapid growth of new knowledge in the field
