Tract A. Pilotto,P. Malfetheriner,P. R. Holt,Tamàs Fülöp,2003-07 With the dramatic increase of the aging population the study and care of gastrointestinal disorders in the elderly have become priority topics for both clinicians and researchers The geriatric approach which includes the epidemiology and pharmacokinetics of drugs as well as a comprehensive multidimensional assessment is particularly important in managing older patients with gastrointestinal disorders since these patients are likely to have multiple interacting problems that interfere with their daily function and complicate their treatment This book presents the results of recent studies in geriatric gastroenterology and reviews both basic and clinical aspects of the field An important section is devoted to the close examination of the structural and functional effects of aging on the physiology of the gastrointestinal tract Recent advances in diagnostic tools and the treatment of elderly patients with dysphagia and gastroesophageal reflux disease as well as with NSAID related or Helicobacter pylori associated gastroduodenal diseases are reported in updated chapters The physician s approach to the management of disorders of the small intestine colon pancreas and liver is discussed highlighting the specific aspects of such disorders in old age As it is important that the geriatric assessment of elderly patients is carried out by a multidisciplinary team which includes experienced specialists as well as primary care physicians and community health workers the book addresses a wide readership general physicians specialists in geriatrics and gastroenterology and health care providers involved in planning care for elderly patients with gastrointestinal disorders *Practical Geriatric Assessment* Howard Fillit,Gloria

Picariello,1998 Geriatric assessment is an integral part of geriatric care throughout the world The frail elderly often have multiple chronic illnesses functional disabilities and psychosocial problems their needs therefore extending far beyond the treatment of a single medical condition Comprehensive assessment of such patients requires a multidisciplinary team approach and the use of an organized efficient set of guidelines and procedures with which to identify and address potentially reversible problems The ultimate goal is then to systematically restore and maintain the functions essential to preserve quality of life Practical Geriatric Assessment is structured for ease of quick reference The background to each application of geriatric assessment is given first and this is then placed in its practical context thus providing an essential guide to the principles and methods of effective geriatric assessment *Eldercare Technology for Clinical Practitioners*

Majd Alwan,Robin Felder,2007-12-26 This important handbook addresses technologies targeted at the assessment early detection and the mitigation of common geriatric conditions These include decline in functional abilities gait mobility sleep disturbance vision impairment hearing loss falls and cognitive decline This book not only describes the state of both embedded and wearable technologies but also focuses on research showing the potential utility of these technologies in the

field *Mini Nutritional Assessment (MNA): Research and Practice in the Elderly* B. Vellas, P. J. Garry, Philip J. Garry, Y. Guigoz, 1999-07 This book is the first of a new series which will present the proceedings of the newly established Nestlé Nutrition Workshop Series Clinical Performance Programme aimed at adult nutrition Undernutrition is a common phenomenon in elderly people and malnutrition reaches significant levels in those being in hospital nursing homes or home care programs Consequences of malnutrition often go unrecognised owing to the lack of specific validated instruments to assess nutritional status in frail elderly persons The Mini Nutritional Assessment MNA provides a single rapid assessment of nutritional status in the elderly of different degrees of independence allowing the prevalence of protein energy malnutrition to be determined and to evaluate the efficacy of nutritional intervention and strategies Easy quick and economical to perform it enables staff to check the nutritional status of elderly people when they enter hospitals or institutions and to monitor changes occurring during their stay Moreover the MNA is predictive of the cost of care and length of stay in hospital This publication will be of immense assistance to heads of geriatric teaching units teachers in nutrition clinicians general practitioners and dieticians enabling them to better detect recognise and start treatment of malnutrition in the elderly
