WWII history captures the evolution of Nazi Germany's anti armor weaponry through rare archival wartime photos. Hitler's Wehrmacht and SS units will be remembered for their aggressive Blitzkrieg tactics. But as the war progressed the Germans developed an impressive range of anti tank warfare weaponry and munitions. Using many rare unpublished images this Images of War book covers the full Nazi anti armor capability. Also featured are the half tracks and converted Panzers that pulled or mounted these weapons and carried observers and reconnaissance elements forward. Later hand held anti tank weapons came into service and were effective against Allied armor. The Panzerfaust with its shaped charge warhead became the first disposable anti tank weapon in history. This comprehensive book shows this formidable range of weapons in action from Poland in 1939 through North Africa and the Eastern Front to the final collapse of the Third Reich in 1945. Hitler's Panzers Ian Baxter, 2007-03-28 A World War II pictorial history of Nazi Germany's armored fighting vehicles and exploration of their inner workings. Using previously unpublished photographs many of which have come from the albums of individuals who took part in the war. Hitler's Panzers presents a unique visual account of Germany at arms. The book analyzes the development of the Panzer and shows how it became Hitler's supreme weapon. It describes how the Germans carefully built up their assault forces utilizing all available reserves and resources and making them into effective killing machines. From the Panzerkampfwagen 1 to the most powerful tank of the Second World War the Jagdtiger the volume depicts how these machines were adapted and up gunned to face the ever increasing enemy threat. Hitler's Panzers is a unique look into the full workings of the various light tanks main battle tanks self propelled assault guns and tank destroyers. It is a vivid fully illustrated account of the development and deployment of the German tank and brings together a captivating glimpse at the cutting edge of World War Two military technology. *Panzer IV, 1939-1945* Paul Thomas, 2017-11-30 With comprehensive captions and text this superb book tells the story of the production of the Panzer IV to the key battles in Poland France North Africa Italy Russia and North West Europe. Initially the Panzer IV was designed as an infantry support tank but soon proved to be so diverse and effective that it earned a unique tactical role on the battlefield. The book shows how the Panzer IV evolved and describes how the Germans carefully utilized all available reserves and resources into building numerous variants that went into production and saw action on the battlefield. It depicts how these formidable tanks were adapted and up gunned to face the ever increasing enemy threat. Between 1936 and 1945 over 8 000 Panzer IVs were built. For most of the war this tank was a match for its opponents heavy tanks and quickly and effectively demonstrated its superiority on the battlefield. The Panzer IV was the only German tank to remain in production during the war. Its chassis was converted into more models than any other Panzers that entered service. As well as the various prototype projects and command tanks observation vehicles ammunition carriers recovery vehicles amphibious armored ferry vehicles that saw service the book will show a multiple of converted anti tank propelled vehicles. Women at War 1939-1945 Carol Harris, 2000-10-20 Long before the outbreak of the Second World War official calculations showed Britain would be short of the manpower needed to fight

the enemy and keep up production of weapons food and other essentials It was hoped that women volunteers would fill the gaps and so they volunteered as workers in Civil Defence the Women's Land Army munitions factories and non combatant roles in the Forces But by 1941 the Government had to face facts any effective response would have to involve conscription of British women All females between the ages of fourteen and sixty four were registered and soon the vast majority had work to do They collected tons of salvage knitted and sewed and raised money for warships and weapons Women ran fire stations and drove makeshift ambulances while cities burned and enemy bombs exploded around them They kept their families going often as single parents while their husbands were away for years in the armed forces By the end of the war some of the most experienced rat catchers in the country were female others were accomplished engineers carters rail workers and bargees When it was over these wartime roles were not commemorated in films and books There has been little official acknowledgement of the enormous and crucial contribution those British women made to the lives we live now Many are getting on in years and their precious first hand memories will go with them Their stories are worth telling now for that alone But they are also tales of love death sacrifice and romance of humour and horror and of an extraordinary time when ordinary women did extraordinary things **The British National Bibliography** Arthur James Wells,2003 _____

German forces stormed western Russia virtually from the Baltic to the Black Sea By late fall the invasion had foundered against Russian weather terrain and resistance and by December it had failed at the gates of Moscow but early on as the Germans sliced through Russian territory and soldiers with impunity capturing hundreds of thousands it seemed as though Russia would fall In the spirit of Martin Middlebrook's classic *First Day on the Somme* Craig Luther narrates the events of June 22 1941 a day when German military might was at its peak and seemed as though it would easily conquer the Soviet Union a day the common soldiers would remember for its tension and the frogs bellowing in the Polish marshlands It was a day when the German blitzkrieg decimated Soviet command and control within hours and seemed like nothing would stop it from taking Moscow Luther narrates June 22 one of the pivotal days of World War II from high command down to the tanks and soldiers at the sharp end covering strategy as well as tactics and the vivid personal stories of the men who crossed the border into the Soviet Union that fateful day which is the Eastern Front in microcosm representing the years of industrial scale warfare that followed and the unrelenting hostility of Germans and Soviets

Hitler's Gauls Jonathan Trigg, 2009-11-20 The divisions of the Waffen SS were among the elite of Hitler's armies in the Second World War But alongside the Germans in the Waffen SS fought an astonishingly high number of volunteers from other countries By the end of the Second World War these foreign volunteers comprised half of all Hitler's Waffen SS and filled the ranks of over twenty four of the nominal thirty eight Waffen SS divisions So during the most brutal war that mankind has ever known hundreds of thousands of men flocked to fight for a country that was not theirs and for a cause that was one of the most monstrous and barbaric in history Who were these men and why did they fight Hitler's Gauls is an in depth examination of one of these legions of foreign volunteers the Charlemagne division who were recruited entirely from conquered France The men in Charlemagne often motivated by an extreme anti communist zeal fought hard on the Eastern Front including battles of near annihilation in the snows of Pomerania and the final stand in the ruins of Berlin This definitive history illustrated with rare photographs explores the background training key figures and full combat record of one of Hitler's lesser known foreign units of the Second World War

The German Army Handbook, 1939-1945 James Lucas, 2000 From the opening shots of World War II in Poland in September 1939 through the blitzkrieg to the fall of France and the Low Countries the German Army was at the forefront of battle It remained in the thick of the action the Eastern Front North Africa the Balkans Scandinavia North West Europe right

up until the last desperate shots were fired over the ruins of a crumbling Third Reich in May 1945 As the instrument with which Hitler was to achieve his plan for world domination the German Army was at the cutting edge of 20th century military technology Before the emergence of the US Army as a force to be reckoned with later in World War II the German Army was the most powerful efficient and well equipped fighting force in the world
